San Miguel A Mexican Collective Ejido:

San Miguel Raymond Wilkie, 1971 **Agricultural Economics Research**, 1970 **Peasant Cooperation and Capitalist Expansion in Central Peru** Norman Long, Bryan R. Roberts, 2014-11-06 This book brings together the research into regional development and social change carried out in highland Peru by a team of British and Latin American social anthropologists and sociologists The area studied the Mantaro Valley of central Peru is one of the most densely populated and economically differentiated of highland zones it is also notable for its community based forms of cooperation and its high level of peasant political activity The book presents a series of case studies that examine cooperative forms of organization in relation to developments in the regional economy and to changes in national policy The analysis attempts to avoid interpreting local processes merely as responses to externally initiated change It stresses instead the need to consider the interplay of local and national forces because local groups and processes themselves affect the pattern of regional and national development The case studies cover a range of political and economic topics from peasant movements to the achievements and shortcomings of government sponsored agricultural and manufacturing cooperatives The concluding chapter by the editors explores the theoretical implications of these studies **The Peasant Betrayed** John H. Powelson, Richard Stock, 1990-07-01 After studying land reform in 16 countries and offering illustrative examples from 11 more Powelson and Stock conclude that government land reforms generally harm the rural poor more than help them Detailing case after case in which government intervention has impoverished the peasant the authors find only a few cases in which the government has made the peasant better off In contrast they show that in Third World countries where the state has left farming to the farmer agricultural output has soared famine has been overcome and the welfare of the peasant has vastly improved Troubled Harvest Joseph Cotter, 2003-09-30 During the 20th century two revolutions swept rural Mexico the Mexican Revolution and the Green Revolution In both revolutionaries promised to address the problems of rural poverty and underdevelopment The Mexican Revolution led to a significant agrarian reform and created the State and elite that governed Mexico since the 1920s The Green Revolution helped increase Mexican agricultural production substantially and in 1970 it won a Nobel Peace Prize for Norman Borlaug who bred dwarf hybrid wheat Mexican agronomists played significant roles in both revolutions but neither revolution brought prosperity to peasant farmers This book examines the history of Mexican agronomy and agronomists to shed new light on the role of science in the Mexican Revolution the origins of the worldwide Green Revolution and general issues about the nature of the professions the impact of professionals ties to politics and the state and discourses between members of Mexico's urban middle class and peasantry Cotter also analyzes the impact of foreign models of science in Mexico the history of U S Mexican cooperation in the agricultural sciences and the factors that led Mexico to seek scientific assistance from the United States In a broad way he reveals new aspects of the ongoing struggle for the right to define modernity and progress in rural Mexico and offers new explanations for the failure of many of

the State's efforts to assist peasant farmers **The Roots of Conservatism in Mexico** Benjamin T. Smith, 2012-11-15 The Roots of Conservatism is the first attempt to ask why over the past two centuries so many Mexican peasants have opted to ally with conservative groups rather than their radical counterparts Blending socioeconomic history cultural analysis and political narrative Smith's study begins with the late Bourbon period and moves through the early republic the mid nineteenth century Reforma the Porfiriato and the Revolution when the Mixtecs rejected Zapatista offers of land distribution ending with the armed religious uprising known as the last Cristiada a desperate Cold War bid to rid the region of impious communist governance In recounting this long tradition of regional conservatism Smith emphasizes the influence of religious belief church ritual and lay clerical relations both on social relations and on political affiliation He posits that many Mexican peasants embraced provincial conservatism a variant of elite or metropolitan conservatism which not only comprised ideas on property hierarchy and the state but also the overwhelming import of the church to maintaining this system

Anthropological Perspectives on Rural Mexico Cynthia Hewitt de Alcántara, 2017-07-06 In this title first published in 1984 the author examines the social and political forces surrounding the practice of anthropology at different periods in the history of Mexico since 1917 She does this by analysing and tracing the development of competing anthropological perspectives from ethnographic particularism and functionalism through indigenismo cultural ecology Marxism and the dependency paradigm to the historical structuralism of the 1970s This book provides the basis for a systematic analysis of peasant studies in Mexico and discusses in stimulating terms the theoretical and empirical difficulties of the profession of anthropology itself Catalog of Copyright Entries. Wolfe, 2017-06-22 In Watering the Revolution Mikael D Wolfe transforms our understanding of Mexican agrarian reform through an environmental and technological history of water management in the emblematic Laguna region Drawing on extensive archival research in Mexico and the United States Wolfe shows how during the long Mexican Revolution 1910-1940 engineers distribution of water paradoxically undermined land distribution In so doing he highlights the intrinsic tension engineers faced between the urgent need for water conservation and the imperative for development during the contentious modernization of the Laguna's existing flood irrigation method into one regulated by high dams concrete lined canals and motorized groundwater pumps This tension generally resolved in favor of development which unintentionally diminished and contaminated the water supply while deepening existing rural social inequalities by dividing people into water haves and have nots regardless of their access to land By uncovering the varied motivations behind the Mexican government's decision to use invasive and damaging technologies despite knowing they were ecologically unsustainable Wolfe tells a cautionary tale of the long term consequences of short sighted development policies Catalog of the Cuban and Caribbean Library, University of Miami, Coral Gables, Florida University of Miami.
