provides an explanation of war in international politics grounded on data based empirical research The book classifies and synthesizes the research findings of over 500 quantitative analyses of war at the analytic level of the state dyad region and international system Because wars follow from political decisions two basic decision making models the rational and the non rational are examined in relation to the explanatory framework of the volume In addition case analyses of two wars the Iran Iraq War 1980 and World War I 1914 are provided as demonstrations of scientifically based explanations of historical events The primary structural factors responsible for the onset and seriousness of war are identified and the explanations are developed according to the scientific model of covering laws The conclusion presents a discussion of the potential for probabilistic conditional predictions of conflict within the context of war and peace studies

Territory, War, and Peace

John A. Vasquez, Marie T. Henahan, 2023-04-14 This book presents a collection of new and updated essays on what has come to be known as the territorial explanation of war The book argues that a key both to peace and to war lies in understanding the role territory plays as a source of conflict and inter group violence Of all the issues that spark conflict territorial disputes have the highest probability of escalating to war War however is hardly inevitable much depends on how territorial issues are handled More importantly settling territorial disputes and establishing mutually recognized boundaries can produce long periods of peace between neighbors even if other salient issues arise While territory is not the only cause of war and wars arise from other issues territory is one of the main causes of war and learning how to manage it can in principle eliminate an entire class of wars This book will be of great interest to all students of war and conflict studies causes of war and peace international security and strategic studies John A Vasquez is Thomas B Mackie Scholar in International Relations at the University of Illinois Urbana Champaign He is author of *The Steps to War* 2008 with Paul Senese and *The War Puzzle Revisited* 2009 He has been president of the Peace Science Society International and the International Studies Association Marie T Henahan is Director of Internships and Lecturer Department of Political Science at the University of Illinois Urbana Champaign She is author of *Foreign Policy and Congress An International Relations Perspective* and co editor of *The Scientific Study of Peace and War*

The Steps to War Paul D. Senese, John A. Vasquez, 2008-08-10 The question of what causes war has concerned statesmen since the time of Thucydides *The Steps to War* utilizes new data on militarized interstate disputes from 1816 to 2001 to identify the factors that increase the probability that a crisis will escalate to war In this book Paul Senese and John Vasquez test one of the major behavioral explanations of war the steps to war by identifying the various factors that put two states at risk for war Focusing on the era of classic international politics from 1816 to 1945 the Cold War and the post Cold War period they look at the roles of territorial disputes alliances rivalry and arms races and show how the likelihood of war increases significantly as these risk factors are combined Senese and Vasquez argue that war is more likely in the presence of these factors because they increase threat perception and put both sides into a security dilemma *The Steps to War* calls into question certain prevailing realist beliefs like peace through strength demonstrating

how threatening to use force and engaging in power politics is more likely to lead to war than to peace War and Peace and War Peter Turchin, 2007-02-27 From the author of *End Times* In *War and Peace and War* Peter Turchin uses his expertise in evolutionary biology to offer a bold new theory about the course of world history Turchin argues that the key to the formation of an empire is a society's capacity for collective action He demonstrates that high levels of cooperation are found where people have to band together to fight off a common enemy and that this kind of cooperation led to the formation of the Roman and Russian empires and the United States But as empires grow the rich get richer and the poor get poorer conflict replaces cooperation and dissolution inevitably follows Eloquently argued and rich with historical examples *War and Peace and War* offers a bold new theory about the course of world history with implications for nations today **Guide to the Scientific Study of International Processes** Sara McLaughlin Mitchell, Paul F. Diehl, James D. Morrow, 2012-07-17

Operational Research in War and Peace M. W. Kirby, 2003 This invaluable book provides an account of Operational Research in Britain the country of its inception from the late 1930s to 1970 Originating in response to the country's air defence needs against the Luftwaffe Operational Research had outstanding achievements as part of the secret war against Nazi Germany After 1945 the discipline began to be adopted in an increasing range of industries and services In the 1960s by which time it was being incorporated in to university curricula the discipline began to penetrate into civil government departments The history of Operational Research provides unique insights into the conduct of modern warfare the professionalisation of business management and the modernisation of the civil service The chronological coverage from the late 1930s to 1970 coincides with golden age of Operational Research when the discipline was presented as a means of

achieving optimum solutions to complex managerial problems The book will be of interest to military and business historians as well as to historians of public administration and higher education Regions of War and Peace Douglas

Lemke,2002-01-21 In this contribution to the literature on the causes of war Douglas Lemke asks whether the same factors affect minor powers as affect major ones He investigates whether power parity and dissatisfaction with the status quo have an impact within Africa the Far East the Middle East and South America Lemke argues that there are similarities across these regions and levels of power and that parity and dissatisfaction are correlates of war around the world The extent to which they increase the risk of war varies across regions however and the book looks at the possible sources of this cross regional variation concluding that differential progress toward development is the likely cause This book will interest students and scholars of international relations and peace studies as well as comparative politics and area studies The
