

The Context for Urban Innovation Strategies: Opportunities, Challenges, Paradoxes and Puzzles

- Innovation features: newness; improvement; overcoming of uncertainty
- Edward Glaeser, 2011, *Triumph of the City*
- Cities as hubs of innovation → knowledge spillovers and/or transparency and competition
- Cities as testbeds for new technologies – traffic, mobility solutions, health services, public service provision Cities also provide opportunities for governance experimentation → radical local government: “Political Petri Dishes”, *The Economist*, 22.09.2012
- Urban innovation strategies for city productivity and wellbeing → corporate and science advocates
- Innovation challenge-led strategies are much more difficult in difficult urban contexts

Puzzles and Paradoxes in Economics Mark Skousen, Kenna C. Taylor, 1997-05-15 Economics is full of puzzles and paradoxes that often frustrate and challenge everyone including economists This engaging book includes fifty puzzles and focuses on three types of paradox First everyday observations that appear to belie common sense such as why some supermarket items sell for more per ounce in larger sizes Secondly those paradoxes which have perplexed economists in the past but have since been fairly resolved such as the diamond water paradox Finally empirical or conceptual anomalies that remain unresolved and present a challenge to today's economists such as the voting paradox

Puzzle and Paradox Mireille Razafindrakoto, François Roubaud, Jean-Michel Wachsberger, 2020-02-06 Analyses the economic and political history of Madagascar from independence to the early twenty first century

The Paradox of Mass Politics W. Russell Neuman, 1986 A central current in the history of democratic politics is the tensions between the political culture of an informed citizenry and the potentially antidemocratic impulses of the larger mass of individuals who are only marginally involved in the political world Given the public's low level of political interest and knowledge it is paradoxical that the democratic system works at all In *The Paradox of Mass Politics* W Russell Neuman analyzes the major election surveys in the United States for the period 1948 1980 and develops for each a central index of political sophistication based on measures of political interest knowledge and style of political conceptualization Taking a fresh look at the dramatic findings of public apathy and ignorance he probes

the process by which citizens acquire political knowledge and the impact of their knowledge on voting behavior The book challenges the commonly held view that politically oriented college educated individuals have a sophisticated grasp of the fundamental political issues of the day and do not rely heavily on vague political symbolism and party identification in their electoral calculus In their expression of political opinions and in the stability and coherence of those opinions over time the more knowledgeable half of the population Neuman concludes is almost indistinguishable from the other half This is in effect a second paradox closely related to the first In an attempt to resolve a major and persisting paradox of political theory Neuman develops a model of three publics which more accurately portrays the distribution of political knowledge and behavior in the mass population He identifies a stratum of apoliticals a large middle mass and a politically sophisticated elite The elite is so small less than 5 percent that the beliefs and behavior of its member are lost in the large random samples of national election surveys but so active and articulate that its views are often equated with public opinion at large by the powers in Washington The key to the paradox of mass politics is the activity of this tiny stratum of persons who follow political issues with care and expertise This book is essential reading for concerned students of American politics sociology public opinion and mass communication *Jigsaw Puzzle Politics in the Sunshine State* Seth C. McKee, 2015-08-11 As a bellwether state Florida's experiences with redistricting in 2012 highlight issues debates and disputes of nationwide interest In this collection Seth McKee gathers essays from distinguished contributors to assess recurring problems in Florida's redistricting as well as new controversies **Emergency Politics** Bonnie Honig, 2011-08-28 A more democratic response to political emergencies This book intervenes in contemporary debates about the threat posed to democratic life by political emergencies Must emergency necessarily enhance and centralize top down forms of sovereignty Those who oppose executive branch enhancement often turn instead to law insisting on the sovereignty of the rule of law or demanding that law rather than force be used to resolve conflicts with enemies But are these the only options Or are there more democratic ways to respond to invocations of emergency politics Looking at how emergencies in the past and present have shaped the development of democracy Bonnie Honig argues that democracies must resist emergency's pull to focus on life's necessities food security and bare essentials because these tend to privatize and isolate citizens rather than bring us together on behalf of hopeful futures Emphasizing the connections between mere life and more life emergence and emergency Honig argues that emergencies call us to attend anew to a neglected paradox of democratic politics that we need good citizens with aspirational ideals to make good politics while we need good politics to infuse citizens with idealism Honig takes a broad approach to emergency considering immigration politics new rights claims contemporary food politics and the infrastructure of consumption and the limits of law during the Red Scare of the early twentieth century Taking its bearings from Moses Mendelssohn Franz Rosenzweig and other Jewish thinkers this is a major contribution to modern thought about the challenges and risks of democratic orientation and action in response to emergency *The Puzzle of the American Economy*

