

A festive night scene featuring Santa Claus in his sleigh, pulled by four reindeer, flying across a dark blue sky. A large, bright crescent moon is positioned behind the sleigh, and a trail of white sparks follows their path. The foreground is filled with the dark silhouettes of evergreen trees. The text "Santa Claus is Coming Tonight" is written in a white, cursive font across the middle of the image.

Knowledge, Language and Logic: Questions for Quine A. Orenstein, P. Kotatko, 2012-12-06 Quine is one of the twentieth century's most important and influential philosophers. The essays in this collection are by some of the leading figures in their fields and they touch on the most recent turnings in Quine's work. The book also features an essay by Quine himself and his replies to each of the papers. Questions are raised concerning Quine's views on knowledge, observation, holism, truth, naturalized epistemology, about language, meaning, the indeterminacy of translation, conjecture, and about the philosophy of logic, ontology, singular terms, vagueness, identity, and intensional contexts. Given Quine's preeminent position, this book must be of interest to students of philosophy in general, Quine aficionados, and most particularly to those working in the areas of epistemology, ontology, philosophies of language, of logic, and of science.

Spectator in the Cartesian Theater Peter Slezak, 2023-08-01 The Cartesian Theater is Dennett's famous metaphor for the idea that a homunculus or little man watches the screen on which our thoughts appear. However, contrary to much academic teaching and scholarship, Spectator in the Cartesian Theater Where Theories of Mind Went Wrong, since Descartes shows that Descartes was not guilty of this fallacy for which he has been blamed. In his physiological writings neglected by philosophers, Descartes explained that the pseudo explanation arises not from what is included in our theory of consciousness but rather from what is missing. We fail to notice that the theory is incomplete because we are intuitively doing part of the explanatory work. That is, we are the spectators in the Cartesian Theater. With detailed critiques, Peter Slezak shows that Searle's Chinese Room Argument, Kripke's theory of proper names, Davidson's semantics of natural language, and Kosslyn's theory of visual imagery rely on what is intuitively meaningful to us rather than what follows from the theory. Slezak offers a novel solution to the elusive logic of the Cogito argument, showing it to be akin to the Liar Paradox. Since Descartes' perplexity is our own, this shows how the subjective certainty of consciousness and the mind-body problem can arise for a physical system. An intelligent computer would think that it isn't one.

School Education, 1908 *Referring to the World* Kenneth A. Taylor, 2021-05-20 Our words and ideas refer to objects and properties in the external world; this phenomenon is central to thought, language, communication, and science. But great works of fiction are full of names that don't seem to refer to anything. In this book, Kenneth A. Taylor explores the myriad of problems that surround the phenomenon of reference. How can words in language

and perturbations in our brains come to stand for external objects Reference is essential to truth but which is more basic reference or truth How can fictional characters play such an important role in imagination and literature and how does this use of language connect with more mundane uses Taylor develops a framework for understanding reference and the theories that other thinkers past and present have developed about it But Taylor doesn't simply tell us what others thought the book is full of new ideas and analyses making for a vital final contribution from a seminal philosopher *Christmas Hits for Easy*
