Peter Browne Provost Bishop Metaphysician:

Peter Browne Arthur R. Winnett,1974 *Berkeley's Philosophy of Spirit* Talia Mae Bettcher,2007-06-23 Provides a new interpretation of Berkeley's conception of spirit and its link with self consciousness as a way into his immaterialist metaphysics Along the way it sheds new light on Descartes's cogito and Hume's bundle theory of the self **A New Anatomy of Ireland** Toby Christopher Barnard,2004-01-01 What was life like for Irish Protestants between the mid 17th and the late 18th centuries Toby Barnard scrutinizes social attitudes and structures in every segment of Protestant society during this formative period John Locke and the Eighteenth-Century Divines Alan P.F. Sell,2006-09-01 Where Christian apologetics are concerned is Locke to be endorsed repaired modified or forsaken The diverse answers given to this question by the eighteenth century divines form the complex subject of this book which offers the first detailed account of his influence upon the religious thinkers of the eighteenth century The work is based upon a thorough search of relevant materials many of them scarce and widely dispersed But the question is still relevant three centuries after Locke's death and Professor Sell's objective in this volume is not only historical From this study of the reception of Locke by the divines there emerge pressing questions about method reason faith revelation and authority which need to be addressed by those who would attempt Christian apologetics as Christianity's third millennium approaches Although this book stands in its own right it can also be read as a companion volume to the author's *Philosophical Idealism and Christian Belief* University of Wales Press 1995 Together the two books represent soundings taken in important Enlightenment and post Enlightenment intellectual traditions The question whether an apologetic method may be found which avoids the pitfalls exposed both by the examination of Locke and the idealists and which circumvents latter day embargoes upon Christian apologetics will be addressed in a third and final volume *The Skeptical Tradition Around 1800* J. van der Zande,R.H. Popkin,2013-03-14 In the early 1980s the late Charles B Schmitt and I discussed the fact that so much new research and new interpretations were taking place concerning various areas of modern skepticism that we as pioneers ought to organize a conference where these new findings and outlooks could be presented and discussed Charles and I had both visited the great library at Wolfenbüttel and were most happy when the Herzog August Bibliothek agreed to host the first conference on the history of skepticism in 1984 published as *Skepticism from the Renaissance to the Enlightenment* ed R H Popkin and Charles B Schmitt Wiesbaden 1987 Wolfenbütteler Forschungen vol 35 Charles and I projected a series of later conferences the first of which would deal with skepticism and irreligion in the seventeenth and eighteenth centuries Unfortunately however Charles died suddenly in 1986 while lecturing in Padua Subsequent to his death Constance Blackwell his companion of many years established the Foundation for Intellectual History to support research and publication on topics in the history of ideas that continued Schmitt's interests One of the first ventures was to arrange and fund the already planned conference on skepticism and irreligion in the seventeenth and eighteenth centuries After many difficulties and problems the conference was sponsored

and funded by the Foundation for Intellectual History one of its first public activities It was held at the lovely facilities of the Netherlands Institute for Advanced Studies in Wassenaar in 1990 **Evangelicalism in Modern Britain** David W. Bebbington, 2003-09-02 This major textbook is a newly researched historical study of Evangelical religion in its British cultural setting from its inception in the time of John Wesley to charismatic renewal today The Church of England the Church of Scotland and the variety of Nonconformist denominations and sects in England Scotland and Wales are discussed but the book concentrates on the broad patterns of change affecting all the churches It shows the great impact of the Evangelical movement on nineteenth century Britain accounts for its resurgence since the Second World War and argues that developments in the ideas and attitudes of the movement were shaped most by changes in British culture The contemporary interest in the phenomenon of Fundamentalism especially in the United States makes the book especially timely

