**Enabling the Iranian Gas Export Options** Maximilian Kuhn, 2014-01-17

Maximilian Kuhn investigates one of the most pressing yet neglected subjects in the field of global energy politics the integration of the Iranian gas market Possessing the world's second largest proven natural gas reserves Iran is a hypothetical energy giant in waiting Yet over three decades of internal divisions coupled with crippling international sanctions have left Iran unable to capitalize on its vast energy potential Increasing global demand for natural gas and a government in constant need of finding new sources of revenue to meet the needs of a fast growing population should lead Iran to eventually become a large scale gas exporter How this could take place and what the implications for global gas markets would be are the central research questions tackled by this study The study allows a look beyond international politics Iranian political decision making investment laws and pipeline games

between East Asian states and Iran in the coming years and decades

**Shrewd Sanctions** Meghan L.

O'Sullivan,2004-05-13 Policymakers will need all the tools at their disposal to craft an effective response to international terrorism and to protect and promote other U S interests in the coming decades In this quest to shape the right strategies for the challenges ahead economic instruments will play a central role O Sullivan an expert on the use of positive and negative tools of economic statecraft argues that in the post September 11th international climate the United States will be even more willing to use its economic power to advance its foreign policy goals than it has in the past This impulse she argues can lead to a more effective foreign policy given the many ways in which sanctions and incentives can forcefully advance U S interests But a recalibration of these tools sanctions in particular is necessary in order for them to live up to their potential Critical to such a reassessment is a thorough understanding of how the post cold war international environment globalization and American primacy in particular has influenced how sanctions work O Sullivan addresses this issue in a thorough examination of sanctions dominated policies in place against Iran Iraq Libya and Sudan Her findings not only highlight the many ways in which sanctions have often been poorly suited to achieve their goals in the past but also suggest how policymakers might use these tools to better effect in the future This book will provide a valuable resource for policymakers groping to find the right set of instruments to address both the old and the new challenges facing the United States It will also serve as an important resource to those interested in U S policy toward rogue states and in the status of the sanctions debate between policymakers and scholars

**US Foreign Policy and the Iranian Revolution** C. Emery,2013-10-15 This book provides a fresh perspective on the origins of the confrontation between the US and Iran It demonstrates that contrary to the claims of Iran s leaders there was no instinctive American hostility towards the Revolution and explains why many assumptions guiding US policy were inappropriate for dealing with the new reality in Iran

**Detering Terrorism** Andreas Wenger,Alex Wilner,2012-09-19 During the Cold War deterrence theory was the cornerstone of U S foreign policy Following the 9 11 terrorist attacks however popular wisdom dictated that terrorist organizations and radical fanatics could not be deterred and governments shifted their attention to combating terrorism rather than deterring it This book challenges that prevailing assumption and offers insight as to when and where terrorism can be deterred It first identifies how and where theories of deterrence apply to counterterrorism highlighting how traditional and less traditional notions of deterrence can be applied to evolving terrorist threats It then applies these theoretical propositions to real world

threats to establish the role deterrence has within a dynamic counterterrorism strategy and to identify how metrics can be created for measuring the success of terrorism deterrence strategies In sum it provides a foundation for developing effective counterterrorism policies to help states contain or curtail the terrorism challenges they face The Presidential Difference and Iran's Foreign Policy Under Khatami from 1997 to 2005 Azadeh Momeni,2024-06-25 The Presidential Difference and Iran's Foreign Policy Under Khatami from 1997 to 2005 explores the paradigm shift one that involved a change from confrontation to peaceful relations The main reason for this alteration rests on Muhammad Khatami's belief system whose discourse of Dialogue Among Civilizations aiming at coexistence and cooperation assured the international community that Iran would not pursue revolutionary aspirations but rather seek constructive and meaningful relations based on equality mutual respect and understanding Azadeh Momeni argues that the cornerstone of this sea change in foreign policy rests on Khatami's intellectual thoughts which is characterized by his belief system What sets this book apart is its unique approach employing Operational Code Analysis to analyze Khatami's belief system Operational Code Analysis is a quantitative method used in political psychology and international relations to understand the decision making processes and beliefs of political leaders *"Dual Containment" Policy in the Persian Gulf* A. Edwards,2014-12-16 This book offers a concise account of US dual containment policy towards Iran and Iraq during the 1990s an overlooked era between the tumult of the liberation of Kuwait and the terrorist attacks of September 11 2001 In particular it uses a theoretical framework derived from neoclassical realism to examine the impact of domestic US politics and interest groups on policymaking as well as perceptions of threat derived from two decades of mutual hostility between the US and Iran **The US Middle East Policy In Post 9/11 Era** Mukhtar Ahmad Bhat,2020-01-01 Middle East the mother of civilisations is one of the very few regions of global politics which have remained the hot spots and orbits around which the global power game revolved uninterruptedly In beginning it was due to its geopolitical location as it is at the crossroads and a trade link between big Asian African and European countries turned the region into a trade hub Then the life changing discoveries of natural resources particularly of oil and gas in the region as well as the industrial revolution in other parts of the world increased strategic importance of the region at the global level The adoption of policy of securing control over the resources by global powers gave new shape to the political structure and configuration like disintegration of Ottoman Empire and creation of new political entities in the region In addition to that the break out of the First and Second World Wars creation of Israel as well as the emergence of the Cold War are such events that transformed the region into a battle ground for the global super powers which ended at the collapse of the USSR in 1992 and emergence of the US as the dominant global power No doubt after the emergence of uni polar global order the region saw a phase of peace and end of the war gaming on the part of the big powers but the US continued to dominate the regional political structure During the same period the region also experienced one of the toughest periods of inter state wars first the decade long Iraq Iran war and then the Iraqi invasion of Kuwait which added more fuel to the

