Lee Grismer,2002-09-16 The Baja California peninsula is home to many forms of life found nowhere else on earth This combined with the peninsula s rugged and inaccessible terrain has made the area one of the last true biological frontiers of North

America L Lee Grismer is not only the foremost authority on the amphibians and reptiles of Baja California but also an outstanding photographer. He has produced the most comprehensive work on the herpetofauna of the peninsula and its islands ever published. With its stunning color images, detailed accounts of many little known species and descriptions of the region's diverse environment, this is the definitive guide to the amphibians and reptiles of a fascinating and remote region. The culmination of Grismer's quarter century of fieldwork on the Baja peninsula and his exploration of more than one hundred of its islands in the Pacific Ocean and the Sea of Cortez, this book gives information on the identification, distribution, natural history, and taxonomy of each species of amphibian and reptile found there. Preliminary accounts of the life history of many of the salamanders, frogs, toads, turtles, lizards, and snakes are reported here for the first time, and several species that were almost unknown to science are illustrated in full color. The book also contains new data on species distribution and on the effect of the isolated landscape of the peninsula and its islands on the evolutionary process. Much of the information gathered here is presented in biogeographical overviews that consider the extremely varied environments of Baja California in both a contemporary and a historical framework. An original and important contribution to science, this book will generate further research for years to come as it becomes a benchmark reference for both professionals and amateurs.

Wagner, 2023-12-22 Explore the fascinating evolution of cartography in *The Cartography of the Northwest Coast of America to the Year 1800, Volume 1*. This comprehensive work delves into the voyages and explorations of the 16th century, revealing how early adventurers and cartographers mapped the northwest coast of America. From Cabo San Lucas to the Arctic, this volume examines the speculative and often imaginative cartographical representations of a region long shrouded in mystery. The book begins by tracing the influence of explorers like Sebastian Vizcaino and the impact of mistaken geographical assumptions from the time of Columbus. It highlights how early European explorers, driven by dreams of wealth and discovery, began to chart the coastline despite immense geographical and logistical challenges. The evolution of maps filled with

inaccuracies gaps and speculative theories offers readers a window into the mindset of the era revealing how cartographers attempted to fill in the unknown Rich in historical detail and analysis this volume illuminates how the Northwest coast's remote and formidable nature kept it on the fringes of exploration while its cartographical representation evolved with each new discovery For historians cartography enthusiasts and those captivated by the early voyages of discovery this volume provides a richly detailed look into the development of maps and the voyages that shaped our understanding of the Pacific Northwest This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1937 **If the Shoe Fits** Rae Ellen Lee, 2001 Rae Ellen Lee is a writer and sailing enthusiast
