Sclerosing Bone Dysplasias P. Beighton, B. J. Cremin, 2012-12-06 Much confusion exists in the accurate identification and classification of the many disorders in infancy which affect the skeleton by producing sclerosing lesions throughout the entire skeleton or in selected areas A scholarly effort to bring order into this confusing field must be welcomed Professors Beighton and Cremin have skillfully defined the problem and concisely yet thoroughly have identified the various sclerosing dysplasias They bring to this task a wealth of clinical experience in their many years in the Departments of Radiology at the University of Cape Town Medical School and the Groote Schuur and Red Cross Children's Hospitals in Cape Town South Africa The authors also have had available data from the University of Cape Town Skeletal Dysplasia Registry Professors Beighton and Cremin have used as a basis for their treatise the Paris Nomenclature the modified version of 1977 This monograph is a felicitous combination of a working atlas and a scholarly exposition of the various sclerosing bone dysplasias

considering in detail eighteen major entities adopted from the Paris classification Other disorders which present with osteosclerosis are also described These include Caffey disease oculodento osseous dysplasia central osteosclerosis with bamboo hair fluorosis osteosclerosis associated with renal disease and mastocytosis *Traumatic Disorders of the Ankle* W.C. Hamilton, 2012-12-06 The management of ankle injuries has long been a stumbling block for orthopaedists in training As a first year resident I was fortunate to encounter the series of articles by N Lauge Hansen and T Baek Kristensen that classified ankle injuries according to their mechanism I found this information quite helpful throughout my residency and early years of practice Several years ago an attempt was made to summarize this material for the benefit of the orthopaedic house staff of Thomas Jefferson University It quickly became obvious that such a manual would require a great deal of professional illustration and editorial assistance in order to be effective Almost simultaneously a fortuitous encounter with Ms Marie Low at that time Medical Editor of Springer Verlag New York Incorporated provided both the stimulus and the means to present this information in the manner and detail which it deserved Contributors were carefully selected for their knowledge and experience in particular areas and for their willingness to cooperate in providing a smooth flowing manuscript This text contains little new material Rather it represents an attempt to bring together under one cover the wealth of extant information on this subject Wherever a consensus could not be perceived conflicting views have been summarized as objectively as possible Unfortunately there are still many aspects of ankle injury for which we have more questions than answers Path-Breaking Work in Plastic and Reconstructive Microsurgery Doina

Dumitrescu-Ionescu, 2020-02-25 Path Breaking Work in Plastic and Reconstructive Microsurgery by Dr Doina Dumitrescu Ionescu was reviewed by David Soutar for The Royal College of Surgeons of England This is a refreshingly original and unusual text It is a testament to the life work of the author and her struggle to develop clinical microsurgery in Rumania It takes the reader on a journey starting with learning the basic techniques of microsurgery laboratory and experimental research teaching and training It then progresses to the building of an infrastructure for development and clinical practice the maintenance of meticulous records and the evaluation of results As such the book is a very personal account written in an informal style so that the reader can follow the author's own development and experience The format is unusual beginning with the author's philosophy for developing reconstructive microsurgery It then covers personal techniques developed for peripheral techniques developed for peripheral nerve repairs and microvascular anastomosis It is clear from early on in this book that the author's main interest lies in the management of peripheral nerves particularly in the limbs There is a section on reconstructive microsurgery of the brachial plexus following trauma and a section on limb replantation Says the author The reconstructive microsurgery experience helped me to modernize reparative plastic surgery in Romania in reconstructive plastic surgery and reconstructive microsurgery by radically changing the surgical approach This allowed also for new procedures in Dupuytren's Disease Volkmann and post burn contractures approach revolutionizing everything that was
