Reflected In Water A Crisis In Social Responsibility:

Reflected in Water Colin Ward, 1997 Water the primary need for human existence is a common good belonging to all Yet it has been appropriated as a commodity by the powerful This book re asserts the claim for local community control of access of water

The Human Right to Water and its Application in the Occupied Palestinian Territories Amanda Cahill Ripley, 2011-04-11 The Human Right to Water and Its Application in the Occupied Palestinian Territories provides an overview and examination of the human right to water as determined under international human rights law This is a highly topical issue with the UN General Assembly having passed a resolution which declares access to clean water and sanitation a human right New York Jul 28 2010 the recent appointment of the UN Independent Expert on the issue of human rights obligations related to access to safe drinking water and sanitation and movement within the NGO community for an international water treaty Amanda Cahill Ripley analyses the current legal status substantive content and obligations correlative to the right and examines the relationship between other economic social and cultural rights related to the right to water The book goes on to look more specifically at the application of the human right to water in the Occupied Palestinian Territories Using innovative methodology Cahill Ripley combines legal analysis with a qualitative social science empirical case study to explore the enjoyment of the right on the ground The wider implications of the case study findings are then considered looking at what can be done to strengthen the right legally in terms of its status and codification and what remedy can be found for violations of the right both specifically in the Occupied Palestinian Territories and in a more general context The book will be of interest to students academics and practitioners within the fields of international human rights law and international humanitarian law as well as those concerned with international relations and conflict resolution within Israel Palestine and the wider Middle East region

Hydropolitics in the Developing World Anthony Turton, Roland Henwood, 2002 Bringing contributions by a variety of authors together in one volume is part of an attempt to show that hydropolitics is a growing discipline in its own right The prevailing definition of hydropolitics is widened to include the elements of scale and range This is illustrated through a focus on theoretical and legal issues case studies from Southern Africa and a proposed research agenda The book is an important addition to the literature on hydropolitics

Water Law, Poverty, and Development Philippe Cullet, 2009-07-16 This monograph comprehensively examines water law regulations and reform in the present decade going beyond a simple analysis of existing water law and regulations to encompass environmental social economic and human rights aspects of water as a natural resource Using the specific case of India and on the related international law and policy framework that directly influences water regulatory developments in India this book offers what will be the first and only analysis of water law reforms taking place at the national level in many developing countries in their domestic and international context On the one hand international freshwater law remains under developed and existing legal instruments such as the 1997 UN Convention only address a limited set of relevant issues Yet the

international law and policy framework concerning freshwater is increasingly important in shaping up law reforms taking place at the national level in particular in developing countries Indeed non binding resolutions such as the Dublin Statement on Water and Sustainable Development 1992 have had an immense influence on water law reforms in most developing countries This book seeks to conceive of and analyse freshwater regulation in a broader context and go beyond a literature that either lauds or criticises ongoing water sector reforms to provide an analytical basis for the reforms which all countries will have to adopt in the near or medium term future

A British Anarchist Tradition Carissa Honeywell,2011-05-12 A British Anarchist Tradition focuses on three contemporary British theorists and practitioners Herbert Read Colin Ward and Alex Comfort and looks at their interrelation commonality and collective influence on British radical thought The book aims to foster a greater understanding of anarchism as an intellectual response to 20th century developments and its impact on political thought and movements For the first time the work of these three writers is presented as a tradition highlighting the consistency of their themes and concerns To do so the book shows how they addressed the problems faced by modern British society with clear lines of political literary and intellectual traditions linking them It also focuses on their contribution to the development of anarchist conceptions of freedom in the twentieth century A British Anarchist Tradition identifies an area of anarchism that deserves greater critical scholarly attention Its unique and thorough research will make it a valuable resource for anyone interested in contemporary anarchist thought political theory and political movements

Just Water Zenner, Christiana,2018-11-15 Just Water explores the necessity and availability of a supply of fresh water from the perspective of Christian ethics This revised edition includes new data and updates on social developments related to water crises as well as insights from Pope Francis s encyclical Laudato Si and a discussion of water justice from the perspective of the events at Standing Rock

