Radical Agriculture R. Merrill, 1964 **Radical Agriculture** Richard Merrill, 1976 **Radical Agriculture** Richard Merrill, 1976 *We Must Begin with the Land* Stephen Hunt, 2025-04-29 A polyculture of ideas decolonising reframing and transforming how we think about the things we grow through a social ecology lens Terrorism, Radicalism, and Populism in Agriculture Luther G. Tweeten, 2008-06-02 While terrorism in agriculture takes few lives the misinformation emerging from the rhetoric of anti globalists radical environmentalists and animal welfare extremists costs Americans billions of dollars in lost income every year This controversial volume illuminates the political economic and global effects of these groups on the agricultural industry The clear concise and readable book discusses specific events and issues helping readers understand how radical agriculturalists think Tweeten explains how half truths and false ideologies find their way into our political systems and bring about bad public decisions increasing losses and causing global repercussions Terrorism Radicalism and Populism in Agriculture offers enlightenment for anyone involved in business agriculture policy making and politics **The ^AOxford Handbook of Land Politics** Saturnino M. Borras, Jennifer C. Franco, 2025-08-29 Access to land in all its multiple meanings is necessarily diverse complex and contentious and facilitating and maintaining such access constitutes a mosaic of social relations and institutional instruments rather than the minimalist and simplistic reduction of land to land property that in turn tends to be interpreted always as individual private property The Oxford Handbook of Land Politics offers heterodox analytical tools to help the reader make sense of the complexity of the politics of land **Hearings, Reports and Prints of the Senate Committee on Agriculture, Nutrition, and Forestry** United States. Congress. Senate. Committee on Agriculture, Nutrition, and Forestry, 1978 **The Social Risks of Agriculture** Ronald C. Wimberley, Craig K. Harris, Joseph J. Molnar, Terry J. Tomazic, 2002-08-30 In a vast society where environmentally conscious nonfarming voters and consumers have grown to greatly outnumber those directly engaged in agriculture what happens in agriculture becomes increasingly subject to control by the general society as policies and laws cater to constituents and consumers This book provides an overview of how Americans perceive and value farmers and examines public opinion with regard to a number of agricultural issues Based on analysis of national survey data the authors offer an empirically based discussion and interpretation of those views and perceptions that help to shape policy and social sustainability This unique collection illustrates that in addition to its natural biological and economic risks agriculture has social risks that reverberate through all levels of society As the general population grows and the number of farms and farmers diminishes the weight of public opinion becomes more important in the policy arena of society as well as in the market demands for food and fiber grown in safe and favorable environmental conditions Setting the stage with a consideration of the larger society's interests in agricultural issues and of social and agricultural interdependence the contributors cover a range of topics and issues affecting agriculture at the end of the 20th century Chapters examine public perceptions of government's role in farming

support for an environmentally friendly agricultural system views on pesticides and chemicals in foods consumer attitudes on food safety threats to clean drinking water concerns over farm animal welfare and the basic agrarian ethic of American society The book concludes with a look to the future of the social risks of agriculture in the 21st century **Troubled Harvest** Joseph Cotter,2003-09-30 During the 20th century two revolutions swept rural Mexico the Mexican Revolution and the Green Revolution In both revolutionaries promised to address the problems of rural poverty and underdevelopment The Mexican Revolution led to a significant agrarian reform and created the State and elite that governed Mexico since the 1920s The Green Revolution helped increase Mexican agricultural production substantially and in 1970 it won a Nobel Peace Prize for Norman Borlaug who bred dwarf hybrid wheat Mexican agronomists played significant roles in both revolutions but neither revolution brought prosperity to peasant farmers This book examines the history of Mexican agronomy and agronomists to shed new light on the role of science in the Mexican Revolution the origins of the worldwide Green Revolution and general issues about the nature of the professions the impact of professionals ties to politics and the state and discourses between members of Mexico s urban middle class and peasantry Cotter also analyzes the impact of foreign models of science in Mexico the history of U S Mexican cooperation in the agricultural sciences and the factors that led Mexico to seek scientific assistance from the United States In a broad way he reveals new aspects of the ongoing struggle for the right to define modernity and progress in rural Mexico and offers new explanations for the failure of many of the State s efforts to assist peasant farmers *Visions of Freedom* Morris Brian Morris,2019-10-15 Every ten years notoriously eclectic thinker Brian Morris takes a year of sabbatical and launches out into another field about which he knows nothing In the 1980s it was botany in the 1990s zoology in the 2000s entomology The quintessential polymath Morris has written on his incredible breadth of interests in wide ranging essays with subjects ranging from boxing to deep ecology to new age gurus Collected here for the first time *Visions of Freedom* brings together all of Morris s concise yet diverse essays on politics history and ecology written since 1989 It includes book reviews letters and articles in the engaging and accessible style for which Morris is known The thinkers he deals with are as diverse as Thomas Paine to C L R James from Karl Marx to Krishnamurti from Max Weber to Naomi Klein He also delves into the canon of classic anarchist thinkers like Kropotkin Bakunin Reclus Proudhon and Flores Magnon Taking a stance against the obscurantism of contemporary academic discourse Morris writings demonstrate an interdisciplinary approach that moves seamlessly between topics developing practical connections between scholarly debates and the pressing social ecological and political issues of our times **Civic Agriculture** Thomas A. Lyson,2012-05-22 A engaging analysis of food production in the United States emphasizing that sustainable agricultural development is important to community health *Priorities in Agricultural Research of the U.S. Department of Agriculture* United States. Congress. Senate. Committee on the Judiciary. Subcommittee on Administrative Practice and Procedure,1978 **Appropriate Technology and Agriculture in the United States** Ann Becker,1977 *Aesthetics and the Environment*

