Primer Of Multivariate Statistics:

A Primer of Multivariate Statistics Richard J. Harris, 2001-05-01 Drawing upon more than 30 years of experience in working with statistics Dr Richard J Harris has updated A Primer of Multivariate Statistics to provide a model of balance between how to and why This classic text covers multivariate techniques with a taste of latent variable approaches Throughout the book there is a focus on the importance of describing and testing one s interpretations of the emergent variables that are produced by multivariate analysis This edition retains its conversational writing style while focusing on classical techniques The book gives the reader a feel for why one should consider diving into more detailed treatments of computer modeling and latent variable techniques such as non recursive path analysis confirmatory factor analysis and hierarchical linear modeling Throughout the book there is a focus on the importance of describing and testing one s interpretations of the emergent variables that are produced by multivariate analysis

General Technical Report RM. ,1981 Sediment Quality Assessment Stuart Simpson, Graeme Batley, 2016-02 Contaminated sediments represent an ongoing threat to the health of aquatic ecosystems The assessment of sediment quality is therefore an important concern for environmental regulators Sediment quality guidelines are now well

established in regulatory frameworks worldwide however practical guidance that covers all of the key aspects of sediment quality assessment is not readily available In 2005 CSIRO published its highly cited Handbook for Sediment Quality Assessment In the ensuing period the science has advanced considerably This practical guide is a revised and much expanded second edition which will be a valuable tool for environmental practitioners Written by experts in the field it provides coverage of sediment sampling sample preparation chemical analysis ecotoxicology bioaccumulation biomarkers and ecological assessment In addition detailed appendices describe protocols for many of the tests to be used
