Pests Of Stored Foodstuffs And Their Control:

Pests of Stored Foodstuffs and Their Control Dennis S. Hill, 2002-09-30 This textbook gives a broad overview of pests of human foodstuffs held in storage The work contains a large amount of illustrations which make the mentioned larger species easier for recognition The text is greatly expanded and is orientated to the food industry which makes it unlike many other textbooks a one of a kind in its subject area The book is mainly intended for B Sc and M Sc Food Science students and staff and related courses as well as for Environmental Health Officers

Pests of Stored Products and Their Control Dennis S. Hill, 1990

Pests of Stored Foodstuffs and their Control Dennis S. Hill, 2007-05-08 This book is intended to serve as an introduction to the pests of stored foodstuffs of all types on a worldwide basis and as a broad reference text It is aimed at being complementary to the more detailed and more specific texts that are listed in the References It does presuppose an adequate basic knowledge of entomology and zoology in the user The stored products mentioned in the text are commercial products in the widest sense including all types of plant and animal materials in addition to grain and prepared foodstuffs Storage is viewed very broadly from one day on a shelf to several years in a silo or refrigerated store at 20 C In many publications the produce surveyed has been restricted to stored grains because of their obvious importance to human society and because of the great quantities involved For many different materials of both plant and animal origin there is a shortage of specific information but it is to be hoped that this situation will gradually be rectified It should be clearly understood that any reference to animal pests is made in the strict zoological sense and refers to any members of the Kingdom Animalia There is a regrettable tendency in some circles to use the term animal as being synonymous with mammal a habit to be deplored There is definite emphasis on animal pests in this text but micro organisms are included where relevant

Pests of Stored Products and Their Control Dave Hill, Dennis S. Hill, 1990-07 The objective of this book is to describe approximately 90 major international insects and other pests that infest stored agricultural products After a short introductory section that considers post harvest crop losses the types of damage done by pests the nature of storage structures pest types and their general systematics and biology each pest is considered within the same framework for ease of reference and comparison Distribution biology type of damage and control are all considered and an original line drawing of each pest is provided Emphasis is laid on the simplest cheapest and most effective methods of integrated pest control The book is mainly concerned with insect pests but it also discusses arachnids spiders and mites birds mammals and fungi Appendices list the pesticides used in stored products control and list the plants with natural anti pest immunity It may be useful for anyone concerned with minimising pest related crop losses