Recovering Bishop Berkeley S. Breuninger, 2010-04-26 Through a close analysis of key texts and the larger historical contexts within which they were composed this study explores George Berkeley's engagement with the social and economic threats facing Ireland and Britain highlighting his belief that virtue and religion could play crucial roles in alleviating these problems **Molyneux's Question and the History of Philosophy** Gabriele Ferretti, Brian Glenney, 2020-09-15 In 1688 the Irish scientist and politician William Molyneux sent a letter to the philosopher John Locke In it he asked him a question could someone who was born blind and able to distinguish a globe and a cube by touch be able to immediately distinguish and name these shapes by sight if given the ability to see The philosophical puzzle offered in Molyneux's letter fascinated not only Locke but major thinkers such as Leibniz Berkeley Diderot Reid and numerous others including psychologists and cognitive scientists today Does such a question represent a philosophical puzzle or a problem that can be solved by experimental tests Can vision be fully restored after blindness What is the relation between vision and touch Are the senses linked through learning or bound at birth Molyneux's Question and the History of Philosophy is a major collection of essays that explore the long standing issues Molyneux's problem presents to philosophy of mind perception and the senses In addition the volume considers the question from an interdisciplinary angle examines the pre history of the question and aspects of it that have been ignored such as perspectives from religion and disability As such Molyneux's Question and the History of Philosophy presents a set of philosophically rich empirically informed and scientifically rigorous original investigations into this famous puzzle It will be of great interest to students and researchers in philosophy psychology and the cognitive sciences including neuroscience neurobiology and ophthalmology as well as those studying the mind perception and the senses *Enlightenment Reformation* Derya Gürses Tarbuck, 2016-11-18 Towards moderation 6 From moderation to assimilation 1777 1806 Last men standing The Hutchinsonian reputation in the late eighteenth and nineteenth centuries Conclusion Appendix Bibliography Index *Berkeley's Philosophy of Mathematics* Douglas M. Jesseph, 2010-12-15 In this first modern critical assessment of the place of mathematics in Berkeley's philosophy and Berkeley's place in the history of

mathematics Douglas M Jesseph provides a bold reinterpretation of Berkeley's work Jesseph challenges the prevailing view that Berkeley's mathematical writings are peripheral to his philosophy and argues that mathematics is in fact central to his thought developing out of his critique of abstraction Jesseph's argument situates Berkeley's ideas within the larger historical and intellectual context of the Scientific Revolution Jesseph begins with Berkeley's radical opposition to the received view of mathematics in the philosophy of the late seventeenth and early eighteenth centuries when mathematics was considered a science of abstractions Since this view seriously conflicted with Berkeley's critique of abstract ideas Jesseph contends that he was forced to come up with a nonabstract philosophy of mathematics Jesseph examines Berkeley's unique treatments of geometry and arithmetic and his famous critique of the calculus in *The Analyst* By putting Berkeley's mathematical writings in the perspective of his larger philosophical project and examining their impact on eighteenth century British mathematics Jesseph makes a major contribution to philosophy and to the history and philosophy of science

Religion, Law, and Power : The Making of Protestant Ireland 1660-1760 S. J. Connolly, 1992-07-02 This is a study of religion politics and society in a period of great significance in modern Irish history The late seventeenth and early eighteenth centuries saw the consolidation of the power of the Protestant landed class the enactment of penal laws against Catholics and constitutional conflicts that forced Irish Protestants to redefine their ideas of national identity S J Connolly's scholarly and wide ranging study examines these developments and sets them in their historical context The Ireland that emerges from his lucid and penetrating analysis was essentially a part of ancien r eacute gime Europe a pre industrialized society in which social order depended less on a ramshackle apparatus of coercion than on complex structures of deference and mutual accommodation along with the absence of credible challengers to the dominance of a landed eacute lite in which the ties of patronage and clientship were often more important than horizontal bonds of shared economic or social position and in which religion remained a central part of personal and political motivation

Edmund Burke Iain Hampsher-Monk, 2017-03-02 Edmund

Burke's iconic stance against the French Revolution and its supposed Enlightenment inspiration has ensured his central role in debates about the nature of modernity and freedom. It has now been rendered even more complex by post-modern radicalism's repudiation of the Enlightenment as repressive and its reason as illusory. Not only did Burke's own work cover a huge range from aesthetics through history to constitutional politics and political theory, it has generated an enormous literature drawing on many disciplines as well as continuing to be recruited in a range of contemporary polemics. In *Edmund Burke* Iain Hampsher-Monk presents a representative selection of articles and essays from the last 50 years of this scholarship. His introduction provides a brief biography and seeks to guide the reader through the chosen pieces as well as indicating its relationship to other and more substantial studies that form the critical heritage of this major figure.

Scripture, Skepticism, and the Character of God Dane Neufeld, 2019-07-11 During a period of great religious upheaval Anglican philosopher and ecclesiastic Henry Longueville Mansel (1820-1871) became famous for his 1858 Bampton Lectures which sought to defend traditional faith by employing a skeptical philosophy. Understanding Mansel and the passionate debate that surrounded his career provides insight into the current struggle for ancient religions to articulate their traditions in a modern world. In *Scripture, Skepticism, and the Character of God* Dane Neufeld explores the life and thought of the now forgotten nineteenth-century theologian. Examining the ideological differences between this philosopher and his contemporaries, Neufeld makes a case for the coherence of Mansel's position and traces the vestiges of his thought through the generations that followed him. Mansel found himself at the centre of an explosive debate concerning the Christian scriptures and the moral character of the God they described. Though the rise of science is often credited with provoking a crisis of doubt, shifting ideas about humanity and God were just as central to the spiritual unrest of the nineteenth century. Mansel's central argument that the entire Bible must be read as a unified witness to the reality of God provoked disagreement among theologians, churchmen, and free thinkers alike who were uncomfortable with certain aspects of the scriptural portrayal of God's activity and character. Mansel's attempt to reconcile theological skepticism with scripturalism was misunderstood. He was branded a hopeless fideist by the free thinkers and a dangerous skeptic by high-broad and evangelical churchmen alike. Many of the controversies in contemporary Christianity concern the collision between modern morality and biblical renderings of God. Neufeld argues that Henry Mansel, while a deeply polarizing figure, brought clarity and precision to this debate by exposing what was at stake for Christian belief and biblical interpretation in the Victorian period.

