Nuclear Playground Stewart Firth, 2020-11-19 In the late 1980s it was felt that World War III could start in the Pacific Long regarded by the USA as an American lake the Pacific was now a focus of competition between the superpowers The USSR whose nuclear arms navy was limited to their north Pacific ports now had a major new naval base at Cam Ranh Bay in Vietnam In response to this new threat the Americans were planning more urgently for nuclear war in the Pacific adding to their own mighty arsenal in the region and taunting the Soviets with aggressive surveillance and military exercises The Soviets did the same For 40 years Pacific Islanders have had cause to resent the use of their ocean as a nuclear playground of the five nuclear powers three the USA USSR and China launched missiles into the Pacific for test purposes two the USA and Britain exploded nuclear devices there but had stopped and one France continued to test nuclear bombs in one of its colonies Pacific Islanders now have cause to fear that the ocean is becoming a nuclear battleground Originally published in 1987 this book tells the story of the nuclear men in the Pacific and of those people they displaced and irradiated It is also about what these people and their governments had begun to do in response The nuclear issue had transformed the political landscape of Micronesia and the South Pacific in the 1980s loosening the US grip and making the French increasingly unpopular The people of these remote communities largely forgotten or considered dispensable had a nuclear past made for them Now they want to make their own future

**The Sounding of the Whale** D. Graham Burnett, 2022-12-22 This wonderful book documents the interplays among science conservation and politics in the evolving career of the whale over the last century William Perrin Senior Scientist for Marine Mammals at the Southwest Fisheries Science Center NOAA Fisheries Service From biblical times whales have breached in the human imagination as looming figures of terror power confusion and mystery In the twentieth century however our understanding of and relationship to these superlatives of creation underwent some astonishing changes and with *The Sounding of the Whale* D Graham Burnett tells the fascinating story of the transformation of cetaceans from grotesque monsters useful only as wallowing kegs of fat and fertilizer to playful friends of humanity bellwethers of environmental devastation and finally totems of the counterculture in the Age of Aquarius When Burnett opens his story ignorance reigns even Nature was misclassifying whales at the turn of the century and the only biological study of the species was happening in gruesome Arctic slaughterhouses But in the aftermath of World War I an international effort to bring rational regulations to the whaling industry led to an explosion of global research and regulations that while well meaning were quashed or widely flouted by whaling nations the first shot in a battle that continues to this day The book closes with a look at the remarkable shift in public attitudes toward whales that began in the 1960s as environmental concerns and new discoveries about whale behavior combined to make whales an object of sentimental concern and public adulation A sweeping history grounded in nearly a decade of research *The Sounding of the Whale* tells a remarkable story of how science politics and simple human wonder intertwined to transform the way we see these behemoths from below

The final chapter discusses the evolution and formulation of French foreign policy in historical perspective. The Oxford Handbook of National Security Intelligence Loch K. Johnson, 2010-03-12. The Oxford Handbook of National Security Intelligence is a state-of-the-art work on intelligence and national security. Edited by Loch Johnson, one of the world's leading authorities on the subject, the handbook examines the topic in full, beginning with an examination of the major theories of intelligence. It then shifts its focus to how intelligence agencies operate: how they collect information from around the world, the problems that come with transforming raw information into credible analysis, and the difficulties in disseminating intelligence to policymakers. It also considers the balance between secrecy and public accountability and the ethical dilemmas that covert and counterintelligence operations routinely present to intelligence agencies. Throughout, contributors factor in broader historical and political contexts that are integral to understanding how intelligence agencies function in our information-dominated age.

*France and the South Pacific since 1940* Robert Aldrich, 1993-09-01. For some, Tahiti, New Caledonia, and Wallis and Futuna are idyllic tropical islands with a French flavour; while for others, they represent continuing French colonialism, thwarted independence movements, and nuclear testing. This book looks at the realities of the French territories in Oceania and the former Franco-British condominium of the New Hebrides, now Vanuatu, as well as changing French policy in the region. This study is based on published sources as well as archival material and interviews and is a sequel to the highly praised *The French Presence in the South Pacific 1842-1940*.

*The Light-Green Society* Michael Bess, 2003-11-15. The accelerating interpenetration of

nature and culture is the hallmark of the new light green social order that has emerged in postwar France argues Michael Bess in this penetrating new history On one hand a preoccupation with natural qualities and equilibrium has increasingly infused France's economic and cultural life On the other human activities have laid an ever more potent and pervasive touch on the environment whether through the intrusion of agriculture industry and urban growth or through the much subtler and more well intentioned efforts of ecological management The Light Green Society limns sharply these trends over the last fifty years The rise of environmentalism in the 1960s stemmed from a fervent desire to save wild nature nature conceived as a qualitatively distinct domain wholly separate from human designs and endeavors And yet Bess shows after forty years of environmentalist agitation much of it remarkably successful in achieving its aims the old conception of nature as a separate sphere has become largely untenable In the light green society where ecology and technological modernity continually flow together a new hybrid vision of intermingled nature culture has increasingly taken its place *Environmental Journalism* Henrik Bodker, Irene Neverla, 2014-10-29 Environmental journalism is an increasingly significant area for study within the broader field of journalism studies It connects the concerns of politics science business culture and the natural world whilst also exploring the boundaries between the local regional and global A central and typical focus for its concerns are the global summits convened to share scientific knowledge about global warming and to formulate policies to mitigate its consequences in particular locales But reporting environmental change creates difficulties for journalists who are often ill equipped to resolve the uncertainties in the disputed scientific accounts of climate change This research based collection focuses on aspects of environmental journalism in Australia France Norway Sweden the UK and the USA Contributors present case studies of media reporting of the environment and explore considerations of objectivity and advocacy in journalistic coverage of the environment and climate change This book was originally published as a special issue of Journalism Studies
