National Institute of Justice Journal ,2000 NCJRS Catalog ,1999 **Perspectives on Crime and Justice** U. S. Department of Justice,Office of Justice Programs,National Institute of Justice,2013-11 As a Nation we are very fortunate to have a robust academic community that thinks researches writes teaches and talks about the issues of crime and justice Members of that academic community including legal scholars sociologists economists philosophers organizational theorists anthropologists historians psychologists and a small army of criminologists look at these issues in profoundly different ways As a Nation we also are blessed with a national character trait that allows us to be open to many new ideas about the policies that we should adopt as we respond to the challenges of crime and justice The ideas in the air today represent a stunning array of different and sometimes divergent policies and issues truth in sentencing restorative justice waiver of juvenile offenders to adult court problem solving policing zero tolerance coerced abstinence community prosecution community notification concealed weapons detection technology right to carry statutes home nurse visitation programs community policing hair testing mandatory arrest electronic bracelets assessment centers and reparative sentencing boards to name a few It is understandably hard to keep track of all of these new ideas and it is harder still to think about designing funding and implementing rigorous evaluations of these new initiatives particularly because so much of today s exciting innovation is happening at the local level and seldom rises to national attention One way we can take a broader deeper and more critical view of our society s responses to crime and justice is to ask the national treasure that is our academic community to provide a policy perspective on the big issues to help us keep the big picture in focus To that end we have asked some of the country s most prominent academics to put aside for the moment their latest research project step outside the classroom take a break from the latest book and come to Washington and share their thoughts with a policymaking audience Violent Offenders: Theory, Research, Policy, and Practice Matt DeLisi,Peter Conis,2011-07-20 Although the public interest in criminal predators is extensive the criminology of criminal predators is fragmented Violent Offenders Theory Research Policy and Practice Second Edition aims to demystify the many different types of violent offenders we hear about in the media This newly revised and updated Second Edition is a compilation of original scholarship from an international collection of applied and academic criminologists Based not only on history and academic research but also on the experiences of author Peter Conis as a 25 year veteran of law enforcement it provides students with a realistic view of why people commit violent crimes and how our criminal justice system as a whole responds to these offenders and these violent acts It contains cutting edge material on the broad category of criminal predators including homicide offenders sex offenders financial predators and conventional street criminals Unlike other texts on the subject that narrowly focus on one type of criminal e g serial killers this updated Second Edition illustrates the systemic importance of predation in antisocial behavior This book is divided into two parts part one covers the theoretical and disciplinary foundations of the study of violent behavior spanning the disciplines of sociology

psychology biology and neuroscience Part two covers the policy and practice of responding to violent offenders from the insightful perspectives of people who work among them on a daily basis New and Key Features of the Second Edition Contains 10 NEW chapters 5 in theory and research and 5 in policy and practice These additions provide greater overall coverage of sociological theory evolutionary psychology theory and female offenders The section on policy and practice is organized to be consistent with the criminal justice system from law enforcement through the courts to corrections Hands on research and practitioner expertise illustrate today's study of criminal predation Provides clear explanations of how criminological theory relates to the formation of a criminal offender to help students understand the reasons behind a person's violent actions

The NIJ Publications Catalog National Institute of Justice (U.S.), 1999. **Regulation through Litigation** Kip W. Viscusi, 2004-05-13 Recent high-profile lawsuits involving cigarettes, guns, breast implants, and other products have created new frictions between litigation and regulation. Increasingly, litigation is being used as a financial lever to force companies to accept negotiated regulatory policies that invariably involve less public input and accountability than those arising from government regulation. The process not only usurps the traditional governmental authority for regulation but also shifts the locus of establishing tax policy from the legislature to the parties involved in the litigation. Citizen interests are not explicitly represented, and there is no mechanism to ensure that these outcomes are in society's best interests. By focusing on case studies involving the tobacco industry, guns, lead paint, breast implants, and health maintenance organizations, the

contributors to this volume collectively shed light on the likely consequences of regulation through litigation for insurance markets and society at large They analyze the ramifications of large scale lawsuits mass torts and class actions for the insurance market and advocate increased public scrutiny of attorney reimbursement and a competitive bidding process for all lawsuits involving government entities as the plaintiffs
