Perspectives On Technology:

New Perspectives on Technology in Society Ibo van de Poel,Lotte Asveld,Donna Mehos,2017-11-08 The development and introduction of a new technology to society can be viewed as an experimental process full of uncertainties which are only gradually reduced as the technology is employed Unexpected developments may trigger an experimental process in which society must find new ways to deal with the uncertainties posed This book explores how the experimental perspective determines what ethical issues new technologies raise and how it helps morally evaluate their introduction Expert contributors highlight the uncertainties that accompany the process identify the social and ethical challenges they give rise to and propose strategies to manage them Focusing on the introduction of new technologies and experimentation as ways to perceive new developments and changing contexts a key theme of the book is how to approach the moral issues raised by new technology and understand the role of experimentation in exploring these matters   Starting the Dialogue Marie Hoepfl,Brian Raichle,James Byron Houser,2015-08-05   **Perspectives on Technology** Nathan Rosenberg,1985 Perspectives on Technology consists of papers written by Nathan Rosenberg over a ten year period from the early 1960s to the early 1970s   **Education in a Digital World** Neil Selwyn,2012-08-21 Drawing on a wealth of theoretical and empirical work Education in a Digital World tackles a number of pressing questions such as how are global trends in educational technology refracted through national policies and processes How exactly are educational technologies linked to issues of global economics and the fortunes of national and international economies To what extent are digital technologies implicated in the commercialisation marketization and commodification of education These questions and others are addressed throughout eight wide ranging chapters which consider topics such as the national policy strategies of countries across North and South America Europe and East Asia the educational technology portfolios of international organizations such as the United Nations and Microsoft as well as the role of education and technology in international development and the on going efforts to provide one laptop per child across low income regions and countries Through these examples Selwyn develops a detailed analysis of education technology and globalisation drawing together arguments and debates from various academic perspectives Written in a detailed but accessible manner this is an essential book for anyone wishing to gain a better understanding of the role of education and technology in contemporary globalised society   **Critical Perspectives on Technology and Education** Scott Bulfin,Nicola F. Johnson,Chris Bigum,2015-02-11 This book offers critical readings of issues in education and technology and demonstrates how researchers can use critical perspectives from sociology digital media cultural studies and other fields to broaden the ed tech research imagination open up new topics ask new questions develop theory and articulate an agenda for informed action   New Perspectives on Technology, Values, and Ethics Wenceslao J. Gonzalez,2015-10-08 This book focuses on a key issue today the role of values in technology with special emphasis on ethical values This topic involves the analysis of internal values in technology as they affect objectives processes

and outcomes and the study of external values in technology social cultural economic ecological etc These values internal and external are crucial to the decision making of engineers In addition they have increasing relevance for citizens concerned with the present and future state of technology which gives society a leading position in technological issues The book follows three main lines of research 1 new perspectives on technology values and ethics 2 rationality and responsibility in technology and 3 technology and risks This volume analyzes the two main sides involved here the theoretical basis for the role of values in technology and a practical discussion on how to implement them in our society Thus the book is of interest for philosophers engineers academics of different fields and policy makers The style used lends itself to broad audience

Technological Perspectives on Behavioral Change Michael Brian Schiffer,2022-08-30 Human societies have always been characterized by a dependence on artifacts from prehistoric stone tools to modern electronic devices Technology responds to and affects virtually all human behavior yet the interdependence of behavior and artifacts has never been studied intensively Archaeologist Schiffer now draws on his discipline s familiarity with artifacts and the processes of change they reveal to offer new insight into the study of behavioral change Drawing on case studies that deal with changes in architecture ceramics and electronic technology he emphasizes the central idea that the explanations of change must focus on the nexus of behavior and artifacts in the context of activities *Emerging Perspectives on Learning,teaching, and Technology* Michael Orey,2012-03-20 Emerging Perspectives on Learning Teaching and Technology **Perspectives on Technology** Nathan Rosenberg,1976-07-30 Some origins of American Technology The generation of new technologies Diffusion and adaptation of technology Natural resources environment and the growth of knowledge **Online Health Forums and Services: Benefits, Risks and Perspectives** Rita Mano,2021-02-22 The internet provides a major source of exchanging health information through online portals and new media Internet users can access health sites and online forums to obtain health information In turn these information sources act as a catalyst for wellbeing and improving personal health care behaviors and routines Competent health institutions encourage the development of these individual behaviors that enable individuals to increase health empowerment and to take responsibility for their own health needs diagnosis and treatment Online Health Forums and Services Benefits Risks and Perspectives is an investigation of the use of online health forums and services The author first introduces the reader to the theories that define online social behaviors in terms of health care services The chapters following this introduction attempt to account for the variations in online health care portal use and to what extent does social networking induce variations in health behaviors grounded in theory A summary of media used for affecting health behavior change is also provided along with a discussion of the socioeconomic attributes of the individuals most likely to be affected in terms of their health behaviors The book provides a comprehensive perspective that links the aspects of the micro level use of the Internet for health purposes accessing health related websites participation in health forums and networking sites to the macro level practices of telemedicine Readers will be able to understand the social and

