Prikladnaia Matematika I Informatika

**Alexey Beskopylny, Mark
Shamtsyan, Viktor Artiukh**

Prikladnaia Matematika I Informatika:

Mathematical Analysis With Applications Sandra Pinelas, Arkadii Kim, Victor Vlasov, 2020-05-26 This proceedings volume covers research in key areas of applied mathematical analysis and gathers works presented at the international conference Concord 90 in honor of the 90th birthday of Professor Constantin Corduneanu 1928 2018 The event which Professor Corduneanu was able to attend was held at Ural Federal University in Ekaterinburg Russia on July 26 28 2018 Professor Corduneanu's research in mathematical analysis spanned nearly seven decades and explored a range of important issues in the field including studies of global existence stability problems and oscillation theory with special emphasis on various classes of nonlinear equations He published over two hundred articles and several books including *Almost Periodic Oscillations and Waves* Springer 2009 In this volume the reader will find selected peer reviewed articles from seven fields of research Differential Equations Optimal Control and Stabilization Stochastic Methods Topology and Functions Approximation Mathematical Biology and Bioinformatics Mathematical Modeling in Mining Mathematical Modeling in Economics and Computer Science and Image Processing which honor and reflect Professor Corduneanu's legacy in the fields of oscillation stability and control theory

Multiple Access Communications Alexey Vinel, Boris Bellalta, Claudio Sacchi, Andrey Lyakhov, Miklos Telek, Miquel Oliver, 2010-09-03 This book constitutes the proceedings of the Third International Workshop on Multiple Access Communications MACOM 2010 held in Barcelona Spain in September 2010 The 21 full papers and 6 poster papers presented were carefully reviewed and selected from 40 submissions They are divided in topical sections on medium access control multiuser detection and advanced coding techniques queuing systems wireless mesh networks and WIMAX advanced topics in wireless networks and mobile ad hoc networks

Mathematical Optimization Theory and Operations Research: Recent Trends Michael Khachay, Yury Kochetov, Anton Ereemeev, Oleg Khamisov, Vladimir Mazalov, Panos Pardalos, 2023-09-20 This book constitutes refereed proceedings of the 22nd International Conference on Mathematical Optimization Theory and Operations Research Recent Trends MOTOR 2023 held in Ekaterinburg Russia during July 2 8 2023 The 28 full papers and one invited paper presented in this volume were carefully reviewed and selected from a total of 61 submissions The papers in the volume are organized according to the following topical headings mathematical programming stochastic optimization discrete and combinatorial optimization operations research optimal control and mathematical economics and optimization in machine learning

Optimization Models and Methods for Equilibrium Traffic Assignment Alexander Krylatov, Victor Zakharov, Tero Tuovinen, 2019-11-26 This book is focused on the discussion of the traffic assignment problem the mathematical and practical meaning of variables functions and basic principles This work gives information about new approaches methods and algorithms based on original methodological technique developed by authors in their publications for the past several years as well as corresponding prospective implementations The book may be of interest to a wide range of readers such as civil engineering students traffic engineers developers of traffic assignment

algorithms etc The obtained results here are to be used in both practice and theory This book is devoted to the traffic assignment problem formulated in a form of nonlinear optimization program The most efficient solution algorithms related to the problem are based on its structural features and practical meaning rather than on standard nonlinear optimization techniques or approaches The authors have carefully considered the meaning of the traffic assignment problem for efficient algorithms development **Prіami Ta Obnreneni Zadachi Teorii Elektromahnitnykh Ta Akustychnykh Khvyl'** ,2001

