Alan E. Mussett, M. Aftab Khan

Looking At Earth:

Looking at Earth Jackie Gaff, 2008 Provides a look at Earth its relationship to the sun earthquakes volcanoes and how people can help the planet Provided by publisher *Looking at Earth from Space* United States. Office of Mission to Planet Earth, 1994

Looking into the Earth Alan E. Mussett, M. Aftab Khan, 2000-10-23 Looking Into the Earth comprehensively describes the principles and applications of both global and exploration geophysics on all scales It forms an introduction to geophysics suitable for those who do not necessarily intend to become professional geophysicists including geologists civil engineers environmental scientists and field archaeologists The book is organised into two parts Part 1 describes the geophysical methods while Part 2 illustrates their use in a number of extended case histories Mathematical and physical principles are introduced at an elementary level and then developed as necessary Student questions and exercises are included at the end of each chapter The book is aimed primarily at introductory and intermediate university students taking courses in geology earth science environmental science and engineering It will also form an excellent introductory textbook in geophysics departments and will help practising geologists archaeologists and engineers understand what geophysics can offer their work

To Look on Earth With More Than Mortal Eyes Marjorie Spock, 1985 The author presents a concise introduction to the spiritual path of anthroposophy Earth Dana Meachen Rau, 2003 Briefly describes the discovery surface features orbit moons and efforts to study the planet Earth

Seeing Our Planet Whole: A Cultural and Ethical View of Earth Observation Harry Eyres, 2016-09-22 This book shows how our new found ability to observe the Earth from the necessary distance has wide and profound cultural and ethical implications First of all it is the outcome of speculations and investigations of human beings in relation to their home planet carried out over millennia In particular it reveals a split between the ancient idea of the Earth as nurturing mother and the more recent conception of the Earth as a neutral resource able to be infinitely exploited by humankind The 1968 Earthrise photograph showing the beauty and fragility of the Earth helped spark a worldwide environmental movement now the comprehensive coverage of global change provided by satellites has the potential to convince us beyond reasonable doubt of the huge alterations being wrought upon the Earth and its climate system as a result of human actions and of the need to act more responsibly *Look to the Earth* Clarence R. Geier, Jr., 1996-09 A compilation of archaeology research devoted to Civil War period sites Essays look beyond the Civil War as a military event and demonstrate historical archaeology's use in reconstructing the lives of freed slaves poor whites and rural farmers and millers Topics include battlefield analysis and reconstruction fortifications and camp life and the role of espionage and foreign intelligence Includes bandw photos and diagrams Annotation copyright by Book News Inc Portland OR

From This Green Earth: Essays on Looking Outward Sylvia Engdahl, 2024-05-03 Sylvia Engdahl became fascinated by the idea of space travel in 1946 and has believed since the early 1950s that expansion of our species to other worlds is vital to the preservation of Earth and the future survival of humankind Many of the essays in this book express her conviction that

we should not be discouraged by the public's reluctance to support space activity since all past human progress has been brought about by visionaries who did not have the backing of their contemporaries. The shock of realizing during the moon landings that contact with the vast and perhaps peril-fraught universe is no longer mere fiction dampened the enthusiasm of the majority, but this was a natural reaction comparable to seventeenth-century people's resistance to the idea that Earth is not as formerly thought safely enclosed within crystal spheres that hold up the celestial bodies. It will pass and we need have no doubt that generations who come after us will venture forth from this green Earth and find their way to the stars.

The following essays are included: The Once and Future Dream, new Thoughts on the 50th Anniversary of the First Moon Landing, Breaking Out from Earth's Shell, Why Does the History of Outlook Toward Space Matter, Confronting the Universe in the Twenty-First Century, Space and Human Survival, The Only Sensible Way to Deal with Climate Change, Update on the Critical Stage, The Far Side of Evil's Relevance, Today's Space Colonization, Faith and Pascal's Wager, Why There Will Never Be an Interplanetary War, Humankind's Future in the Cosmos.

A sabbath-day journey, or, Earth's tired travellers looking homeward Sabbath-day, 1866

Earth is looking for the truth Hassan Khalil, 2024-11-24

A dialogue between the Earth and what is on it of mountains, rivers, and creatures to know the secret of its existence. In this dialogue, each creature talks about itself, why God created it, and what is the reason for its existence on Earth.