The Oxford Handbook of Water Politics and Policy Ken Conca,Erika Weinthal,2018-01-26 Water is a basic human need and a scarce commodity with increasing value to farmers industries and cities in an urbanizing world It is unpredictable in supply and quality difficult to contain or direct and notoriously difficult to manage well Several trends climate change the endurance of widespread global water poverty intensifying competition among rival uses and users and the vulnerability of critical freshwater ecosystems combine to intensify the challenges of governing water wisely fairly and efficiently The twenty seven chapters in The Oxford Handbook of Water Politics and Policy address such issues over the course of seven thematic sections These themes reflect familiar frameworks in the water policy world including water poverty and health water and nature and water equity and justice Other sections look at emergent and contentious policy arenas including the water energy food nexus and management of uncertainty in water supply or connect well established strands in new ways including sections on water tools water price and value supply and demand privatization corporate responsibility and issues surrounding transboundary waters This volume conceives of water as a global issue and gathers a diverse group of leading scholars of water politics and policy

Water and Sanitation Services Jose Esteban Castro,2012

I am most impressed by the range and profile of the topics and contributors There is a growing awareness that solving water and sanitation problems involves more than pipes and valves human behaviour and institutions are important components of the package Sandy Cairncross London School of Hygiene and Tropical Medicine UK This book will be very timely The emphasis of the book is absolutely correct linking the technologies to the sociocultural political economic and planning aspects of water and sanitation services Duncan Mara University of Leeds UK Substantially reducing the number

Reflections on Water Joachim Blatter, Helen M. Ingram, 2001 This book offers conceptual and empirical support for the idea that the human relationship with water must move beyond rationalist definitions of water as product property and commodity Encyclopedia of Consumer Culture Dale Southerton, 2011-09-15 The Encyclopedia of Consumer Culture is the first reference work to outline the parameters of consumer culture and provide a critical scholarly resource on consumption and consumerism *Water Politics in the Middle East* M. Dolatyar, T. Gray, 1999-09-21 Most studies of water scarcity in the Middle East conclude that there is a significant risk of imminent conflict even warfare between states in the region This book demonstrates that the evidence does not support this doom laden prediction Indeed the authors show that although water scarcity has occasionally played a role in disputes in the Middle East it has much more often promoted co existence between adversaries The reasoning behind this hypothesis is that water is too critical to be put at risk by warfare Democracy and Global Water Politics in Historical Perspective Jose Esteban Castro, 2024-12-23 This book addresses water privatization from a historical sociological perspective and argues against the unrelenting imposition of neoprivatist water politics worldwide Water is essential for life but it is also a source of economic and political power Prevailing water politics continues to erode the conditions of dignified living conditions of millions of human beings around the world including many living in Western capitalist democracies The book revisits water related myths fake truths and authoritarian practices promoted or employed by International Financial Institutions governments and other powerful actors to keep enforcing long failed policies grounded on ideological dogmas and short term interests and argues for the substantive democratization of water politics and management It rejects claims of scientific neutrality from academics and other actors across the political spectrum who are co responsible for the perpetuation of these conditions interrogating the ethics of scientific political pragmatism Global Change: Impacts on Water and food Security Claudia Ringler, Asit K. Biswas, Sarah Cline, 2010-01-19 In recent years a greater level of integration of the world economy and an opening of national markets to trade has impacted virtually all areas of society The process of globalization has the potential to generate long term benefits for developing countries including enhanced technology and knowledge transfers and new financing options supporting agricultural and economic development However risks of political and economic instability increased inequality and losses in agricultural income and production for countries that subsidize their agricultural and other economic sectors threaten to offset potential benefits Globalization can also have a profound impact on the water sector in terms of allocation and use of water and thus on food security as well

