**Leading Mind** Peter Hey,2019-02-14 With his blend of engineering and the fields of personal transformation Peter Hey takes us on a deep yet accessible journey into the inner recesses of our minds He presents a unique model of the mind and the mechanisms that define our behavior Based on his own personal experiences as the son of a Holocaust survivor his sessions with his own clients and his background in computer design he brings the concept of programs in our unconscious as the basic mechanism that determines our actions Millions of programs operating below our everyday awareness each of them associated with emotions that in fact are the actual power behind our decisions in daily life *Leading Mind* explains how these programs are created from all our experiences starting already at conception through our

time in the mother's womb all the way to full adulthood. It also shows how when accessing our deep unconscious we discover aspects in us that transcend our current physical life. Based on thousands and thousands of sessions done by practitioners around the world with remarkably consistent results across cultures, education, social status, and personal beliefs, *Leading Mind* shows how the current events that are impacting our civilization nowadays are the result of our emotional ignorance. It brings to light an urgent call to reform our educational curriculum to teach how our mind works and tools for personal transformation and conflict resolution. Understanding our minds brings tolerance and compassion for all. It gives us the knowledge to change our limiting behaviors. The start of real personal power to direct our lives in the direction that is our authentic individual expression.

with alien life forms can be obtained through the inner space dimensions of our minds Presents evidence that other worlds experienced through consciousness altering technologies are often as real as those perceived with our five senses Correlates science fiction s imaginal realms with psychedelic research For thousands of years voyagers of inner space spiritual seekers shamans and psychoactive drug users have returned from their inner imaginal travels reporting encounters with alien intelligences Inner Paths to Outer Space presents an innovative examination of how we can reach these other dimensions of existence and contact otherworldly beings Based on their more than 60 combined years of research into the function of the brain the authors reveal how psychoactive substances such as DMT allow the brain to bypass our five basic senses to unlock a multidimensional realm of existence where otherworldly communication occurs They contend that our centuries old search for alien life forms has been misdirected and that the alien worlds reflected in visionary science fiction actually mirror the inner space world of our minds The authors show that these alien worlds encountered through altered states of human awareness either through the use of psychedelics or other methods possess a sense of reality as great as or greater than those of the ordinary awareness perceived by our five senses
