Mukharji, 2023-02-17 A unique narrative structure brings the history of race science in mid twentieth century India to vivid life There has been a recent explosion in studies of race science in the twentieth and twenty first centuries but most have focused either on Europe or on North America and Australia In this stirring history Projit Bihari Mukharji illustrates how India appropriated and repurposed race science to its own ends and argues that these appropriations need to be understood within the national and regional contexts of postcolonial nation making not merely as footnotes to a Western history of normal science The book comprises seven factual chapters operating at distinct levels conceptual practical and cosmological and eight fictive interchapters a series of epistolary exchanges between the Bengali author Hemendrakumar Ray 1888 1963 and the protagonist of his dystopian science fiction novel about race race science racial improvement and dehumanization In this way Mukharji fills out the historical moment in which the factual narrative unfolded vividly revealing its moral affective political and intellectual fissures