Stability and Control Processes Nikolay Smirnov,Anna Golovkina,2022-03-15 The proceedings of the 4th Stability and Control Processes Conference are focused on modern applied mathematics stability theory and control processes The conference was held in recognition of the 90th birthday of Professor Vladimir Ivanovich Zubov 1930 2000 This selection of papers reflects the wide ranging nature of V I Zubov s work which included contributions to the development of the qualitative theory of differential equations the theory of rigid body motion optimal control theory and the theory of electromagnetic fields It helps to advance many aspects of the theory of control systems including questions of motion stability nonlinear oscillations in control systems navigation and reliability of control devices vibration theory and quantization of orbits The disparate applications covered by the book in mechanical systems game theory solid state physics socio economic systems and medical and biological systems control automata and navigation are developments from Professor Zubov s in depth studies on the theory of stability of motion the theory of automatic control and the theory of the motions of optimal processes Stability and Control Processes presents research continuing the legacy of V I Zubov and updates it with sections focused on intelligence based control These proceedings will be of interest to academics professionals working in industry and researchers alike **Frontiers in Robotics and Electromechanics** Andrey Ronzhin,Viacheslav Pshikhopov,2023-03-01 This book introduces intellectual control systems and electromechanics of heterogeneous robots The book uncovers fundamental principles of robot control and recent developments in software and hardware of robots The book presents solutions and discusses problems of single robotic devices as well as heterogeneous robotic teams while performing technological tasks that require informational physical or energetic interaction with human users environment and other robots The book considers model algorithmic and software hardware control of ground water and underwater robots unmanned aerial vehicles as well as their embedded and attached sub systems including manipulators end effectors sensors actuators etc The book will be useful for researchers of interdisciplinary issues related to robotics electromechanics and artificial intelligence The book is recommended for graduate students with a major minor in the areas of robotics and mechatronics management in technical systems Internet of Things artificial intelligence electrical engineering mechanical engineering and computer science **Mathematical Optimization Theory and Operations Research** Yury Kochetov,Michael Khachay,Anton Ereemeev,Panos Pardalos,2025-07-05 This book LNCS 15681 constitutes the refereed proceedings of the 24th International Conference on Mathematical Optimization Theory and Operations Research MOTOR

2025 held in Novosibirsk Russia during July 7-11 2025 The 27 full papers were carefully reviewed and selected from 72 submissions The proceeding focus on Mathematical Programming Optimal Control Game Theory Operations Research and Applications Machine Learning and Optimization *Frontiers of Dynamic Games* Leon A. Petrosyan, Vladimir Mazalov, Nikolay A. Zenkevich, 2024-10-11 This book collects a selection of the articles presented at the virtual conference Game Theory and Applications organized in St Petersburg in the summer of 2022 The articles in this collection cover all the main applications of game theory interpolating mathematical methods with economics biology sociology mobile systems and social networks Scholars in the field will find this to be a valuable contribution **Retrial Queueing Systems** J. R. Artalejo, Antonio Gómez-Corral, 2008-05-07 The application of auto repeat facilities in telephone systems as well as the use of random access protocols in computer networks have led to growing interest in retrial queueing models Since much of the theory of retrial queues is complex from an analytical viewpoint with this book the authors give a comprehensive and updated text focusing on approximate techniques and algorithmic methods for solving the analytically intractable models Retrial Queueing Systems A Computational Approach also Presents motivating examples in telephone and computer networks Establishes a comparative analysis of the retrial queues versus standard queues with waiting lines and queues with losses Integrates a wide range of techniques applied to the main M/G/1 and M/M/c retrial queues and variants with general retrial times finite population and the discrete time case Surveys basic results of the matrix analytic formalism and emphasizes the related tools employed in retrial queues Discusses a few selected retrial queues with QBD GI/M/1 and M/G/1 structures Features an abundance of numerical examples and updates the existing literature The book is intended for an audience ranging from advanced undergraduates to researchers interested not only in queueing theory but also in applied probability stochastic models of the operations research and engineering The prerequisite is a graduate course in stochastic processes and a positive attitude to the algorithmic probability Recent Advances of the Russian Operations Research Society Fuad Aleskerov, Alexander Vasin, 2020-03-30 This collection of articles highlights the most interesting new results from the IX Moscow International Operations Research Conference the largest Russian meeting in this field held every three years for leading experts These papers will interest researchers and organizations specialized in OR Game Theory System Analysis Macro and Micro economic Modelling and Actuarial Mathematics The volume may be a source for PhD and Master students in the specified areas The proposed methods for optimal decision making will be useful for insurance and auditing companies banks and others The volume consists of three parts the first includes game theoretic models the second part considers innovations and their possible opposite impact to the growth of GDP and social welfare as well as new methods for improving reliability of banks credit risks monopolistic competition under heterogeneous labor interregional trade and different ways of developing the Russian banking system The last part contains articles on a wide range of optimization problems and their applications *Internet Science* Svetlana S. Bodrunova, Olessia Koltsova, Asbjørn Følstad, Harry

