

Introduction

- I want to take a longer historical perspective on the evolution of former socialist economies in China and Eastern Europe, not focusing on particular policies but on the long run processes that have been at work.
- I want to see transition in Central and Eastern Europe less as a process of reform and more as a process of **disintegration of the communist state apparatus.**
- In contrast, China's evolution is characterized by the conscious replacement of central planning by the **market economy to keep the communist party's control over political power.**
- These new interpretations of transition have important implications.

West, Parvathi Raman, 2009 Against the historical backdrop of successive socialist and post socialist claims to have completely remade society the contributors to this volume explore the complex and often paradoxical continuities between diverse post socialist presents and their corresponding socialist and pre socialist pasts The chapters focus on ways in which pre socialist economic political and cultural forms in fact endured an era of socialism and have found new life in the post socialist present notwithstanding revolutionary socialist claims continuities with a pre socialist past have been produced within the historical imaginary of post socialism and socialist economic political and cultural forms have in fact endured in a purportedly postsocialist era despite the claims of neo liberal reformers Publisher's website [Routledge Library Editions: Education in Asia](#) Various, 2021-07-14 This set of reissued books examines education in Asia from a variety of different angles From the westernisation of early twentieth century Chinese education to the impact of the Communist revolution to education and society in Korea to Asian women's experiences of education this set collects some key texts by a range of original thinkers *Popular Political Support in Urban China* Jie Chen, 2004 On the basis of three carefully drawn surveys of Beijing residents
