Gypsies in Madrid Paloma Gay y Blasco,2020-05-26 Throughout the twentieth century Spanish people have deployed conflicting sexual moralities in their struggle for political supremacy within the state The Spanish Gypsies or Gitanos who live at the very bottom of the Spanish socio economic scale have appropriated this concern with gender morality and in the process have reinvented themselves as the only honourable Spaniards Although the Gitano gender ideology has a distinctively Spanish flavour it revolves around a conceptualization of the female body that is radically different from that of other Spaniards The subtle exploration of these acts of cultural invention is one of the original features of this important new ethnography Another even more striking aspect of the work is the author s vision of the impermanent nature of the Gitano social order and the absence of any representation of community or society Unlike their non Gypsy neighbours Gitanos do not use concepts of tradition territory or social harmony as bases for their singularity Instead they focus on the evaluation of personal moral performances in the present In a cultural universe where all activities are markers of shared identity and where personhood is always sexed men and women continually enact the superiority of Gypsies over non Gypsies Through dress manner and the management of emotions or at wedding rituals where the virginity of young brides is put to the test the body works as the site of these processes **Strangers to Relatives** Sergei Kan,2001-01-01 Strangers to Relatives is an intimate and illuminating look at a typical but misunderstood part of anthropological fieldwork in North America the adoption and naming of anthropologists by Native families and communities Adoption and naming have long been a common way for

Native peoples in Canada and the United States to deal with strangers who are not enemies For over a century adoption and naming have also served as an important means for many Native American and First Nation communities to become connected to the anthropologists visiting and writing about them In this outstanding volume leading anthropologists in the United States and Canada discuss this issue by focusing on the cases of such prominent earlier scholars as Lewis Henry Morgan and Franz Boas They also share personal experiences of adoption and naming and offer a range of stimulating perspectives on the significance of these practices in the past and today The contributors explore the impact of adoption and naming upon the relationship between scholar and Native community considering in particular two key issues How does adoption affect the fieldwork and subsequent interpretations by anthropologists and in turn how are Native individuals and communities themselves affected by adopting an outside scholar whose aim is to learn and write about them Strangers to Relatives not only sheds valuable light on how anthropology fieldwork is conducted but also makes a seminal contribution to our understanding of the ongoing often troubled relationship between the academy and Native communities

Gypsy Economy Micol Brazzabeni, Manuela Ivone Cunha, Martin Fotta, 2015-11-01 Economic arrangements of Romanies are complexly related to their social position The authors of this volume explore these complexities including how economic exchanges forge key social relationships of gender and ethnicity how economic opportunities are constructed and seized and how economic success and failure are transformed into attributes of social persons They explore how despite or perhaps because of their unstable and ambiguous position within the market economy shared today with a growing number of people facing precarity and informalisation Roma and Gypsy communities continuously re create more or less viable economic strategies The ethnographically based chapters share accounts of socially and economically vulnerable populations that face their situation with self determination and creativity

Magolda, 2023-07-03 This unique study uncovers the lives and working conditions of a group of individuals who are usually rendered invisible on college campuses the custodians who daily clean the offices residence halls bathrooms and public spaces In doing so it also reveals universities equally invisible practices that frequently contradict their espoused values of inclusion and equity and their profession that those on the margins are important members of the campus community This vivid ethnography is the fruit of the year s fieldwork that Peter Magolda s undertook at two universities His purpose was to shine a light on a subculture that neither decision makers nor campus community members know very much about let alone understand the motivations and aspirations of those who perform this work and to pose fundamental questions about the moral implications of the corporatization of higher education and its impact on its lowest paid and most vulnerable employees Working alongside and learning about the lives of over thirty janitorial staff Peter Magolda becomes privy to acts of courage resilience and inspiration as well as witness to their work ethic and to instances of intolerance inequity and injustices We learn the stories of remarkable people and about their daily concerns their fears and contributions Peter Magolda raises such

questions as Does the academy still believe wisdom is exclusive to particular professions or classes of people Are universities really inclusive Is addressing service workers concerns part of the mission of higher education If universities profess to value education why make it difficult for those on the margins such as custodians to get educated The book concludes with the research participants and the author s reflections about ways that colleges can improve the lives of those whose underpaid and unremarked labor is so essential to the smooth running of their campuses Appendices provide information about the research methodology and methods as well as a discussion of the influence of corporate managerialism on ethnographic research

Overseas Research Christopher Brendan Barrett, Jeffrey W. Cason, 1997 Scholars and students engaged in overseas research projects often spend much of their time worrying about mundane details never reported in published research In fact the quality of scholarship often depends on the researcher s ability to navigate a bewildering array of social financial bureaucratic and logistical obstacles encountered in preparing for working in and recovering from the field *Overseas Research A Practical Guide* is the first book designed explicitly to prepare scholars and professionals for the real life challenges of living and working abroad Opening with a discussion of site selection and project funding the authors advise researchers on preparing for departure setting up residence in the field conducting research in an unfamiliar environment employing field assistants and organizing for and adjusting to the return home The text is supplemented with the insights anecdotes and tips from more than sixty scholars in a wide variety of disciplines who conducted research in more than forty countries

Reconciling and Rehumanizing Indigenous-Settler Relations , Nadia Ferrara, 2015-02-12

Reconciling and Rehumanizing Indigenous Settler Relations An Applied Anthropological Perspective presents a unique and honest account of an applied anthropologist's experience in working with Indigenous peoples of Canada. It illustrates Dr. Nadia Ferrara's efforts in reconciliation and rehumanization showing that it is all about recognizing our shared humanity. In this self-reflective narrative the author describes her personal experience of marginalization and how it contributed to a more in-depth understanding of how others are marginalized as well as the fundamental sense of belongingness and connectedness. The book is enriched with stories and insights from her fieldwork as a clinician, a university professor and a bureaucrat. Dr. Ferrara shows how she has applied her experience as an art therapist in Indigenous communities to her current work in policy development to ensure the policies created reflect their current realities. Reconciling and Rehumanizing Indigenous Settler Relations describes the cultural competency course for public servants Dr. Ferrara is leading as a means to break down stereotypes and showcase the resilience of Indigenous peoples. She makes a compassionate and urgent call to all North Americans to connect with their responsibility and compassion and acknowledge the injustices that the original peoples of this land have faced and continue to face. Reconciliation requires concrete action and it starts with the individual's self-reflection, engagement in authentic human-to-human dialogue, learning from one another and working together towards a better future, all of which is chronicled in this insightful book.
