

Pet in oncology clinical trials

- Positron Emission Tomography (PET) is a crucial imaging tool in oncology clinical trials, providing detailed insights into tumor metabolism and behavior
- It helps in assessing the efficacy of new cancer treatments by measuring changes in metabolic activity
- PET scans are non-invasive and can detect early responses to therapy, aiding in personalized treatment plans
- The technology's ability to track cancer progression and response improves trial outcomes and patient management

Practical example: Medical imaging

- Positron Emission Tomography (PET) is a powerful tool in oncology clinical trials, primarily used in medical imaging to observe metabolic processes in the body
- In this context, PET scans help assess the effectiveness of cancer therapies by providing detailed images of tumor metabolism and activity
- By tracking the absorption of a radioactive tracer, typically glucose, doctors can identify areas of high metabolic activity, indicative of cancer cells
- This application of PET scans greatly aids in the diagnosis, staging, and monitoring of treatment responses in cancer patients

Bender,H. Palmedo,H.-J. Biersack,P.E. Valk,2012-12-06 Clinical studies during the past 10 years have shown that PET is more sensitive than CT and MRI for the detection of many tumors In many cases however for example in head and neck tumors combination with radiological procedures is necessary It may be speculated that PET should be the first study in a malignant tumor when metastatic spread is suspected MRI and CT may then be restricted to those body areas which evince sites of increased glucose metabolism Thus a combination of metabolic and morphologic procedures will enhance tumor detection and change the therapeutic strategy In this light an atlas including PET CT MRI and histology data seems desirable to combine metabolic and morphologic imaging This book presents an overview of the available data which should be of great interest not only for specialists in radiology and nuclear medicine but also for oncologists *Imaging in Clinical Oncology* Athanasios D.
