Looking At Senses:

Ritual, Performance and the Senses Jon P. Mitchell, Michael Bull, 2015-02-26 Ritual has long been a central concept in anthropological theories of religious transmission. Ritual Performance and the Senses offers a new understanding of how ritual enables religious representations, ideas, beliefs, values to be shared among participants. Focusing on the body and the experiential nature of ritual, the book brings together insights from three distinct areas of study: cognitive neuroanthropology, performance studies, and the anthropology of the senses. Eight chapters by scholars from each of these sub-disciplines investigate different aspects of embodied religious practice, ranging from philosophical discussions of belief to explorations of the biological processes taking place in the brain itself. Case studies range from miracles and visionary activity in Catholic Malta to meditative practices in theatrical performance, and include three pilgrimage sites: the Church of the Holy Sepulchre in Jerusalem, the festival of Ramlila in Ramnagar, India, and the mountain shrine of the Lord of the Shiny Snow in Andean Peru. Understanding ritual allows us to understand processes at the very centre of human social life and humanity itself, making this an invaluable text for students and scholars in anthropology, cognitive science, performance studies, and religious studies.

On the Epistemology of the Senses in Early Chinese Thought Jane Geaney, 2002-01-01 By departing from traditional sinological approaches, this method uncovers a detailed picture of certain shared underlying views of sense perception in the Lun Yu, the Mozi, including the Neo Mohist Canons, the Xunzi, the Mencius, the Laozi, and the Zhuangzi. Synaesthesia and the Ancient Senses Shane Butler, Alex Purves, 2014-09-03 Like us, the ancient Greeks and Romans came to know and understand the world through their senses. Yet sensory experience has rarely been considered in the study of antiquity, and when the senses are examined, sight is regularly privileged. *Synaesthesia and the Ancient Senses* presents a radical reappraisal of antiquity's textures, flavours, and aromas, sounds, and sights. It offers both a fresh look at society in the ancient world and an opportunity to deepen the reading of classical literature. The book will appeal to readers in classical society and literature, philosophy, and cultural history. All Greek and Latin is translated, and technical matters are explained for the non-specialist. The introduction sets the ancient senses within the history of aesthetics, and the subsequent essays explore the senses throughout the classical period and on to the modern reception of classical literature. Atheist Mind, Humanist Heart Lex Bayer, John Figdor, 2014-09-26 *Atheist Mind Humanist Heart* asks an essential question for the 45 million Americans who self identify as nonreligious So you don't believe in God now what This question is increasingly

important as one third of young adults under the age of thirty consider themselves nonreligious With a scientific eye and an empathetic heart the authors turn conventional perceptions about atheism on their head They show that atheism need not be reactionary against religion and God but rather that it can offer a clear set of constructive principles to live by which establish atheism as a positive worldview Following a philosophical approach grounded in logic and evidence Bayer and Figdor take readers on an inspiring journey to discover how to live a reasonable ethical and happy life without God The readers are engaged at every step encouraged to self reflect and ultimately uncover their own set of personal beliefs A

The Word ,1910 Aesthetic Genesis Jeff Mitscherling,2009-12-15 In Aesthetic Genesis the author argues for a reversal of the most fundamental tenet of phenomenology namely that all consciousness is intentional that is directed toward an object Mitscherling suggests as a new Copernican hypothesis that intentionality i e directionality gives rise to consciousness This book describes not only the origin or genesis of human cognition in sensation but also the genesis of sensation from intentional structures belonging to nature itself A phenomenological examination of our experience leads to the conclusion that the two sorts of being generally recognized by contemporary science and philosophy that is material being and ideal being prove ontologically inadequate to account for this experience Mitscherling rehabilitates the pre modern concepts of intentional being and formal causality and employs them in the construction of a comprehensive phenomenological analysis of embodiment aesthetic experience the interpretation of texts moral behavior and cognition in general *Change and Continuity in the English Language* Martti Juhani Rudanko,1998 While earlier treatments of English verb syntax from a diachronic perspective exist this book breaks entirely fresh ground with its focus on the detailed study of English predicate complementation over the past three centuries It draws data from an unprecedented combination of authoritative sources including computer corpora and H Poutsma s unpublished dictionary and offers novel systematizations of predicates and discussions of alternation By giving ample evidence of both change and continuity in the language over the past three hundred years the book opens up a new research field in the study of the English language