health characteristics of the different groups of patients and estimate the extent to which individuals in need of health and medical information are taking advantage of the availability of information and communication platforms to improve their health or if they are being left behind This is a timely reference for healthcare professionals researchers and consultants involved in digital health care initiatives and public health administration who are seeking information about how access to online health information can influence lifestyles in a way that impacts human behavior in a positive meaningful way **New Perspectives on Neo-Kantianism and the Sciences** Helmut Pulte,Jan Baedke,Daniel Koenig,Gregor Nickel,2024-07-05 This volume considers the exchange between the Neo Kantian tradition in German philosophy and the sciences from the last third of the nineteenth century to the Great war and partly beyond During this period various scientific disciplines underwent modernisation processes characterised by an increasing empirical inclination and a decline in the influence of metaphysics the pluralisation of theories and the historical and pragmatic revitalisation of scientific claims against philosophy The various contributions look at the ways in which a certain Kantian orthodoxy was influenced by these new developments and whether and how itself had some impact on the development of the sciences The volume is not limited to the exact sciences of mathematics and physics which are particularly important for the Kantian tradition but also takes into account less recognised disciplines such as biology chemistry technology and psychology It is complemented by contributions that contrast Neo Kantianism with other scientific philosophies of the period in question Activity Theory Perspectives on Technology in Higher Education Murphy, Elizabeth,Rodríguez-Manzanares, María A.,2013-09-30 Activity Theory is a tool that can help make sense of the complex changes taking place in higher education because of the integration of technology Unlike other theories it allows for a focus that includes elements in the social cultural and historical setting in which the technology is used In addition it supports consideration of the practices of individual students and educators as well as practices at the institutional level Activity Theory Perspectives on Technology in Higher Education presents a compelling theory that will be useful for researchers academics policy makers administrators and instructors interested in understanding and controlling the shifts that are occurring in education due to the integration of technology **Innovation Management and New Product Development for Engineers, Volume I** Rob Dekkers,2018-08-31 Whereas innovation has become part of daily language in practice realizing new product and new service development is a complex and daunting task for engineers design engineering managers managers and those involved in other functions in organizations Most books on innovation management approach this topic from a managerial or economic perspective this text takes the actual design and engineering processes as starting point To this purpose it relates product design and engineering processes and their management to sources of innovation collaboration with suppliers and knowledge providers for example inventors and universities and users The managerial aspects get ample attention as well as the socioeconomic aspects in the context of product design and engineering For this wide range of topics the book provides both theoretical underpinning and practical

