Holter, 2016-12 This book will look at the socio-economic conditions which led to the City of Tacoma Washington hosting a grand Independence Day celebration at the dawning of the 20th Century. The special events planned during that week attracted guests from every corner of the state. Transportation systems were woefully inadequate for the throng that arrived, setting the stage for an epic disaster. All of those who were involved in the tragedy were ordinary folks looking to celebrate our nation's independence. In a moment, their lives were inexplicably changed. *The First Transcontinental Railroad* James K. Wheaton, 2011 The First Transcontinental Railroad originally called the Pacific Railroad was a railroad built in the United States between 1863 and 1869 that connected the western part of America with its eastern part. Built by the Central Pacific Railroad of California and the Union Pacific Railroad, it connected the Eastern terminus of Council Bluffs, Iowa, Omaha, Nebraska, with the railroad lines of the Pacific Ocean at Oakland, California. In time, it would link in with the existing railway network present on the Eastern Coast of America, thus connecting the Atlantic and Pacific coast of the United States for the first time by rail. Because of this, the line received a second nickname, the Overland Route. The railroad was a government operation authorized by Congress during the height of the Civil War. Congress passed the Pacific Railroad Acts in 1862 and again in 1864. To pay for it, the US government issued 30-year bonds as well as granting government land to contractors. The construction of the line was a major achievement by both the Union Pacific constructing westward from Iowa and the Central Pacific constructing eastward from California. The line was officially opened on May 10, 1869, with the Last Spike driven through the railway at Promontory Summit, Utah. James K. Wheaton looks at the history in this eBook Tacoma, where the Rails Meet the Sails, 189? Tacoma, Washington