Halpin, Polina Kolozaridi, Leonid Yuldashev, Anna Smoliarova, Heiko Niedermayer, 2019-04-18 This book constitutes the refereed post conference proceedings of 4 workshops held at the 5th International Conference on Internet Science St Petersburg Russia in October 2018 Workshop 1 Detecting Social Problems in Online Content Workshop 2 CONVERSATIONS Workshop 3 The Future of Decentralized Governance A Workshop on Encryption Blockchains and Personal Data and Workshop 4 Internet as an issue An international workshop on government and media narratives The 20 full papers presented together with 4 short papers were carefully reviewed and selected from 38 submissions The contributions of the Workshop 1 Detecting Social Problems in Online Content has united Russian scholars who work upon Russian language datasets Workshop 2 CONVERSATIONS An international workshop on chatbot research and design regularly discusses the novel issues in their research and production area Workshop 3 The Future of Decentralized Governance A Workshop on Encryption Blockchains and Personal Data At this workshop scholars and industry representatives from France the Netherlands the UK and Russia have discussed distributed governance technologies based on blockchain and other privacy protecting technologies Workshop 4 Internet as an issue An international workshop on government and media narratives took a rare approach and regarded Internet as a focus for public discussion

Digital Technologies in Teaching and Learning Strategies Alexandr Lyapin, Olga Kalinina, 2022-05-03 This book demonstrates the benefits and drawbacks of using digital technology in preparing online lessons and educational activities The experience of the last year has shown that online education is becoming a priority This gave impetus to the creation and development of a new generation of equipment for online education The book presents latest innovative technologies and modern digital trends in the field of information and communication technology for online education including personalized learning neuro information systems mobile learning development of software and hardware infrastructure and the use of robotics technologies Key technologies for managing risk and cybersecurity such as cloud and data security identity and trust convolution systems computational intelligence and cryptography techniques malware and attack analysis are presented The topic of cybersecurity is one of the most important issues in the modern digital world The results of the research on recently developed software decision support systems and cloud technologies make a huge contribution to the development of information technology in the context of digitalization This book is of interest for developers of applications and programs for online education for software and hardware suppliers who want to keep up with the times and reorient existing IT systems for use in online education

Convergent Cognitive Information Technologies Vladimir Sukhomlin, Elena Zubareva, 2020-01-31 This book constitutes the refereed proceedings of the Third International Conference on Convergent Cognitive Information Technologies Convergent 2018 held in Moscow Russia in December 2018 The 26 revised full papers and 9 short papers were carefully reviewed and selected from 147 submissions The papers of this volume are organized in topical sections on theoretical questions of computer science computational mathematics computer science and cognitive information technologies cognitive information technologies in

control systems big data and applications the Internet of Things IoT standards communication and information technologies network applications smart cities standards cognitive information technologies and their applications cognitive information technologies in the digital economics digital transformation of transport **Materials Engineering and Technologies for Production and Processing II** Andrey A. Radionov, G.G. Mikhailov, Denis Vinnik, 2016-09-05 Selected peer reviewed papers from the International Conference on Industrial Engineering May 19 20 2016 Chelyabinsk Russian Federation **XV International Scientific Conference “INTERAGROMASH 2022”** Alexey Beskopylny, Mark Shamtsyan, Viktor Artiukh, 2023-02-04 The book contains proceedings of the XV International Scientific Conference INTERAGROMASH 2022 Rostov on Don Russia The agro industrial complex is the most extensive and vital industry It is rapidly developing by introducing the latest technologies and automating various processes necessary for the functioning of this area The book is dedicated to engineering technologies of precision farming and agricultural robotics It includes studies on natural resources variability sustainable soil management Agro Big Data Internet of Things software and mobile apps for precision agriculture smart weather for precision agriculture simulations models and decision support systems expert systems DGPS soil physical and chemical characteristic sensors machinery etc Different types of agricultural robots are presented in the book autonomous fruit picking robots farming bots that can seed and water plants test the soil and remove weeds completely autonomous robot for ecological and economical ultra high precision spraying and weeding harvesting robots with the special vision systems that can see fruits and understand whether they re ripe and ready to pick and others Also the book covers advances in agricultural biotechnology in such areas of research as crop production improvement practices genetic modification as well as microbial biotechnology in agriculture etc The book is aimed for scientists researchers and graduate students It is also useful for representatives of regional authorities as it gives an idea of existing high tech solutions for agriculture The book is written and edited by international researchers academics and experts in the corresponding research areas *Noise Resistance Enhancement in Aircraft Navigation and Connected Systems* Dmitry Alexandrovich Zatuchny, Ruslan Nikolaevich Akinshin, Nina Ivanovna Romancheva, Igor Viktorovich Avtin, Yury Grigorievich Shatrakov, 2021-04-10 This book presents methods and algorithms to improve noise immunity of the navigation systems of civil aviation aircraft operating on the basis of satellite radio navigation systems as well as improving the quality of the transmission of navigation information by selecting a rational communication resource The book provides for its productive perception both by specialists involved in the development and operation of radio electronic equipment responsible for navigation and communication support of civil aviation aircraft as well as by graduate students or senior students since this book examines in detail the promising fields of development of these tools taking into account the need to comply with all requirements for noise immunity **Analysis of Images, Social Networks and Texts** Wil M.P. van der Aalst, Dmitry I. Ignatov, Michael Khachay, Sergei O. Kuznetsov, Victor Lempitsky, Irina A. Lomazova, Natalia Loukachevitch, Amedeo

