Midwestern Landscape Architecture William H. Tishler, 2000 This richly illustrated collection profiles the bold innovators in landscape architecture who around the turn of the twentieth century ventured into the nation's heartland to develop a new style of design celebrating the native midwestern landscape The pioneers of landscape architecture in the Midwest are responsible for creating some of the most recognizable parks cemeteries recreation areas and other public gathering places in the region *Midwestern Landscape Architecture* includes essays on Adolph Strauch who introduced a new concept of visually integrated landscape treatment in Cincinnati's Spring Grove Cemetery William Le Baron Jenney designer of Chicago's diverse West Parks and Jens Jensen who created the American Garden in Union Park in Chicago a celebration of native flora and founder of The Clearing a unique school of the arts and humanities in Wisconsin Other major figures include Frederick Law Olmsted Sr co designer of New York's Central Park whose work in the Midwest included the layout of the 1893 World's Columbian Exposition and Ossian Cole Simonds who helped reconcile the formal approach of the City Beautiful

movement with the naturalism of the Prairie School in urban park design This volume also details the contributions of crusaders for ecological awareness and an appreciation of the region's natural heritage These include horticultural writer Wilhelm Miller who spread the ideals of the Prairie style and Genevieve Gillette a landscape architect and conservationist whose preservation efforts led to the establishment of numerous Michigan state parks and wilderness areas *Midwestern Landscape Architecture* fosters a better understanding of how landscape design took shape in the Midwest and how the land itself inspired new solutions to enhance its understated beauty Despite Olmsted's assessment of the Illinois prairie as one of the most tiresome landscapes that I ever met with the Midwest has amassed an important legacy of landscape design that continues to influence how people interact with their environment in the heartland **Library of Congress Catalogs**

Payne,Brooklyn K. Hitchens,Darryl L. Chambers,2023-07-14 Far too many poor Black communities struggle with gun violence and homicide The result has been the unnatural contortion of Black families and the inter generational perpetuation of social chaos and untimely death Young people are repeatedly ripped away from life by violence while many men are locked away in prisons In neighborhoods like those of Wilmington Delaware residents routinely face the pressures of violence death and incarceration *Murder Town USA* is thus a timely ethnography with an innovative structure the authors helped organize fifteen residents formerly involved with the streets and or the criminal justice system to document the relationship between structural opportunity and experiences with violence in Wilmington's Eastside and Southbridge neighborhoods Earlier scholars offered rich cultural analysis of violence in low income Black communities and yet this literature has mostly conceptualized violence through frameworks of personal responsibility or individual accountability And even if acknowledging the pressure of structural inequality most earlier researchers describe violence as the ultimate result of some moral failing a propensity for crime and the notion of helplessness Instead in *Murder Town USA* Payne Hitchens and Chamber along with their collaborative team of street ethnographers instead offer a radical re conceptualization of violence in low income Black communities by describing the penchant for violence and involvement in crime overall to be a logical resilient response to the perverse context of structural inequality **Social Interaction** Thomas M. Kando,1977 **Risk**

Management in Project Organisations Peter Edwards,Paul Bowen,2013-10-11 This book enhances the reader's understanding of the nature and presence of risk by raising the organisation's awareness of the risks it faces and formalising the systems needed to deal with and learn from those risks While based on the experience of the construction industry the book also acts as a broader project management text meeting the needs of project managers and students in many disciplines and professions from architecture and construction through engineering and commerce to IT finance and banking Essential for anyone studying or involved in organisational decision making for projects this book will help readers to develop

confidence in dealing with risk in a systematic manner Learning Directory ,1972 *Organizing Projects for Success* Vijay K. Verma, Project Management Institute, 1995 Annotation How do project managers get things done They generally have substantial responsibility and they depend on the cooperation of other project stakeholders for their success In *Organizing Projects for Success* Vijay Verma shows that understanding the issues of authority accountability reliability and responsibility as well as knowing how to gain the commitment of project participants and how to delegate effectively are all critical to good project management He shows that even the best soft skills can be overridden by an organizational structure that does not support management by projects This book is Volume One of The Human Aspects of Project Management series
