Karst Hydrogeology and Human Activities: Impacts, Consequences and Implications David Drew, 2017-10-05 One quarter of the world's population lives in karst terrains yet karsts are highly vulnerable to stresses caused by human activity. This book surveys human impact on karst water showing that the increasing pollution of the environment has to a great extent spoiled sensitive karst ecosystems. This text examines such consequences and offers proposals for future solutions and strategies. Part One provides an overview of the functioning of karsts and of human interaction with karst environments over several millennia. Part Two consists of a systematic examination of the major areas of human activity affecting karst waters such as agriculture, industry, mining and water exploitation. Finally, Part Three views the effects on karst groundwater within a broader societal and legislative perspective and considers possible changes of methodology and approach. Groundwater of South Asia Abhijit Mukherjee, 2018-06-01 This book presents recent findings from the South Asian region. SA broadly including groundwater studies on a quantity b exploration c quality and pollution d economics management and policies e groundwater and society and f sustainable sources. It offers a compilation of compelling authentic insights into groundwater scenarios throughout the water stressed South Asia region. Comprising Afghanistan, Bangladesh, Bhutan, India, Myanmar, Nepal, Pakistan and Sri Lanka, it is the most densely populated region in the world. It occupies approximately 4% of the global land area but supports more than 25% of the global population. The SA region now faces an acute shortage of fresh water due to a rapid rise in water demand and changes in societal water use patterns. Combining essential advances and perspectives, this book offers a valuable resource for all scientists, planners and policymakers who are interested in understanding and developing the SA and other related areas. *Proceedings of the 12th EuroSpeleo Forum* Johannes Mattes, Erhard Christian, Lukas Plan, 2018-08-20

Karst Management Philip E. van Beynen, 2011-06-21 Focusing specifically on the management of karst environments, this volume draws together the world's leading karst experts to provide a vital source for the study and management of this unique physical setting. Although karst landscapes cover 12% of the Earth's terrain and provide 25% of the world's drinking water, the resource management of

karst environments has only previously received indirect attention Through a comprehensive approach Karst Management focuses on engineering issues associated with surface karst such as quarries dams and agriculture subsurface topics such as the management of groundwater show caves cave biota and geo archaeology projects Chapters that focus on karst as an integrated system look at IUCN World Heritage sites national parks policy and regulation measuring systematic disturbance information management and public environmental education The text incorporates the most up to date research from leading karst scientists This volume provides important perspectives for university students educators geoengineers resource managers and planners who are interested in or work with this unique physical landscape

Water Resources Engineering in Karst Petar Milanovic,2004-06-11 A definitive guide this book focuses on the design and construction of water infrastructure projects within karst formations and provides engineering approaches for preventing and mitigating their environmental problems It features 200 figures investigative techniques practical design solutions case studies with failure analysis criteria prop

Engineering Karstology of Dams and Reservoirs Petar Milanović,2018-05-15 Karst terrains have been modified and adapted through a range of human activities as the need for flood control irrigation food production hydropower production and other resources has increased Successful reclamation projects require construction of dams and reservoirs Karst terrains present the most

complex working conditions for dam foundation and realization of safe reservoir space Practical engineering solutions are extremely complex and the need for successful solution requires serious investigations and the cooperation of a wide spectrum of scientists and engineers A wealth of data on dam projects in karst has been collected and presented in this book Since reservoirs in karst may fail to fill despite extensive investigations and remediation treatment the book includes a description of failures as well *Karst Hydrogeology and Karst Environment Protection* ,1988 Isotope Tracers in Catchment Hydrology C. Kendall,J.J. McDonnell,2012-12-02 This book represents a new earth systems approach to catchments that encompasses the physical and biogeochemical interactions that control the hydrology and biogeochemistry of the system The text provides a comprehensive treatment of the fundamentals of catchment hydrology principles of isotope geochemistry and the isotope variability in the hydrologic cycle but the main focus of the book is on case studies in isotope hydrology and isotope geochemistry that explore the applications of isotope techniques for investigating modern environmental problems Isotope Tracers in Catchment Hydrology is the first synthesis of physical hydrology and isotope geochemistry with catchment focus and is a valuable reference for professionals and students alike in the fields of hydrology hydrochemistry and environmental science This important interdisciplinary text provides extensive guidelines for the application of isotope techniques for all investigators facing the challenge of protecting precious water soil and ecological resources from the ever increasing problems associated with population growth and environmental change including those from urban development and agricultural land uses
