site of an important Roman river crossing From the mid 80s to about 160s AD this was protected by a series of forts which
underlie the remains of the later garrison town now visible on the site This volume presents the results of excavations carried
out between 1947 and 1980 beneath and around the later masonry buildings which have helped to reveal the complex history
of the sequence of mainly earth and timber forts which preceded them After an introduction which describes how the
analysis of excavation data collected over many seasons work has been undertaken and summarising previous work on the
site a major new consideration of the crop mark evidence for the site is presented There follows an examination of the site
covering the fort buildings area by area principia praetorium barracks defences and other areas The evidence is complex and
the separate phases of development of each area are fully illustrated A selection of finds illustrated in details and chosen for
their stratigraphic relevance or intrinsic value is studied in a series of specialist reports The conclusion explores a new
interpretation of the earlier phases of fort occupation at Roman Corbridge **Library of Congress Catalogs** Library of
