## **San Jacinto 1 A Historical Ecological:**

**San Jacinto 1** Augusto Oyuela-Caycedo, Renee M. Bonzani, 2005-06-26 A significant work of neotropical archaeology presenting evidence of early hunter gatherers who produced fiber tempered ceramics Few topics in the development of humans have prompted as much interest and debate as those of the origins of pottery and agriculture The first appearance of pottery in any area of the world is heralded as a new stage in the progress of humans toward a more complex arrangement of thought and society Cultures are defined and separated by the occurrence of pottery types and the association of pottery with mobility and agriculture continues to drive research in anthropology For these reasons the discovery of the earliest fiber tempered pottery in the New World and carbonized remains identified as maize kernels is exciting San Jacinto 1 is the archaeological site located in the savanna region of the north coast of Colombia South America where excavations by led by the authors have revealed evidence of mobile hunter gatherers who made pottery and who collected and processed plants from 6000 to 5000 B P The site is believed to show an early human adaptation to the tropics in the context of significant environmental changes that were taking place at the time This volume presents the data gathered and the interpretations made during excavation and analysis of the San Jacinto 1 site By examining the social activities of a human population in a highly seasonal environment it adds greatly to our contemporary understanding of the historical ecology of the tropics Study of the artifacts excavated at the site allows a window into the early processes of food production in the New World Finally the data reveals that the origins of ceramic technology in the tropics were tied to a reduction in mobility and an increase in territoriality and are widely applicable to similar studies of sedentism and agriculture worldwide

**Historical Ecologies, Heterarchies and Transtemporal Landscapes** Celeste Ray, Manuel Fernández-Götz, 2019-04-23 Interlacing varied approaches within Historical Ecology this volume offers new routes to researching and understanding human environmental interactions and the heterarchical power relations that shape both socioecological change and resilience over time Historical Ecology draws from archaeology archival research ethnography the humanities and the biophysical sciences to merge the history of the Earth s biophysical system with the history of humanity Considering landscape as the spatial manifestation of the relations between humans and their environments through time the authors in this volume examine the multi directional power dynamics that have shaped settlement agrarian monumental and ritual landscapes through the long term field projects they have pursued around the globe Examining both biocultural stability and change through the longue dur e in different regions these essays highlight intersectionality and counterpoised power flows to demonstrate that alongside and in spite of hierarchical ideologies the daily life of power is heterarchical Knowledge of transtemporal human environmental relationships is necessary for strategizing socioecological resilience Historical Ecology shows how the past can be useful to the future

**Handbook of South American Archaeology**

Helaine Silverman, William Isbell, 2008-04-06 Perhaps the contributions of South American archaeology to the larger field of world archaeology have been inadequately recognized. If so, this is probably because there have been relatively few archaeologists working in South America outside of Peru, and recent advances in knowledge in other parts of the continent are only beginning to enter larger archaeological discourse. Many ideas of and about South American archaeology held by scholars from outside the area are going to change irrevocably with the appearance of the present volume. Not only does the Handbook of South American Archaeology (HSA) provide immense and broad information about ancient South America, the volume also showcases the contributions made by South Americans to social theory. Moreover, one of the merits of this volume is that about half the authors (30) are South Americans, and the bibliographies in their chapters will be especially useful guides to Spanish and Portuguese literature as well as to the latest research. It is inevitable that the HSA will be compared with the multi-volume Handbook of South American Indians (HSAI) with its detailed descriptions of indigenous peoples of South America that was organized and edited by Julian Steward. Although there are heroic archaeological essays in the HSAI by the likes of Junius Bird, Gordon Willey, John Rowe, and John Murra, Steward states frankly in his introduction to Volume Two that archaeology is included by way of background to the ethnographic chapters. **The Eastern Archaic, Historicized** Kenneth E. Sassaman, 2010-08-16

The Eastern Archaic Historicized offers an alternative perspective on the genesis and transformation of cultural diversity over eight millennia of hunter-gatherer dwelling in eastern North America. For many decades, archaeological understanding of Archaic diversity has been dominated by perspectives that emphasize localized relationships between humans and environment. The evidence shows, however, that Archaic people routinely associated with other groups throughout eastern North America and expressed themselves materially in ways that reveal historical links to other places and times. Starting with the colonization of eastern North America by two distinct ancestral lines, the Eastern Archaic was an era of migrations, ethnogenesis, and coalescence, an 8,200-year era of making histories through interactions and expressing them culturally in ritual and performance. **Andean Foodways** John E.

Staller, 2020-12-01 There is widespread acknowledgement among anthropologists, archaeologists, ethnobotanists, as well as researchers in related disciplines, that specific foods and cuisines are linked very strongly to the formation and maintenance of cultural identity and ethnicity. Strong associations of foodways with culture are particularly characteristic of South American Andean cultures. Food and drink convey complex social and cultural meanings that can provide insights into regional interactions, social complexity, cultural hybridization, and ethnogenesis. This edited volume presents novel and creative anthropological, archaeological, historical, and iconographic research on Andean food and culture from diverse temporal periods and spatial settings. The breadth and scope of the contributions provides original insights into a diversity of topics such as the role of food in Andean political economies, the transformation of foodways and cuisines through time, and ancient iconographic representations of plants and animals that were used as food. Thus, this volume is distinguished from

most of the published literature in that specific foods cuisines and culinary practices are the primary subject matter through which aspects of Andean culture are interpreted

**Santa Rosa and San Jacinto Mountains National Monument (N.M.) Management Plan**, 2003 *Rethinking the Andes-Amazonia Divide* Adrian J. Pearce, David G. Beresford-Jones, Paul Heggarty, 2020-10-21 Nowhere on Earth is there an ecological transformation so swift and so extreme as between the snow line of the high Andes and the tropical rainforest of Amazonia The different disciplines that research the human past in South America have long tended to treat these two great subzones of the continent as self contained enough to be taken independently of each other Objections have repeatedly been raised however to warn against imagining too sharp a divide between the people and societies of the Andes and Amazonia when there are also clear indications of significant connections and transitions between them *Rethinking the Andes Amazonia Divide* brings together archaeologists linguists geneticists anthropologists ethnohistorians and historians to explore both correlations and contrasts in how the various disciplines see the relationship between the Andes and Amazonia from deepest prehistory up to the European colonial period The volume emerges from an innovative programme of conferences and symposia conceived explicitly to foster awareness discussion and co operation across the divides between disciplines Underway since 2008 this programme has already yielded major publications on the Andean past including *History and Language in the Andes* 2011 and *Archaeology and Language in the Andes* 2012
