**Coastal Ecosystems of the Tropics - Adaptive Management** Velmurugan Ayyam, Swarnam Palanivel, Sivaperuman Chandrakasan, 2019-10-11

The coastal areas of the tropics are rich in biodiversity natural resources and place of intensive developmental activities as it provides livelihood to millions of people At the same time evidences suggest that several unique coastal ecosystems viz mangroves wetlands salt marshes corals estuaries sand dunes and agro ecosystem are vulnerable to natural disasters and events associated with global climate change In recent times degradation of land water and genetic erosion besides threat to native flora and fauna have been increasing due to unsustainable developmental activities Therefore a paradigm shift in deriving livelihood through conventional methods developmental strategies conservation practices are required for balanced and sustainable growth of the coastal areas This publication strives to cover the status of different natural resources of the coastal region various aspects of degradation process production need and restorative methods besides new technological options and its socio economic implications with case examples Special focus is given to bring out the scope and potential of mangrove based farming integrated and organic farming and its value addition besides the role of coastal vegetations as bioshield in protecting these regions from sea erosion cyclones and tsunami As the tropical coastal areas are vulnerable to climate change events this book also covers the recent weather pattern impacts of climate change and climate resilient technologies besides intuitional linkages and policy framework aimed at balancing development and environmental concerns

Electrochemistry Craig Banks, 2024-11-27 Providing the reader with an up to date digest of the most important current research carried out in the field this volume is compiled and written by leading experts This volume reviews the trends in electrochemical sensing and its application and touches on research areas from a diverse range including electrochemical detection of infectious pathogens hybrid materials for electrocatalysis and photoelectrocatalysis chip fabrication from an electrochemical perspective and exploring forensic mysteries with electrochemical sensors to name just a few Coverage is extensive and will appeal to a broad readership from chemists and biochemists to engineers and materials scientists The reviews of established and current interest in the field make this volume a key reference for researchers in this exciting and developing area

*Fundamentals of Ecotoxicology* Michael C. Newman, 2014-12-16 An integrated analysis exploring current and relevant concepts *Fundamentals of Ecotoxicology The Science of Pollution* Fourth Edition extends the dialogue further

from the previous editions and beyond conventional ecosystems It explores landscape regional and biospheric topics communicating core concepts with subjects ranging from molecular t      Microbial and Biotechnological Interventions in Bioremediation and Phytoremediation Junaid Ahmad Malik,2022-08-20 The introduction of contaminants due to rapid urbanisation and anthropogenic activities into the environment causes unsteadiness distress to the physico chemical systems including living organisms which possibly is threatening the dynamics of nature as well as the soil biology by producing certain xenobiotics Hence there is an immediate global demand for the diminution of such contaminants and xenobiotics which can otherwise adversely affect the living organisms Some toxic xenobiotics include synthetic organochlorides such as polycyclic aromatic hydrocarbons PAHs and some fractions of crude oil and coal The advancements in microbiology and biotechnology has lead to the launch of microbial biotechnology as a separate area of research and contributed dramatically to the development of the areas like agriculture environment biopharmaceutics fermented foods etc The evolution of new metabolic pathways from natural metabolic cycles has enabled the microorganisms to degrade almost all different complex and resistant xenobiotics found on Earth Hence microbes stand an imperative efficient green and economical alternative to conventional treatment technologies This book comprises chapters dealing with various bioremediation strategies with the help of different groups of microorganisms along with detailed graphical diagrammatical representations It also focuses on the use of microbial biotechnology and highlights the recent developments in microbial biotechnology in the area of agriculture and environment Furthermore it contains a detailed comprehensive account for the microbial treatment technologies from unsustainable to sustainable which includes chapters prepared by professionals several researchers scientists graduate students and postdoctoral fellows across the world with expertise in environmental microbiology biotechnology bioremediation and environmental engineering The research presented also highlights some of the significantly important microbial species involved in remediation the physiology biochemistry and the mechanisms of remediation by various microbes and suggestions for future improvement of bioremediation technology This book would serve as a quick reference book for graduate and postgraduate students pursuing their study in any branch of life sciences microbiology health sciences and environmental biotechnology as well as researchers and scientists working in laboratories and industries involved in research related to microbiology environmental biotechnology and allied researches

