Perspectives On Northern Northwest Coast Prehistory:

Perspectives on Northern Northwest Coast Prehistory Jerome S. Cybulski, 2001-01-01 Thirteen scientists provide insight into the archaeology of the north coast of British Columbia in celebration of fieldwork begun by George F MacDonald for the National Museum of Canada in 1966 This book investigates paleoenvironmental influences on human settlement theoretical concepts involved in northern Northwest Coast research and the interplay of aboriginal oral traditions and archaeological findings Published in English **Household Archaeology on the Northwest Coast** Elizabeth A. Sobel, D. Ann Trieu Gahr, Kenneth A. Ames, 2006-07-01 Since the late 1970s household archaeology has become a key theoretical and methodological framework for research on the development of permanent social inequality and complexity as well as for understanding the social political and economic organization of chiefdoms and states This volume is the cumulative result of more than a decade of research focusing on household archaeology as a means to gain understanding of the evolution of social complexity regardless of underlying economy **The Oxford Handbook of North American Archaeology** Timothy R. Pauketat, 2012-02-23 The Oxford Handbook of North American Archaeology reviews the continent's first and last foragers farmers and great pre Columbian civic and ceremonial centers from Chaco Canyon to Moundville and beyond *The Routledge Handbook of the Bioarchaeology of Human Conflict* Christopher Knüsel, Martin Smith, 2013-12-17 If human burials were our only window onto the past what story would they tell Skeletal injuries constitute the most direct and unambiguous evidence for violence in the past Whereas weapons or defenses may simply be statements of prestige or status and written sources are characteristically biased and incomplete human remains offer clear and unequivocal evidence of physical aggression reaching as far back as we have burials to examine Warfare is often described as senseless and as having no place in society Consequently its place in social relations and societal change remains obscure The studies in The Routledge Handbook of the Bioarchaeology of Human Conflict present an overview of the nature and development of human conflict from prehistory to recent times as evidenced by the remains of past people themselves in order to explore the social contexts in which such injuries were inflicted A broadly chronological approach is taken from prehistory through to recent conflicts however this book is not simply a catalogue of injuries illustrating weapon development or a narrative detailing progress in warfare but rather provides a framework in which to explore both continuity and change based on a range of important themes which hold continuing relevance throughout human development **Journal of Northwest Anthropology** Darby C. Stapp, Exploring Ancient Wood and Fiber Technologies along the Northwest Coast of North America Dale R Croes and Kathleen Hawes Ground Penetrating Radar Studies at the HAMMER Test Bed Facility Richland Washington Lawrence B Conyers An Experimental Archaeological Study of the Effects of Off Road Vehicles on Lithic Scatters Carolyn R Temple and Robert Lee Sappington Digging for Wealth Archaeological and Historical Analysis of an Early Twentieth Century Ore Processing Mill Site in Shoshone County Idaho Ashley M Morton and Robert Lee Sappington Graduate student paper winner

Adapt and Adopt Aps alooke Crow Beadwork and Regalia from the Nineteenth Century to Today Kiley E Molinari
Undergraduate student paper winner An Exploration of Intentions and Perceptions of Code Switching among Bilingual Spanish English Speakers in the Inland Northwest Grace F Cooper **The Archaeology of North Pacific Fisheries**
Madonna L. Moss,Aubrey Cannon,2011-11-15 For thousands of years fisheries were crucial to the sustenance of the First Peoples of the Pacific Coast Yet human impact has left us with a woefully incomplete understanding of their histories prior to the industrial era Covering Alaska British Columbia and Puget Sound The Archaeology of North Pacific Fisheries illustrates how the archaeological record reveals new information about ancient ways of life and the histories of key species Individual chapters cover salmon as well as a number of lesser known species abundant in archaeological sites including pacific cod herring rockfish eulachon and hake In turn this ecological history informs suggestions for sustainable fishing in today s rapidly changing environment **Handbook of Archaeological Theories** R. Alexander Bentley,Herbert D. G. Maschner,Christopher Chippindale,2009-09-16 This handbook a companion to the authoritative Handbook of Archaeological Methods gathers original authoritative articles from leading archaeologists on all aspects of the latest thinking about archaeological theory It is the definitive resource for understanding how to think about archaeology **The Oxford Handbook of Wetland Archaeology** Francesco Menotti,Aidan O'Sullivan,2013 This Handbook sets out the key issues and debates in the theory and practice of wetland archaeology which has played a crucial role in studies of our past Due to the high quantity of preserved organic materials found in humid environments the study of wetlands has allowed archaeologists to reconstruct people s everyday lives in great detail **North American Indigenous Warfare and Ritual Violence** Richard J. Chacon,Rubén G. Mendoza,2013-02 This groundbreaking book presents clear evidence from multiple academic disciplines that indigenous populations engaged in warfare and ritual violence long before European contact **Emerging from the Mist** Quentin Mackie,Gary Coupland,R.G. Matson,2011-11-01 Our understanding of the precontact nature of the Northwest Coast has changed dramatically over the last twenty years This book brings together the most recent research on the culture history and archaeology of a region of longstanding anthropological importance whose complex societies represent the most prominent examples of hunters and gatherers Combining archaeology ethnohistory and ethnography this collection investigates several aspects of this cultural complexity carrying on the intellectual traditions of Donald H Mitchell and Wayne Suttles Its interdisciplinary approach creates a broader context in which to interpret the past The generously illustrated chapters address a wide range of topics and include original and penetrating analyses of the fur trade migration household structures and precontact metallurgy and architecture Emerging from the Mist updates and expands our understanding of the nature and evolution of precontact Northwest Coast society to reveal the vibrant rich cultures that existed there Scholars and students of archaeology and anthropology and those with an interest in Northwest Coast history will find this volume especially rewarding
