Rethinking Careers Education and Guidance Ruth Hawthorn, Jennifer M. Kidd, John Killeen, Bill Law, A. G. Watts, 2002-11 This is the first book to cover theory policy and practice in all sectors of careers education and guidance provision It is an essential text for students in initial training those engaged in in service and higher degree work Career Development as a Partner in Nation Building Australia Wendy Patton, 2019-07-15 Despite examples of vocational guidance practice being evident in Australia since the mid 1800s there remains a spasmodic and patchwork approach to practice across the country For decades it is a field which has been paradoxically boosted and challenged by changing economic and political agendas Repeated international national and State reviews emphasise the vital nature of a systemic national approach to career development however authors repeatedly lament the lack of a sustained focus on career activity as a major national priority There is no broad comprehensive historical reckoning of the history of career development theory and practice in Australia since this early period Career development theory and practice in Australia has been forged in partnership with developments in an international context In documenting the shared history with other countries the author significantly adds to the body of knowledge on career development as a field in Australia and internationally The book provides new understandings about the historical development of this field of knowledge and in particular the challenging and cyclical nature of its policy history **Reports on the Implementation of the Vocational Education Amendments of 1968** United States. Congress. House. Committee on Education and Labor. General Subcommittee on Education, 1973 *Careers*

Guidance in Context Bill Gothard, Phil Mignot, Marcus Offer, Melvyn Ruff, 2001-09-04 Helping others to make occupational choices requires a combination of skill and a deep understanding of the world of work as it is today and will be in the future Unlike texts that focus only on skill *Careers Guidance in Context* is designed to develop understanding of the factors that shape both the labour market and careers guidance as an occupation in itself *Careers Guidance in Context* re evaluates the concept of a career in the light of economic restructuring globalization and the growth of information technology It draws together up to date theories about guidance work and debates the importance of integrating theory and practice Examining the processes in which practitioners engage when working with individual clients the book also explores careers guidance within a group setting an area that has previously been neglected in the literature The book will be invaluable to students on courses in careers guidance counselling and education It will also be of great interest to professionals who need to keep up to date with current thinking and practice
