National Union Catalog ,1970 Includes entries for maps and atlases **Dictionaries** ,2007 **Japan English Publications in Print** ,1998 *Environmental Pollution and the Media* Glenn D. Hook,Libby Lester,Meng Ji,Kingsley Edney,Chris G. Pope,Luli van der Does-Ishikawa,2017-04-07 This book offers a theoretically informed empirical investigation of national media reporting and political discourse on environmental issues in Australia China and Japan It illuminates the risks harms and responsibilities associated with climate change through an analysis of pollution adopting an interdisciplinary approach drawing on both the social sciences and humanities A particular strength of the work is the detailed analysis of the data using a range of both quantitative and qualitative techniques enabling the authors to reveal in rich and compelling detail the complex relationship between risk and responsibility in the climate change discourse The case studies of Australia China and Japan are set in the current literature as well as in the historical context of climate change in these three countries The analysis of the media discourse on the Great Barrier Reef in Australia demonstrates how the mining of coal for overseas markets has led to devastating harm to the life of the reef A critical discussion of the Chinese documentary Under the Dome shows how this medium has played a crucial role in building awareness of the harm from atmospheric pollution among the citizens shaping attitudes and promoting action The first case study of Japan elucidates how cross border atmospheric pollution from China forges a chain of responsibility for responding to climate change running from the state to society The other case study of Japan demonstrates how smart cities have emerged as a way to mitigate the risks and harms of climate change The Conclusion draws together the similarities and differences in how climate change is addressed in the three countries In all *Environmental Pollution and the Media* Political Discourses of Risk and Responsibility in Australia China and Japan uncovers the dynamics of the triadic relationship among risk harm and climate change in Australia China and Japan By so doing the book makes an original and timely contribution to understanding comparative media discourse and political debates on climate change Naval Training Bulletin ,1944 **U.S. Naval Training Bulletin** ,1949 Stechert-Hafner Book News Stechert-Hafner, Inc,1962 Dictionary Catalog of the Library of the Freer Gallery of Art. Smithsonian Institution, Washington Freer Gallery of Art. Library,1967 *Modals and Periphrastics in English* Paul Westney,2013-02-07 English has a number of periphrastic verbal forms that are semantically close to particular modal verbs and perform suppletive functions in relation to them eg have got to must and be able to can After an exploration of the syntactic semantic and phonological properties of potential periphrastic forms this study investigates the nature of the relationship between the modals must should will and can and various semantically close periphrastics using a spoken corpus of British English as the primary source of data The focus is on the pragmatic interpretation of the items being compared with some attention to their functions in discourse These items are notoriously idiosyncratic both syntactically and semantically but the general contrast claimed by some scholars between the maximally unmarked status of modals and the relatively marked status of

periphrastics is amply confirmed and this together with the basic association of modality with alternative possible worlds is shown to be reflected in a number of different ways including the claimed objectivity of periphrastics and the tendency of some to be associated with actuality Level of formality is also found to be a significant though not uniform factor here
