Perspectives On Welfare Ideas Ideologies And Policy Debates:

Perspectives on Welfare Alan Deacon, 2002 An introduction to the current debates about the future direction of welfare reform on both sides of the Atlantic The first part outlines a range of different perspectives on welfare and shows how each of these perspectives rests upon a different assumption about the role and purpose of welfare policy and a different understanding of human nature and motivation Some of these perspectives see the primary role of welfare as to reduce inequalities while others see the central objective as the reduction of welfare dependency The second part shows how the current debates in Britain and the United States are informed by these perspectives and argues that debates about inequality and dependency are not mutually exclusive but address different dimensions of the same problem In all this text should be valuable reading for courses in social policy health and social welfare as well as those with a political and wider interest in welfare reform

Transfer State Peter Sloman, 2019-10-24 The idea of a guaranteed minimum income has been central to British social policy debates for more than a century Since the First World War a variety of market economists radical activists and social reformers have emphasized the possibility of tackling poverty through direct cash transfers between the state and its citizens

As manufacturing employment has declined and wage inequality has grown since the 1970s cash benefits and tax credits have become an important source of income for millions of working age households including many low paid workers with children The nature and purpose of these transfer payments however remain highly contested Conservative and New Labour governments have used in work benefits and conditionality requirements to activate the unemployed and reinforce the incentives to take low paid work an approach which has reached its apogee in Universal Credit By contrast a growing number of campaigners have argued that the challenge of providing economic security in an age of automation would be better met by paying a Universal Basic Income to all citizens Transfer State provides the first detailed history of guaranteed income proposals in modern Britain which brings together intellectual history and archival research to show how the pursuit of an integrated tax and benefit system has shaped UK public policy since 1918 The result is a major new analysis of the role of cash transfers in the British welfare state which sets Universal Credit in a historical perspective and examines the cultural and political barriers to a Universal Basic Income

Delivering Family Justice in the 21st Century Mavis Maclean, John Eekelaar, Benoit Bastard, 2015-08-27 Family justice requires not only a legal framework within which personal obligations are regulated over the life course but also a justice system which can deliver legal information advice and support at times of change of status or family stress together with mechanisms for negotiation dispute management and resolution with adjudication as the last resort The past few years have

seen unparalleled turbulence in the way family justice systems function These changes are associated with economic constraints in many countries including England and Wales where legal aid for private family matters has largely disappeared But there is also a change in ideology in a number of jurisdictions including Canada towards what is sometimes called neo liberalism whereby the state seeks to reduce its area of activity while at the same time maintaining strong views on family values Legal services may become fragmented and marketised and the role of law and lawyers reduced while self help web based services expand The contributors to this volume share their anxieties about the impact on the ability of individuals to achieve fair and informed resolution in family matters *The Politics of Unemployment in Europe* Marco Giugni, 2016-03-03 This book offers a state of the art discussion of the political issues surrounding unemployment in Europe Its unique combination offers both a policy and institutional perspective whilst studying the viewpoint of individual civil society members engaging in collective action on the issue of joblessness It is the result of Marco Giugni s three year cross national comparative research project financed by the European Commission united with hand picked contributions from invited experts Throughout his study he focuses on how the EU approaches national unemployment the main national differences in talk about unemployment and unemployment policy and how the representatives of the unemployed produce and coordinate demands in relation to unemployment policy This book contains a number of genuinely cross national chapters along with sections on specific national cases namely the UK Ireland Germany Switzerland Belgium and Sweden