Napoli,Alexander Panchenko,Panos M. Pardalos,Andrey V. Savchenko,Stanley Wasserman,2017-12-20 This book constitutes the proceedings of the 6th International Conference on Analysis of Images Social Networks and Texts AIST 2017 held in Moscow Russia in July 2017 The 29 full papers and 8 short papers were carefully reviewed and selected from 127 submissions The papers are organized in topical sections on natural language processing general topics of data analysis analysis of images and video optimization problems on graphs and network structures analysis of dynamic behavior through event data social network analysis

Recent Approaches in the Theory of Plates and Plate-Like Structures Holm Altenbach,Svetlana Bauer,Victor A. Eremeyev,Gennadi I. Mikhasev,Nikita F. Morozov,2022-01-01 This book presents the various approaches in establishment the basic equations of one and two dimensional structural elements In addition the boundaries of validity of the theories and the estimation of errors in approximate theories are given Many contributions contain not only new theories but also new applications which makes the book interesting for researcher and graduate students

Sixty Shades of Generalized Continua Holm Altenbach,Arkadi Berezovski,Francesco dell'Isola,Alexey Porubov,2023-02-13 In this book well known scientists discuss modern aspects of generalized continua in order to better understand modern materials and advanced structures They possess complicated internal structure and it requires the development of new approaches to model such structures and new effects caused by it This book combines fundamental contributions in honor of Victor Eremeyev and his 60th birthday

Delve into the emotional tapestry woven by in **Prikladnaia Matematika I Informatika** . This ebook, available for download in a PDF format (Download in PDF: *), is more than just words on a page; it is a journey of connection and profound emotion. Immerse yourself in narratives that tug at your heartstrings. Download now to experience the pulse of each page and let your emotions run wild.

Prikladnaia Matematika I Informatika Introduction

Prikladnaia Matematika I Informatika Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Prikladnaia Matematika I Informatika Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Prikladnaia Matematika I Informatika : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Prikladnaia Matematika I Informatika : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Prikladnaia Matematika I Informatika Offers a diverse range of free eBooks across various genres. Prikladnaia Matematika I Informatika Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Prikladnaia Matematika I Informatika Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Prikladnaia Matematika I Informatika, especially related to Prikladnaia Matematika I Informatika, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Prikladnaia Matematika I Informatika, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Prikladnaia Matematika I Informatika books or magazines might include. Look for these in online stores or libraries. Remember that while Prikladnaia Matematika I Informatika, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Prikladnaia Matematika I Informatika eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Prikladnaia Matematika I Informatika full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Prikladnaia Matematika I Informatika eBooks, including some popular titles.

FAQs About Prikladnaia Matematika I Informatika Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Prikladnaia Matematika I Informatika is one of the best book in our library for free trial. We provide copy of Prikladnaia Matematika I Informatika in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Prikladnaia Matematika I Informatika. Where to download Prikladnaia Matematika I Informatika online for free? Are you looking for Prikladnaia Matematika I Informatika PDF? This is definitely going to save you time and cash in something you should think about.