*Misreading the Bengal Delta* Camelia Dewan,2021-11-01 An unexpected story of climate change initiatives that threaten a complex waterscape Perilously close to sea level and vulnerable to floods erosion and cyclones Bangladesh is one of the top recipients of development aid earmarked for climate change adaptation Yet to what extent do adaptation projects address local needs and concerns Combining environmental history and ethnographic fieldwork with development professionals rural farmers and landless women *Misreading the Bengal Delta* critiques development narratives of Bangladesh as a climate change victim It examines how development actors repackage colonial era modernizing projects which have caused severe

environmental effects as climate adaptation solutions Seawalls meant to mitigate against cyclones and rising sea levels instead silt up waterways and induce drainage related flooding Other adaptation projects from saline aquaculture to high yield agriculture threaten soil fertility biodiversity and livelihoods Bangladesh s environmental crisis goes beyond climate change extending to coastal vulnerabilities that are entwined with underemployment debt and the lack of universal healthcare This timely book analyzes how development actors create flawed causal narratives linking their interventions in the environment and society of the Global South to climate change Ultimately such misreadings risk exacerbating climatic threats and structural inequalities

**Agrochemicals Detection, Treatment and Remediation** Majeti Narasimha Vara Prasad, 2020-02-18 Agrochemicals Detection Treatment and Remediation focuses on the latest research surrounding the detection and remediation of a new generation of agrochemical contaminants The book defines the occurrence sources types and effects of agrochemicals including herbicides insecticides fungicides and soil fumigants in the environment The book covers both advanced physical and chemical methods for the abatement of these emerging contaminants in environmental media Environmental Engineers and Researchers will find this to be a valuable reference on advanced processes for resource recovery including nanotechnology for the recovery of phosphate from fertilizer industry wastewater Provides the latest physical and chemical methods used for the abatement of chemical fertilizers and pesticides Covers genetically engineered microbes for the remediation of a wide range of agrochemicals Presents methods for determining the occurrence sources types and effects of agrochemical on environmental media Includes unique case studies from across the globe

**Integrated Pest Management** David Pimentel, Rajinder Peshin, 2014-04-10 The book deals with the present state and problems of integrated pest management as relating to stakeholder acceptance of IPM and how integrated pest management can become a sustainable practice The discussions include using less pesticides and the possibility of eliminating pesticides from agricultural practice

*Developing Sustainable Agriculture in Pakistan* Iqrar Ahmad Khan, Muhammad Sarwar Khan, 2018-04-17 Agriculture plays a pivotal role in the economy and development of Pakistan providing food to consumers raw materials to industries and a market for industrial goods Unfortunately agricultural production is stagnant due to several barriers including a fixed cropping pattern reliance on a few major crops a narrow genetic pool poor seed quality and a changing climate In addition the high cost of production weak phytosanitary compliance mechanisms and a lack of cold chain facilities makes Pakistan agriculturally uncompetitive in export markets Despite all these issues agriculture is the primary industry in Pakistan and small farmers continue to dominate the business Small farmers grow crops for subsistence under a fixed cropping pattern and a holistic approach is required to develop agriculture to improve the livelihoods of the rural populace This book presents an exhaustive look at agriculture in Pakistan Chapters provide critical analyses of present trends inadequacies in agriculture strategic planning improvement programs and policies while keeping in view the natural resources plant and animal related agricultural production technologies input supplies population planning migration and

Tropical Marine Ecology Daniel M. Alongi,2021-12-13 No realm on Earth elicits thoughts of paradise more than the tropics The tropical marine realm is special in myriad ways and for many reasons from seas of higher latitude in housing iconic habitats such as coral reefs snow white beaches crystal clear waters mangrove forests extensive and rich seagrass meadows and expansive river deltas such as the exemplar the Amazon But the tropics also has an even more complex side tropical waters give rise to cyclones hurricanes and typhoons and unique oceanographic phenomena including the El Ni o Southern Oscillation which affects global climate patterns Tropical Marine Ecology documents the structure and function of tropical marine populations communities and ecosystems in relation to environmental factors including climate patterns and climate change and patterns of oceanographic phenomena such as tides and currents and major oceanographic features as well as chemical and geological drivers The book focuses on estuarine coastal continental shelf and open ocean ecosystems The first part of the book deals with the climate physics geology and chemistry of the tropical marine environment The second section focuses on the origins diversity biogeography and the structure and distribution of tropical biota The third part explores the rates and patterns of primary and secondary production and their drivers and the characteristics of pelagic

and benthic food webs The fourth part examines how humans are altering tropical ecosystems via unsustainable fisheries the decline and loss of habitat and fragmentation Further pollution is altering an earth already in the throes of climate change Tropical Marine Ecology is an authoritative and comprehensive introduction to tropical marine ecology for advanced undergraduate and postgraduate students It is also a rich resource and reference work for researchers and professional managers in marine science

