Mud, Sands and Seas Denis Montgomery, 2008-11 This a collection of travel stories over nearly sixty years from 1949 to 2007 During that time the author saw many changes in Africa and recorded them with his observations often with the goal of

extending his knowledge of history and pre history of the region These stories fill gaps between previous books devoted to particular expeditions **Sands of the Kalahari** William Mulvihill,1911-11-01 **Earth's Landscape** Joyce A. Quinn,Susan L. Woodward,2015-02-03 This unusual encyclopedia brings together in depth information on more than 450 natural geographic features from around the world and offers an array of creative tools to promote critical thinking and classroom discussion With Earth undergoing rapid environmental change students and the general public alike should be knowledgeable about the world s geographic features This authoritative two volume reference enables readers do just that It describes continents and oceans individual mountains islands caves and rivers and ecological entities such as wildlife refuges and national parks Each entry provides a geographic overview of the feature s significance location description geologic history biota protected areas and environmental issues But the coverage goes even deeper so that entries also discuss the cultural importance of each natural place covering everything from indigenous beliefs to traditional folklore to contemporary legends The encyclopedia stands apart from other works not only in the depth of its coverage but also in its range It discusses lesser known as well as prominent geographical features and offers critical thinking aids that will help students see how the natural world relates to their daily lives Teaching and learning tools include an appendix called Opposing Viewpoints that allows students to understand landforms involved in current conflicts and disputes as well as an Activities Discussion Questions appendix [The Kalahari Environment](#) David Thomas,Paul A. Shaw,1991-02-21 This book provides an integrated thorough and up to date review of the nature and development of the Kalahari environment an environment of great ecological and geomorphological diversity Its complex climatic and geological history and its long association with human societies attempting to utilise its natural resources are aspects of increasing scientific interest The book has evolved from the authors own research in the Kalahari and attempts to provide explanations and answers to some of the many questions raised about this region ranging from the commonly asked is it really a desert to more specific and detailed concerns The interdisciplinary approach will make the book of interest to researchers lecturers and advanced students in earth sciences environmental studies tropical geomorphology and Quaternary science The extensive bibliography will also make the book a very important source of reference **The IUCN Review of the Southern Okavango Integrated Water Development Project** Thayer Scudder,International Union for Conservation of Nature and Natural Resources,1993 [Transactions of the Geological Society of South Africa](#) Geological Society of South Africa,1917 **1001 Natural Wonders You Must See Before You Die** Michael Bright,2017-10-24 1001 Natural Wonders You Must See Before You Die explores every continent and ocean on the planet for a once in a lifetime experiences that you can revisit time and time again [Geology and Resource Potential of the Congo Basin](#) Maarten J. de Wit,François Guillocheau,Michiel C. J. de Wit,2015-01-02 This book summarizes the geomorphology geology geochronology geophysics and mineral resources of the Congo Basin one of the world s most enigmatic and poorly understood major intra continental sedimentary basins and its flanking areas of Central

Africa It provides an up to date analysis of the large region's origin and evolution The book's nineteen chapters take the reader through the entire basement history as well as the Basin's ca 700 million years of cover sequences Starting from its Archean cratons and Proterozoic mobile belts and proceeding through the Phanerozoic sequences including the most recent Cenozoic successions the book also explores the present drainage systems and the subtle but complex topography of the Congo Basin It also presents and evaluates new basin models and related dynamic processes as well as revised correlation schemes with its Gondwana counterparts in South America all of which provide key insights into its rich diamond deposits and other mineral wealth which are documented in the final chapters A specific feature of this book is its synthesis performed by teams of active experts of a vast amount of geoscientific data previously only recorded in research reports company reports survey bulletins and scattered journal articles and books The sheer size of the Congo Basin ca 1.8 million km² or just under half the area of the EU and Central Africa some 7 million km² or more than 70% of the area of the USA will make this a sought after source of information and inspiration on this unique region

Estimation of Natural Groundwater Recharge I. Simmers, 2013-03-14 In view of the rapidly expanding urban industrial and agricultural water requirements in many areas and the normally associated critical unreliability of surface water supplies in arid and semi arid zones groundwater exploration and use is of fundamental importance for logical economic development Two interrelated facets should be evident in all such groundwater projects a definition of groundwater recharge mechanisms and characteristics for identified geological formations in order to determine whether exploitation in the long term involves mining of an essentially fossil resource or withdrawal from a dynamic supply A solution to this aspect is essential for development of a resource management policy b determination of recharge variability in time and space to thus enable determination of total aquifer input and to quantify such practical aspects as minimum risk waste disposal locations and artificial recharge potential via e.g. revegetation or engineering works However current international developments relating to natural recharge indicate the following problems no single comprehensive estimation technique can yet be identified from the spectrum of methods available all are reported to give suspect results

Landscapes and Landforms of Botswana Frank D. Eckardt, 2022-05-17 This volume contains 22 chapters introducing a wide range of semi arid and geologic landscapes Botswana a thinly populated nation the size of France is a Southern African keystone country at the heart of the Kalahari sharing some of the major sub continental drainage basins such as the Limpopo Zambezi Orange and Okavango with its neighbouring countries The extensive Kalahari Sand surface has been sculptured by numerous past processes which have produced subtle but regional landforms consisting of extensive dunes and shorelines Incipient rifting has created the dynamic Okavango and Makgadikgadi fan basin systems which produces iconic wetlands with a world heritage status Geological outcrops in particular to the east expose highly denuded basement lithologies which produces numerous inselbergs that are home to a rich archaeological heritage The book also examines the geomorphology of mineral and water

resources which sustain the economy and population and also features dedicated chapters that cover diamondiferous kimberlites caves pans dams duricrusts and wildlife Chapter 6 is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com) *Bulletin Southern Rhodesia Geological Survey, 1962*