Mark A. Pisano, 2017-03-09 Exploring how sweeping demographic changes have resulted in the ineffectiveness of recent monetary and fiscal policies this book identifies corrective actions that will start to reverse the trends of low economic growth and widespread government deficits The field of demographics does not focus on the economic impacts and the funding issues resulting from demographic change Similarly economics does not take into account demographic changes The omissions in both fields are negatively impacting the nation income reductions caused by demographic changes that have not been accounted for are so large that current fiscal policies are not able to mitigate them The Puzzle of the American Economy How Changing Demographics Will Affect Our Future and Influence Our Politics exposes the factors that are undermining the nation's prospects for improving the rate of economic growth and keeping up with citizens needs for government provided services Author Mark A Pisano explains the hidden drag on the economy that has led to the ineffectiveness of recent monetary and fiscal policies how uncertainty in economic policymaking is affecting America politically as well as at the individual household level and why those who are adversely impacted are becoming politically disaffected He also presents an agenda for corrective individual action Readers will understand how the results of changes in demographics will last for decades and extend beyond the United States to many developed countries particularly Japan and nations in Europe as well as to some developing countries The book will be of value to students studying macro and micro economics those in public policy at all levels of government public administration and governmental budgeting and anyone attempting to understand the current dilemma in economic policymaking and our disjointed political process **Paradoxes**,

Talking Politics A. W. Sparkes, 2006-06-19 Talking Politics is a philosophical examination of some of the basic concepts of political discourse Its primary focus is on the ordinary on what is said by politicians in newspapers and by people in pubs rather than on the works of political theorists This is a work of but not on political theory Talking Politics is Invaluable as a source of reference for students and contains a detailed index Arranged thematically around topics such as Nation Each entry has copious cross references and suggestions for further reading A W Sparkes is uniquely qualified to write such a book combining some thirty years teaching as a philosopher with wide experience of and a life long fascination with politics His attitude is that of a critical but uncynical observer *Radical History and the Politics of Art* Gabriel Rockhill, 2014-07-15 Gabriel Rockhill opens new space for rethinking the relationship between art and politics Rather than understanding the two spheres as separated by an insurmountable divide or linked by a privileged bridge Rockhill demonstrates that art and politics are not fixed entities with a singular relation but rather dynamically negotiated sociohistorical practices with shifting and imprecise borders Radical History and the Politics of Art proposes a significant departure from extant debates on what is commonly called art and politics and the result is an impressive foray into the force field of history in which cultural practices are meticulously analyzed in their social and temporal dynamism without assuming a conceptual unity behind them Rockhill thereby develops an alternative logic of history and historical change as well as a novel account of social practices and a

multidimensional theory of agency Engaging with a diverse array of intellectual artistic and political constellations this tour de force diligently maps the various interactions between different dimensions of aesthetic and political practices as they intertwine and sometimes merge in precise fields of struggle *The Poetics of Conversion in Early Modern English Literature* Molly Murray, 2009-10-15 This book considers the poetry written by converts between Catholic and Protestant churches within post Reformation England Teaching Politics, 1979 **The Media, Cultural Control and Government in Singapore** Terence Lee, 2010-05-06 This book explores this inherent contradiction present in most facets of Singaporean media cultural and political discourses and identifies the key regulatory strategies and technologies that the ruling People Action Party PAP employs to regulate Singapore media and culture and thus govern the thoughts and conduct of Singaporeans It establishes the conceptual links between government and the practice of cultural policy arguing that contemporary cultural policy in Singapore has been designed to shape citizens into accepting and participating in the rationales of government Outlining the historical development of cultural policy including the recent expansion of cultural regulatory and administrative practices into the creative industries Terence Lee analyzes the attempts by the Singaporean authorities to engage with civil society the ways in which the media is used to market the PAP's policies and leadership and the implications of the internet for the practice of governmental control Overall **The Media Cultural Control and Government in Singapore** offers an original approach towards the rethinking of the relationship between media culture and politics in Singapore demonstrating that the many contradictory discourses around Singapore only make sense once the politics and government of the media and culture are understood **Politics of Culture and the Spirit of Critique** Gabriel Rockhill, 2014 Gabriel Rockhill opens new space for rethinking the relationship between art and politics Rather than understanding the two spheres as separated by an insurmountable divide or linked by a privileged bridge Rockhill demonstrates that art and politics are not fixed entities with a singular relation but rather dynamically negotiated sociohistorical practices with shifting and imprecise borders *Radical History and the Politics of Art* proposes a significant departure from extant debates on what is commonly called art and politics and the result is an impressive foray into the force field of history in which cultural practices are meticulously analyzed in their social and temporal dynamism without assuming a conceptual unity behind them Rockhill thereby develops an alternative logic of history and historical change as well as a novel account of social practices and a multidimensional theory of agency Engaging with a diverse array of intellectual artistic and political constellations this tour de force diligently maps the various interactions between different dimensions of aesthetic and political practices as they intertwine and sometimes merge in precise fields of struggle
