This book is designed for the many persons who, by virtue of the fact that they work with handicapped children, also deal with the parents of those children. Practicing professionals representing the specialties of child development, pediatrics, psychology, social work, special education, speech pathology and audiology present their conceptions about working with parents of handicapped children. They also describe some techniques useful in conducting group or individual parent counseling.

Milton Seligman

Professional Approaches With Parents Of Handicapped Children:

Professional Approaches with Parents of Handicapped Children Elizabeth J. Webster, 1976 **Conducting Effective Conferences with Parents of Children with Disabilities** Milton Seligman, 2000-03-11 Successful collaboration between teachers and parents can greatly enhance children's educational growth and development. This clearly written book provides teachers with the knowledge and skills needed to conduct effective conferences with parents of children with disabilities. Readers gain a solid understanding of the challenges that families face as a consequence of childhood disability, how family dynamics and roles are affected, and issues that are likely to arise in meetings with school professionals. Reviewing the basic elements of parent teacher conferencing, Seligman highlights ways to establish rapport with families, develop strong listening and responding skills, and engage parents who may feel anxious, frustrated, or angry. Also addressed are the specific requirements of the legally mandated Individualized Educational Program conference. Enhancing the book's utility are numerous concrete examples and sample parent teacher dialogues, as well as role play scenarios and exercises to build conferencing skills. The Appendix describes a range of disability related referral sources and publications suitable for recommendation to parents. **Developmental Disabilities Abstracts**, 1978 Working with Families of Children with Special Needs

Naomi Dale, 2008-03-07 The importance of partnerships between professionals and the parents of children with special needs disability is well established in childcare legislation. But is it reflected in practice? Written for practitioners and those in training, this book recognises that forming partnerships can be a fraught process involving dissent as well as cooperation. Naomi Dale draws on case histories from her own experience to examine key partnership issues such as consent, confidentiality, and diagnosis/delivery. She combines up to date theory and research with practice to provide a wealth of suggestions and ideas for effective family work. Working with Families of Children with Special Needs features useful exercises with each chapter, making it an excellent resource book and practice manual for multidisciplinary professionals.

Working with Parents of Exceptional Children Richard M. Gargiulo, 1985 Professional Collaboration with Parents of Children with Disabilities Louise Porter, Susan McKenzie, 2000-10-23 The work of professionals with children with disabilities affects the children's family while events at home affect what professionals can achieve with the children. This text describes how professionals can form collaborative relationships with the parents of the children in their care to optimise the children's development and to enable both family members and professionals to work in the children's interests. It describes experiences of families who have a child with a disability and takes a new look at old assumptions that disability necessarily has a negative effect on families or that families themselves are in need of therapy simply by virtue of having a child with additional needs. This text offers practical insights and guidelines for action by teachers, occupational therapists, physiotherapists, speech pathologists, and psychologists. It is a practical text that enables practitioners to offer a high quality service to children while supporting the family in its role of nurturing their child with special needs. *Caring for the*

Mentally Handicapped Child David Wilkin, 2016-01-08 First published in 1979 this book concerns itself primarily with the mothers of mentally handicapped children It discusses the problems of assistance that they may have experienced from their families the community or the available services Whilst arguing for far more support for mothers when they are the main carer this book also suggests reasons why some families are more easily able to cope with the problems of caring for severely handicapped children This study is based on research that was conducted for and funded by the Department of Health and Social Security between 1973 and 1976

The Family with a Handicapped Child Milton Seligman, 1991 This work focuses on families trying to cope with their chronically disabled children It examines the many variables affecting the family from internal family issues to external social pressures The book aims to highlight the complexities of working with such families

Families of Students with Disabilities Sandra K. Alper, Cynthia N. Schloss, 1994 Text is designed to enable teachers to assist families of disabled persons in becoming full partners in the educational process It addresses family dynamics roles of parents and other family members counseling and communication techniques Courses in Consultation in Special Education Family Dynamics and Intervention and Child and Family Studies

Working with Parents Roy McConkey, 2025-08-05 In the 1980s working with parents in the education and care of their children was more often preached than practised by professionals However recent government committees and legislation both in the UK and USA at the time had repeatedly stressed the importance of parental participation This applied not only to children with special needs but to all children and indeed there was considerable evidence to suggest that parents wanted to be involved and that the child benefited as a result Originally published in 1985 *Working with Parents* aimed at professionals in training or newly qualified drew together for the first time many examples of how partnership with parents can evolve and be successful It not only gives detailed suggestions for working with parents on a one to one basis but also describes how to handle parent groups organise courses give effective talks and use video The author draws on his wide and well known experience to give specific instances such as his work on language with children with learning disabilities that illustrate general principles The book is written in a lively practical style and should still be of great value to teachers in both special and mainstream education and others such as speech therapists psychologists and community workers This book is a re issue originally published in 1985 The language used is a reflection of its era and no offence is meant by the Publishers to any reader by this re publication