Other global change processes particularly climate change are also likely to have far reaching impacts on water and food security and societies around the world To discuss these issues in depth the International Food Policy Research Institute the Third World Centre for Water Management Mexico and the Tropical Agricultural Research and Higher Education Center CATIE Costa Rica held a three day International Conference on Globalization and Trade Implications for Water and Food Security at CATIE s Turrialba Costa Rica headquarters under the auspices of the CGIAR Challenge Program on Water and Food in 2005 The workshop set out to identify the major risks and emerging issues facing developing countries related to global economic and environmental change impacts on water and food security Water Development and Poverty Reduction I.H. Olcay Ünver,Rajiv K. Gupta,Aysegul Kibaroglu,2012-12-06 In the book s four Parts the interdisciplinary approach to many issues contributes to the relationship between water and poverty Part I includes articles on the conceptual and methodological issues concerning poverty reduction through water resources development It also offers analysis of quantitative measurements of poverty reduction including some approaches for creating a Water Poverty Index Part II considers the institutional frameworks for management of water and poverty reduction Topics range from community based decision making to international leadership Part III encompasses discussions on participatory irrigation management and the privatization of urban water supplies and sewerage and the link to poverty Case studies from India Turkey and Jordan make up Part IV The studies present diverse water management and development practices for poverty reduction including realistic pricing and effective irrigation practices the use of water as an engine for sustainable development small and large scale strategies for reducing the risks and uncertainties in water availability and food security the economic value of improved water supplies and the positive impact of small scale development projects What is Water? Jamie Linton,2010 We all know what water is and we often take it for granted Because it seems so natural we seldom question how we see water But the spectre of a worldwide water crisis suggests that there might be something fundamentally wrong with the way we think about water Jamie Linton dives into the history of the modern concept of water that water can be stripped of its wider environmental social and cultural contexts and reduced to a scientific abstraction to mere H₂O This abstraction has given modern society licence to dam divert and manipulate water with impunity giving rise to a growing suite of problems Linton argues that part of the solution to the water crisis involves deliberately reinvesting water with social content

Water Engineering and Management through Time Enrique Cabrera,2010-08-06 Water Engineering and Management Learning from History explores the pair technology water use an indivisible pair since the first member of the binomial determines the second which in the light of the knowledge available in the 21st century and with a conception focused on the near future goes beyond the limits set by nature itself T **Managing Europe's Water Resources** Dr Chad Staddon,2012-11-28 Illustrated with case studies which explain key concepts and provide practical examples this book provides a detailed and comprehensive introduction to water management issues from a European perspective The book

begins with a brief history of water management followed by a consideration of the major frameworks used for managing water in its qualitative and quantitative aspects Several chapters treat key water management issues including dams privatization hydropolitics climate change and finally provides a synoptic treatment of major water management issues across Europe's geographical regions **The No-nonsense Guide to Water** Maggie Black, 2004 Water sustains life without it humans cannot survive for more than a few days And yet this precious fluid is becoming increasingly politicized as the debates about control and ownership of water itself and of the many organizations which govern its use gain force Maggie Black explores the many roles water plays in human life and as the defense of water rights looks set to become an explosive issue provides a clear overview on the vital issues of distribution technology irrigation land use and commodification

Deep Blue Sylvie Shaw, Andrew Francis, 2014-12-05 Nature religions look to rivers lakes and oceans for inspiration and spiritual transformation *Deep Blue* brings together the work of influential scholars in the field of nature religion ranging across anthropology mythology sociology and psychology The essays examine the interrelationship between spiritual practice critical thinking and environmental concern Tracing the ancient history of humanity's close relationship with both salt and fresh water the book calls for a sustainable relationship with water in contemporary western culture *Deep Blue* will be of interest to students of paganism and religion environmental researchers and activists and all those involved in the intersection between religion and ecology [Handbook of Landscape Archaeology](#) Bruno David, Julian Thomas, 2016-06-03 Over the past three decades landscape has become an umbrella term to describe many different strands of archaeology From the processualist study of settlement patterns to the phenomenologist's experience of the natural world from human impact on past environments to the environment's impact on human thought action and interaction the term has been used In this volume for the first time over 80 archaeologists from three continents attempt a comprehensive definition of the ideas and practices of landscape archaeology covering the theoretical and the practical the research and conservation and encasing the term in a global framework As a basic reference volume for landscape archaeology this volume will be the benchmark for decades to come All royalties on this Handbook are donated to the World Archaeological Congress