guidance Readers and students will benefit from this book by not only understanding the key mechanisms for innovation but also by the practical guidance it offers The author uses diagrams models methods and steps to guide readers to a better understanding of innovation projects This practical approach and the link to theory make the book valuable to practitioners as well as engineering students   New Perspectives in Technology Transfer Dana Mietzner,Christian Schultz,2021 This edited book presents research results that are relevant for scientists practitioners and policymakers who engage in knowledge and technology transfer from different perspectives Empirical and conceptual chapters present original approaches regarding the current practice and policies behind technology transfer By providing analyses at the macro meso and micro level the respective chapters demonstrate how technology is moving from various organizational contexts into new institutions and becoming a critical aspect for competitiveness   Education and Technology David W. Kritt,Lucien T. Winegar,2007-12-05 There are numerous publications about education and technology What is missing is a balanced appraisal of the values and cognitive skills technology promotes and those it devalues This is important for education because the way we teach influences how children think and it is of more general importance for the evolution of society If we wait until these issue are definitively resolved and have noticeable societal effects it will inevitably be too late Hence the need for informed debate now   **This Changes Everything – ICT and Climate Change: What Can We Do?** David Kreps,Charles Ess,Louise Leenen,Kai Kimppa,2018-09-10 This book constitutes the refereed proceedings of the 13th IFIP TC 9 International Conference on Human Choice and Computers HCC13 2018 held at the 24th IFIP World Computer Congress WCC 2018 in Poznan Poland in September 2018 The 29 revised full papers presented were carefully reviewed and selected from 48 submissions The papers are based on both academic research and the professional experience of information practitioners working in the field They deal with multiple challenges society will be facing in the future and are organized in the following topical sections history of computing this changed everything ICT4D and improvements of ICTs ICTs and sustainability gender ethical and legal considerations and philosophy   **Science, Technology, and Society** Todd L. Pittinsky,2019-11-21 This book gathers inter disciplinary and multi disciplinary perspectives on the effects that today s advances in science and technology have on issues ranging from government policy making to how we see the differences between men and women The chapters investigate how invention and innovation really take place how science differs from competing forms of knowledge and how science and technology could contribute more to the greater good of humanity For instance should there be legal restrictions on immoral inventions A key theme that runs throughout the book concerns who is taken into account at each stage and who is affected The amount of influence users have on technology development and how non users are factored in are evaluated as the impact of scientific and technological progression on society is investigated including politics economy family life and ethics   **Key Concepts in Organization Theory** Ann L Cunliffe,John T Luhman,2012-08-16 From agency theory to power and politics this indispensable guide to the key concepts of organization theory is your compass as

you navigate through the often complex and abstract theories about the design and functioning of organizations Designed to complement and elucidate your textbook or reading list as well as introduce you to concepts that some courses neglect this historical and interdisciplinary account of the field Helps you understand the basics of organization theory Allows you to check your understanding of specific concepts Fills in any gaps left by your course reading and Is a powerful revision tool Each entry is consistently structured providing a definition of the concept and why it s important to theory and practice followed by a summary of current debates and a list of further reading This companion will provide you with the nuts and bolts of an understanding that will serve you not just in your organization studies course but throughout your degree and beyond Key concepts include agency theory business strategy corporate governance decision making environmental uncertainty globalization industrial democracy organizational change stakeholder theory storytelling and narrative research technology and organization structure **Organization Theory** Ulla Eriksson-Zetterquist,Tomas Müllern,Alexander Styhre,2011-03-24 This new text takes a unique practice based approach identifying questions problems and issues that are perceived as pertinent by practitioners and using these as the starting point to identify the relevant theories *Technology and Cultural Values* Peter D. Hershock,Marietta Stepaniants,Roger T. Ames,2003-10-31 Recent history makes clear that the quantum leaps being made in technology are the leading edge of a groundswell of paradigm shifts taking place in science politics economics social institutions and the expression of cultural values Indeed it is the simultaneity and interdependence of these changes occurring in every dimension of human experience and endeavor that makes the present so historically distinctive The essays gathered here give voice to perspectives on the always improvised relationship between technology and cultural values from Africa the Americas Asia Australia Europe and the Pacific Contributors Syed Muhammad Naquib Al Attas Roger T Ames Yoko Arisaka Carl Becker Francesca Bray James Buchanan Arindam Chakrabarti Frank W Derringh Rolf Elberfeld Charles Ess Andrew Feenberg Susantha Goonatilake H Jiuan Heng Peter Hershock Thomas P Kasulis George Khushf David Farrell Krell Joel J Kupperman William R LaFleur Lois Ann Lorentzen David Loy Joseph Margolis Hans Georg M ller Robert Cummings Neville Peimin Ni Monica Atieno Opole Kuruvilla Pandikattu SJ Helen Petrovsky Ramon Sentmart Kristin Shrader Frechette Vasanthi Srinivasan Marietta Stepaniants Vyacheslav S Stiopin Henk ten Have Paul B Thompson Mary Tiles David B Wong