Allen Carlson, 2005-08-08 Traditional aesthetics is often associated with the appreciation of art Allen Carlson shows how much of our aesthetic experience does not encompass art but nature in our response to sunsets mountains or horizons or more mundane surroundings like gardens or the view from our window He argues that knowledge of what it is we are appreciating is essential to having an appropriate aesthetic experience and that scientific understanding of nature can enhance our appreciation of it rather than denigrate it

Agroecology Stephen R. Gliessman, 2007 Providing the theoretical and conceptual framework for this continually evolving field Agroecology The Ecology of Sustainable Food Systems Second Edition explores environmental factors and complexities affecting agricultural crops and animals Completely revised updated and reworked the second edition contains new data new readings new issues and case studies and new options It includes two completely new chapters one on the role of livestock animals in agroecosystems and one on the cultural and community aspects of sustainable food systems The author clearly delineates the importance of using an ecosystem framework for determining if a particular agricultural practice input or management decision contributes or detracts from sustainability He explains how the framework provides the ecological basis for the functioning of the chosen management strategy over the long term He also examines system level interactions stressing the need for understanding the emergent qualities of populations communities and ecosystems and their roles in sustainable agriculture Using examples of farming systems in a broad array of ecological conditions the book demonstrates how to use an ecosystem approach to design and manage agroecosystems for sustainability

Critical Food Issues Laurel Phoenix, Lynn Walter, 2009-09-03 This authoritative research based collection examines urgent threats to future global food security and evaluates current and potential solutions Critical Food Issues Problems and State of the Art Solutions Worldwide examines 31 crucial areas of concern from soil degradation depletion of water for irrigation and loss of biodiversity to declining rural livelihoods hunger and obesity unjust farm labor practices and farm animal mistreatment Critical Food Issues divides its coverage into two exhaustive volumes one on bioenvironmental topics and one with a sociocultural focus Throughout highly accomplished experts from a variety of academic backgrounds review the current state of research on specific problems then identify strategies for confronting those problems that balance sustainable agrifood systems with environmental stewardship healthy people and equitable communities At a time of increasing public outcries over the quality of food and the impact of agrifood production on long term environmental and human well being Critical Food Issues offers an authoritative and comprehensive basis on which producers consumers and citizens can make more informed decisions about the future of food

The Social Consequences And Challenges Of New Agricultural Technologies Gigi M Berardi, Charles C Geisler, 2019-07-11 Although formal social impact assessment of changing technologies in U S agriculture is still in its infancy scholars have been documenting the effects of new technology throughout the twentieth century In this collection Professors Berardi and Geisler bring together historically relevant research and a carefully chosen cross section of contemporary work Their review of the

literature is followed by an evaluation of the effects of mechanization on labor and production written in 1904 which provides a backdrop for papers from the 1940s and 1950s examining the mechanization of agriculture in the South in the Midwest and in rural areas in general Subsequent chapters offer present day insights on such topics as the socioeconomic consequences of automated vegetable and tobacco harvesting center pivot irrigation and organic and no till cultivation The authors also look at compensation and adjustment programs for displaced labor the relationship between technology and agribusiness growth and the effectiveness of university programs that prepare students to perform social impact assessments in agriculture The edited proceedings of a spirited roundtable discussion on new directions for the study of the social impacts of farm technology and the political economy of agriculture provide the thought provoking conclusion to this overview of the field

Exploring Political Ecology Alexander M. Ervin, 2024-08-30 This book explores some of the conditions and underlying causes of the multiple environmental crises facing humanity Rooted in anthropology but multidisciplinary in scope it surveys the many socio cultural and socio economic errors foibles and follies that brought us to these circumstances Crucially and uniquely it outlines an array of viable and practical solutions some of which are radically different from the current status quo and cultural expectations The first chapter canvasses the emerging interdisciplinary field of political ecology then Part I examines details and trends in agriculture Part II portrays the threats posed by carbon dependent and combusive technologies as well as the hydro and nuclear energy systems now powering the majority of human actions in developed parts of the world and expanding beyond The third part turns to consider solutions including green new deals de growth policies localization agroecology alternative energy systems and many more possibilities The conclusions engage with urgent moral and legal issues and outline social movement strategies all related to our collective neglect of climate change and then finally speculate upon possible futures This book is key reading for researchers and students interested in climate change across the social and physical sciences and humanities