One Health Implications of Agrochemicals and their Sustainable Alternatives Matthew Chidozie Ogwu, Sylvester Chibueze Izah, 2023-09-03 This book focuses on the United Nations SDG 3 SDG 12 and SDG 15 The book covers the full range of issues associated with agrochemical use from a One Health standpoint to promote a cleaner and safer alternative that leaves little to no negative legacy on Earth's natural social and economic systems The main focus of the book is to address the biodiversity and human health food security and socio environmental implications of agrochemical use in food production It deals with the need to move away from the use of harmful chemicals in agriculture The threat to key aspects of One Health will be used as evidence in support of the need to transition to safer and cleaner food production systems as well as the social economic health and environmental viability of sustainable alternatives One Health is the innovative convergence approach that encourages collaborative cross sectoral and transdisciplinary methods to monitor assess report and implement shared human health biodiversity and environmental challenges and goals such as agrochemical use Conventional agrochemicals are chemicals used to protect plants improve crop yield and manage agricultural fields but also have a negative legacy on Earth's systems This book is of interest and useful to agricultural trainees and trainers soil food and agricultural institutes food and soil systems specialists biodiversity and environmental managers activists practitioners and students It is also a useful read for conservationists and industries interested in promoting organic agriculture for a sustainable community regional and global development

**Organic Micropollutants in Aquatic and Terrestrial Environments** Rahul Bhadouria, Sachchidanand Tripathi, Pardeep Singh, Rishikesh Singh, Harminder Pal Singh, 2024-02-27 This book offers a comprehensive overview of the origins occurrences and remediation strategies for organic micropollutants in the environment Divided into five parts the book starts with a perspective on the sources and prevalence of organic micropollutants in our world including aquatic ecosystems and urban soils followed by an examination of the effects of these contaminants on health agriculture and the environment In the third and fourth parts of the book readers will learn more about the analysis and detection of organic micropollutants and treatment and remediation strategies respectively The book closes with an overview of policies and regulatory measures and critiques the fate of organic micropollutants in the aquatic environment In this book particular attention is given to topics such as the intricate relationship between micropollutants the environment and human health sustainable management treatment methods and remediation for micropollutants in wastewater urban water systems freshwaters urban soils and agriculture ecotoxicity analysis and innovative bioremediation approaches Readers will also find a valuable discussion of the current contamination

status of aquatic ecosystems by pharmaceutical and personal care micropollutants the latest methodologies for analysing organic micropollutants and a case study on the biodegradation pathways of hexachlorocyclohexane HCH Given its breadth this book is a useful resource for scientists researchers policymakers and anyone concerned about the ecological and human health impacts of organic micropollutants      **Environmental Health Risk** Marcelo Larramendy, Sonia

Soloneski, 2016-06-16 This book Environmental Health Risk Hazardous Factors to Living Species is intended to provide a set of practical discussions and relevant tools for making risky decisions that require actions to reduce environmental health risk against environmental factors that may adversely impact human health or ecological balances We aimed to compile information from diverse sources into a single volume to give some real examples extending concepts of those hazardous factors to living species that may stimulate new research ideas and trends in the relevant fields      Biodiversity in Africa: Potentials, Threats and Conservation

Sylvester Chibueze Izah, 2022-08-27 This edited work brings out a comprehensive collection of information on Potentials Threats and Conservation of Biodiversity in Africa The main focus of this book is to address the sustainability of Biodiversity of Africa Biodiversity are organisms that typically have life and possess the characteristics of living things The biodiversity is being affected by human activities as well as natural effects This in turn is affecting the uses of biodiversity which are mainly food and medicine Therefore it will be useful to point possible means of conserving biodiversity of African so as to enhance the sustainability of their uses especially in Africa This book is of interest and useful to biodiversity experts policy makers conservationists and industries interested in biodiversity conservation of native flora and fauna in the area It will also be useful to environmental and agricultural scientists foresters horticulturists ecologists and valuable source of reference to the relevant researchers and students undergraduate and Post graduate in the region
