history traces debates beginning shortly after the profession's emergence in American academia about history's role in school curricula. He also examines the use of historians in and by the government and whether historians should utilize mass media such as film and radio to influence the general public. As *Historians in Public* shows, the utility of history is a distinctive theme throughout the history of the discipline, as is the attempt to be responsive to public issues among pressure groups. A superb examination of the practice of American history since the turn of the century, *Historians in Public* uncovers the often tangled ways history makers make history both as artisans and as actors.

Heritage Planning Harold Kalman, Marcus R. Létourneau, 2020-11-29 This new and substantially revised edition of *Heritage Planning: Principles and Process* offers an extensive overview of the burgeoning fields of heritage planning and conservation. Positioning professional practice within its broader applied and theoretical contexts, the authors provide a firm foundation for understanding the principles, history, evolution, debates, and tools that inform heritage planning while also demonstrating how to effectively enact these processes. Few published works focus on the practice of heritage planning. The first edition of this book was developed to fill this gap, and this second edition builds upon it. The book has been expanded in scope to incorporate new research and approaches as well as a wide range of international case studies. New themes reflect the emerging recognition that sustainability, climate resilience, human rights, social justice, and reconciliation are fundamental to the future of planning. *Heritage Planning* is indispensable reading not only for professionals who transform the built environment but for anyone who wants to understand the ideas and practices of heritage planning and conservation. For the benefit of student readers, twelve chapters designed to accommodate the academic semester are augmented with concise summaries, key terms, and definitions.

Developing Dixie Winfred Moore, Joseph F. Tripp, Lyon G. Tyler, 1988-06-27 This collection of essays examines the development of the American South from the end of the Civil War to the end of World War II. Written by both well-known and emerging scholars, the essays are divided into sections that address some of the major issues of that era, such as race relations, economic development, political reform, the roles of southern women, the messages of folk music, and the problems of the region's historians. Each article offers fresh insights or new information on its subject, and collectively the articles help to illuminate how the most traditional of American regions tried to cope with the forces of modernization.

Remaking America John Bodnar, 2020-07-21 In a compelling inquiry into public events ranging from the building of the Vietnam Veterans Memorial through ethnic community fairs to pioneer celebrations, John Bodnar explores the stories, ideas, and symbols behind American commemorations over the last century. Such forms of historical consciousness, he argues, do not necessarily preserve the past but rather address serious political matters in the present.

Historic American Buildings Survey/Historic American Engineering Record, *A Golden Haze of Memory* Stephanie E. Yuhl, 2006-03-08 Charleston South Carolina today enjoys a reputation as a destination city for cultural and heritage tourism In *A Golden Haze of Memory* Stephanie E Yuhl looks back to the crucial period between 1920 and 1940 when local leaders developed Charleston s trademark image as America s Most Historic City Eager to assert the national value of their regional cultural traditions and to situate Charleston as a bulwark against the chaos of modern America these descendants of old line families downplayed Confederate associations and emphasized the city s colonial and early national prominence They created a vibrant network of individual artists literary figures and organizations such as the all white Society for the Preservation of Negro Spirituals that nurtured architectural preservation art literature and tourism while appropriating African American

folk culture In the process they translated their selective and idiosyncratic personal familial and class memories into a collective identity for the city The Charleston this group built Yuhl argues presented a sanitized yet highly marketable version of the American past Their efforts invited attention and praise from outsiders while protecting social hierarchies and preserving the political and economic power of whites Through the example of this colorful southern city Yuhl posits a larger critique about the use of heritage and demonstrates how something as intangible as the recalled past can be transformed into real political economic and social power