Language and the Structure of Berkeley's World Kenneth L. Pearce, 2017-03-16 According to George Berkeley (1685-1753) there is fundamentally nothing in the world but minds and their ideas. Ideas are understood as pure phenomenal feels which are momentarily had by a single perceiver, then vanish. Surprisingly, Berkeley tries to sell this idealistic philosophical system as a defense of common sense and an aid to science. However, both common sense and Newtonian science take the perceived world to be highly structured in a way that Berkeley's system does not appear to allow.

Kenneth L Pearce argues that Berkeley's solution to this problem lies in his innovative philosophy of language. The solution works at two levels. At the first level it is by means of our conventions for the use of physical object talk that we impose structure on the world. At a deeper level the orderliness of the world is explained by the fact that according to Berkeley the world itself is a discourse spoken by God: the world is literally an object of linguistic interpretation. The structure that our physical object talk in common sense and in Newtonian physics aims to capture is the grammatical structure of this divine discourse. This approach yields surprising consequences for some of the most discussed issues in Berkeley's metaphysics. Most notably it is argued that in Berkeley's view physical objects are neither ideas nor collections of ideas. Rather physical objects like forces are mere quasi-entities brought into being by our linguistic practices.

Conscience, Consciousness and Ethics in Joseph Butler's Philosophy and Ministry Bob Tennant, 2011. Offers a new interpretation of Butler's theology and suggests that exploration of his methods may contribute to modern thinking about ethics, language, the Church, as well as religion and science. Joseph Butler (1692-1752) is perhaps Britain's most powerful and original moral philosopher. He exercised a profound influence over the contemporary Protestant Churches, the English moralists and the Scottish philosophical school, but his theory of the affections grounded in Newtonian metaphysics and presenting an account of human psychology also set the terms of engagement with questions of education, slavery, missions and even labour relations. In the nineteenth-century English-speaking world he was an authority of first resort for Evangelicals, Tractarians, philosophers, scientists, psychologists, economists, sociologists, lawyers and educationalists alike. He remains a key reference point for modern American and British philosophers from Broad to Rawls and beyond. Many analyses of Butler, however, have been distorted by aggressively secular readings. This book is based on a comprehensive reassessment of his published work and the surviving manuscripts and archival materials. These are set within an account of his spiritual and intellectual development and his ministerial vocation from the protracted and painful process of conforming to the Church of England to his initial observations on a social philosophy. Demonstrating that even *The Analogy* originated in liturgical preaching, this book offers a refreshed and detailed account of Butler's key terms: conscience, consciousness, identity, affections, charity, analogy, probability, tendency and suggests that exploration of his methods may contribute to modern thinking about ethics, language, the role of the Church and the religion and science debates.

BOB TENNANT taught English Literature at the University of Sussex, spent many years as a senior manager in adult education and was a trade union and political activist serving leading organisations at local, regional and national levels. He has written on political, economic and trade union matters for many newspapers and periodicals and is a founder of The British Pulpit Online, seeking to create an online catalogue and database of all printed British sermons from 1660 to 1901.

History of Scholarship Christopher Ligota, Jean-Louis Quantin, 2006-04-06. The history of scholarship has undergone a complete renewal in recent years and is now a major branch of research with vast territories to explore. A substantial introduction to *History of Scholarship* surveys the past vicissitudes of the history of scholarship and

its current expansion The authors all specialists of international standing come from a variety of backgrounds classical studies history of religions philosophy early modern intellectual and religious history Their papers illustrate a variety of themes and approaches including Renaissance antiquarianism and philology the rise of the notion of criticism Biblical and patristic scholarship and its implications for both confessional orthodoxy and eighteenth century free thought the history of philosophy and German historiographical thought in both the eighteenth and the nineteenth centuries This challenging volume constitutes a collection of remarkable quality helping to establish the history of scholarship as a more broadly acknowledged worthwhile field of study in its own right
