Gladius Guy de la Bédoyère, 2020-12-04 This encyclopedic volume collects pretty much every fact known about what it was like to be in the military arm of the Roman Empire The New York Times Book Review The Roman army was the greatest fighting machine in the ancient world It was also the single largest organization in Western antiquity taking in members from all classes from senators to freed slaves The Roman Empire depended on its army not just to win wars defend its frontiers and control the seas but to act as the very engine of the state In Gladius the Latin word for sword Guy De la B doy re reveals what it meant to be a soldier in the army that made the empire Surveying numerous

aspects of Roman military life between 264 BCE and 337 CE De la Broye draws not only on the words of famed Roman historians but also those of the soldiers themselves as recorded in their religious dedications tombstones and even private letters and graffiti He vividly recreates their everyday lives whether in a bleak frontier garrison in Britain or North Africa guarding the emperor in Rome fighting on foreign battlefields mutinying over pay marching in triumph throwing their weight around on city streets or enjoying honorable retirement By illuminating the history of one organization that reflected all corners of the Roman world Gladius gives us a portrait of an ancient society that is unprecedented in both its broad sweep and gritty intimacy

Eilean Donan Castle Cecily Shakespeare, Jonathan Clark, Justin Garner-Lahire, Richard Oram, Nicola Toop, 2023-11-15 Now hard to believe Eilean Donan Castle was once one of the largest castles in the west Highlands known to have featured seven towers the remains of which lie buried on the island This book provides a refreshed view of the lost medieval guise of the castle of its 13th century origins and form and of who was responsible for building it allowing the castle to be positioned accurately in the complex dynamics of powerholding and display of the earls of Ross and associated militarized kindreds of the west Highlands during six centuries of change up to the castle's destruction in 1719 A new history and the details of the below ground archaeology allow us to see the lost medieval castle in our mind's eye 500 years after it vanished Focusing on the huge amount of archaeological material unearthed during the campaign shows the castle hosted master craftspeople including goldsmiths shipwrights and hereditary swordsmiths Exquisite personal items decorative mail armor and weapons musical instruments gaming pieces imported pottery and animal bones bring the castle and its inhabitants back to life

Where Men No More May Reap or Sow Richard D. Oram, 2024-06-06 Drawing together the evidence of archaeology palaeoecology climate history and the historical record this first environmental history of Scotland explores the interaction of human populations with the land waters forests and wildlife This volume spans 450 years that saw profound transformation in Scotland's environment It begins in the fifteenth century when the Golden Age of the early 1200s was but a fading folk memory in a land gripped by the gathering grimness of a little ice age Colder wetter stormier weather became the new normal interspersed with brief episodes of warmer but still moist conditions all of which brought huge challenges to a society on the knife edge of subsistence Viewing the religious and political upheavals of the sixteenth and seventeenth centuries against the cycles of disease and dearth that were ever present into the later 1700s the book explores the slow adoption and application of the ideas of Improvement and the radical disruption of Scotland's environment that ensued Reformation revolution and rebellion were the background noise to efforts to subsist and succeed through a hostile age in which Scotland's environment was an adversary to be tamed mastered and made polite As the last bitter decades of the little ice age were ground out in foreign wars forced clearances and potato famines Scotland prepared itself to embrace the

Industrial Age **Visions of the Roman North: Art and Identity in Northern Roman Britain** Iain Ferris, 2021-04-22
This is the first book to analyse art from the northern frontier zones of Roman Britain and to interpret the meaning and significance of this art in terms of the formation of a regional identity It argues that a distinct and vibrant visual culture flourished in the north primarily due to its status as a heavily militarized frontier zone Sixteenth Census of the United States: 1940 Thomas Nall Eden Greville, 1946 **Sixteenth Census of the United States: 1940** United States. Bureau of the Census, Thomas Nall Eden Greville, 1946 Handbook of Paleontological Techniques , 1965 Tabula Imperii Romani: Britannia Septentrionalis , 1987 **Excavations at Cill Donnain** Mike Parker Pearson, Marek Zvelebil, 2014-06-30 The SEARCH Sheffield Environmental and Archaeological Research Campaign in the Hebrides project began in 1987 and covers the Scotland s Outer Hebrides The aim of the project is to investigate how human societies adapted in the long term to the isolated environment of the Outer Hebrides The first major excavation on South Uist discovered that what was thought to be a shell midden at Cill Donnain was in fact a wheelhouse a type of dwelling used in the period c 300 BC AD 500 under which lay the remains of a Bronze Age settlement This settlement was partly investigated by Marik Zvelebil in 1991 and then later by Mike Parker Pearson and Kate MacDonald in 2003 The site itself is situated at the foot of a high steep sided dune on the eastern edge of a large sand valley close to the western shore of Loch Cill Donnain The archaeological report of the excavation at the Cill Donnain wheelhouse shows that in comparison with contemporary neighbouring settlements it was unlikely that each was an independent unit and that they were linked by social and economic inter dependency The wheelhouse thus provides striking new evidence that contributes to developing theories about the social material and economic life in the period This volume presents the extensive archaeological evidence found at the site including pottery faunal remains and a variety of bone and metal tools illustrating that the Cill Donnain landscape is rich in archaeological sites of all periods from the Beaker to the post Medieval *Handbook of Paleontological Techniques* Paleontological Society, 1965 The Oxford Handbook of Later Medieval Archaeology in Britain Christopher Gerrard, Alejandra Gutiérrez, 2018-01-11 The Middle Ages are all around us in Britain The Tower of London and the castles of Scotland and Wales are mainstays of cultural tourism and an inspiring cross section of later medieval finds can now be seen on display in museums across England Scotland and Wales Medieval institutions from Parliament and monarchy to universities are familiar to us and we come into contact with the later Middle Ages every day when we drive through a village or town look up at the castle on the hill visit a local church or wonder about the earthworks in the fields we see from the window of a train The Oxford Handbook of Later Medieval Archaeology in Britain provides an overview of the archaeology of the later Middle Ages in Britain between AD 1066 and 1550 61 entries divided into 10 thematic sections cover topics ranging from later medieval objects human remains archaeological science standing buildings and sites such as castles and monasteries to the well preserved relict landscapes which still survive This is a rich and exciting period of the past and most of what we have

learnt about the material culture of our medieval past has been discovered in the past two generations This volume provides comprehensive coverage of the latest research and describes the major projects and concepts that are changing our understanding of our medieval heritage