already increasing division and hatred among the regional countries

### **Iran in an Emerging New World Order** Ali

Fathollah-Nejad, 2021-05-22 This book critically develops and discusses Iran's geopolitical imaginations and explores its various foreign policy schools of thought and their controversies. In doing so, the book covers Iran's foreign policy and international relations from 9/11 all the way to Rouhani's rise late 2014. Accounting for both domestic and the international balance of power, the book theorizes the post-unipolar world order of the 2000s, dubbed imperial interolarity, examines Iran's relations with non-Western great powers in that era and offers a critique of the Rouhani doctrine and its economic and foreign policy visions. Forged in the fires and intense deliberations of a PhD undertaken at a most unique institution of higher learning in the world, Ali Fathollah Nejad has produced one of the most informative and evocative studies of Iran's foreign policy and international relations to date. Framed in a highly original theoretical approach, Ali's nuanced analysis, drawing on a lorry load of primary and secondary sources, details the process and context of policy in the Islamic Republic, thus producing an unrivalled and lasting account of modern Iran's worldview and the behaviour of this revolutionary state in a fast-changing world. Anoush Ehteshami, Professor of International Relations, author of the forthcoming *The 100 Years War for Control of the Middle East*, Princeton University Press, 2021. Gilbert Achcar, Professor of Development Studies and International Relations, SOAS School of Oriental and African Studies, University of London. A decisive contribution to two avant-gardist fields of knowledge: Critical geopolitics and Iranian foreign relations. Fathollah Nejad provides us with unique and alternative assessments of how Iran's foreign policy is shaped within the context of what he calls Imperial Interolarity. The creative interplay of these various factors makes this an indispensable text for anyone wishing to understand Iran and its international relations within the current global political environment. Na'eem Jeenah, Executive Director, Afro Middle East Centre, AMEC, Johannesburg. An eye opener for those who essentialize the role of Iran in contemporary International Relations. This landmark study covers the complexity of Iran's cultural geopolitics and the diversity of its interlocutors in 21st-century world politics. Theoretically flawless. A deep, brilliant, and enlightening academic text. Mois's Garduño Garcia, Professor in the Center for International Relations, National Autonomous University of

*The Absence of Grand Strategy* Steve A. Yetiv, 2008-04-21 Great powers and grand strategies It is easy to assume that the most powerful nations pursue and employ consistent cohesive and decisive policies in trying to promote their interests in regions of the world Popular theory emphasizes two such grand strategies that great powers may pursue balance of power policy or hegemonic domination But as Steve A Yetiv contends things may not always be that cut and dried Analyzing the

evolution of the United States foreign policy in the Persian Gulf from 1972 to 2005 Yetiv offers a provocative and panoramic view of American strategies in a region critical to the functioning of the entire global economy Ten cases from the policies of the Nixon administration to George W Bush s war in Iraq reveal shifting improvised and reactive policies that were responses to unanticipated and unpredictable events and threats In fact the distinguishing feature of the U S experience in the Gulf has been the absence of grand strategy Yetiv introduces the concept of reactive engagement as an alternative approach to understanding the behavior of great powers in unstable regions At a time when the effects of U S foreign policy are rippling across the globe *The Absence of Grand Strategy* offers key insight into the nature and evolution of American foreign policy in the Gulf
