Studies in Hellenistic Architecture Frederick E. Winter, 2006-12-15 Studies in Hellenistic Architecture is a detailed analysis of the development of the major building types of the Hellenistic age the mid fourth century B C to the time of the Roman conquest of the Eastern Mediterranean In this meticulous work Frederick E Winter reveals how the architects of the period went beyond anything achieved by their Classical Greek predecessors and how these impressive skills prepared the way for many of Rome's later architectural achievements Geographically the monuments included in this volume extend from Spain to Afghanistan and from Provence to North Africa Winter discusses the architectural achievements of the various regional styles of the Eastern Mediterranean and takes a detailed look at Hellenistic developments west of the Adriatic While the interrelationship of these regional developments is often unclear especially in cases where there are no explicit criteria for dating Winter makes excellent use of the advance in scholarship over the past fifty to sixty years offering the first real attempt at a synthesis of this vast subject Studies in Hellenistic Architecture is an invaluable resource containing a wealth of illustrations of the various types of Hellenistic building and the most comprehensive scholarship to date on the topic

Water and Sacred Architecture Anat Geva, 2023-05-25 This edited book examines architectural representations that tie water as a physical and symbolic property with the sacred The discussion centers on two levels of this relationship how water influenced the sacredness of buildings across history and different religions and how sacred architecture expressed the spiritual meaning of water The volume deliberately offers original material on various unique contextual and design aspects of water and sacred architecture rather than an attempt to produce a historic chronological analysis on the topic or focusing on a specific geographical region As such this unique volume adds a new dimension to the study of sacred architecture The book s chapters are compiled by a stellar group of scholars and practitioners from the US Canada Europe Asia and Africa It addresses major aspects of water in religious buildings such as rituals pilgrimage water as a cultural material and place making hydro systems modern practices environmental considerations the contribution of water to transforming secular into sacred and future digital cyber context of water and sacredness All chapters are based on original archival studies historical documents and field visits to the sites and buildings These examinations show water as an expression of architectural design its materiality and its spiritual values The
