Review of the Policy on Debt Limits in Fund-Supported Programs International Monetary Fund. Strategy, Policy, & Review Department, International Monetary Fund. Fiscal Affairs Dept., 2013-03-17 This review examines the experience with the policy on debt limits in Fund supported programs across the membership and proposes possible reforms to strengthen the policy The policy was last reformed in 2009 with a view to adapting it to the changing circumstances in low income countries LICs Given its primary focus on LICs the reform left the policy applying to the rest of the membership broadly unchanged The Fund's debt limits policy has been in place since the 1960s From the policy's inception concessional flows have been excluded from debt limits under the presumption that such financing was critical for LICs and posed only limited risks to debt sustainability Over time the exclusion of concessional flows has led to a bifurcation in the policy with one branch focusing on members to whom concessional financing is normally available and the other on those to whom it is not a distinction which in practical terms has involved differentiating between LICs and non LICs **Debt Relief for the Poorest** Shonar Lala, Rupa Ranganathan, Brett Libresco, 2006-01-01 This study evaluates progress under the HIPC initiative since IEG's 2003 evaluation It finds that the Enhanced HIPC initiative cut debt ratios in half for 18 countries but in eight of these countries the ratios have come to once again exceed HIPC thresholds Debt reduction alone is not a sufficient instrument to affect the multiple drivers of debt sustainability Sustained improvements in export diversification fiscal management the terms of new financing and public debt management are also needed measures that fall outside the ambit of the HIPC

International Monetary Fund, 2011-10-31 The global economy has entered a dangerous new phase with severe downside risks The Fund has been called by the IMFC to contribute to an orderly resolution of these tensions and the membership must be prepared for bold action Our first responsibility is to help develop and coordinate solutions to immediate threats to global stability in particular to provide insightful analysis and policy advice to address fiscal/financial vulnerabilities and rekindle growth and job creation Yet we must also be prepared to fortify the global financial safety net Secondly we must redouble efforts to make the international monetary system IMS stronger in the longer term through more effective surveillance and a clearer shared vision of the system's key underpinnings

downward trends in commodity prices on least developed countries LDCs small vulnerable states SVSs and heavily indebted countries HIPC and proposes a Joint Diversification Scheme exclusively for export diversification schemes in the commodity-dependent poor countries The report also proposes and outlines the establishment of a Joint Diversification Fund in addition to regular aid flows as a long-term solution

Dealing Fairly with Developing Country Debt Christian Barry, Lydia Tomitova, Barry Herman, 2007 The recent economic collapse in Argentina and financial crisis in Turkey and the persistent unsustainable debt burdens of many developing countries highlight the practically urgent problem of excessive indebtedness High debt levels can limit a sovereign government's capacity to provide social services necessary for the well-being of its citizens and divert resources and energy from the pursuit of long-term development strategies In this book philosophers theologians lawyers and economists examine questions related to how to deal fairly with the over-indebted governments of developing countries These questions include How do you balance obligations to repay a debt with potentially worsening poverty in the debtor country Should creditors be held accountable and if so how for loans to governments that are not even minimally representative of their people's interests Are there reforms to the practices governing sovereign borrowing and lending to sovereigns that would increase fairness in how the world treats developing countries with debt difficulties
