The Psychology of Imagination Brady Wagoner, Ignacio Brescó de Luna, Sarah H. Awad, 2017-02-01. This book offers a new approach to imagination which brings its emotional, social, cultural, contextual and existential characteristics to the fore. Fantasy and imagination are understood as the human capacity to distance oneself from the here and now situation in order to return to it with new possibilities. To do this we use social, cultural means e.g. language, stories, art, images etc. to conceive of imaginary scenarios, some of which may become real. Imagination is involved in every situation of our lives, though to different degrees. Sometimes this process can lead to concrete products e.g. artistic works that can be picked up and used by others for the purposes of their imagining. Imagination is not seen here as an isolated cognitive faculty but as the means by which people anticipate and constructively move towards an indeterminate future. It is in this process of living forward with the help of imagination that novelty appears and social change becomes possible. This book offers a conceptual history of imagination, an array of theoretical approaches, imagination's use in psychology, thinking and a number of new research areas. Its aim is to offer a re-enchantment of the concept of imagination and the discipline of psychology more generally.

Your Creative Brain Shelley Carson, 2012-09-19. Research-based techniques that show everyone how to expand creativity and increase productivity. Harvard psychologist Shelley Carson's provocative book, published in partnership with Harvard Health Publications, reveals why creativity isn't something only scientists, investors, artists, writers, and musicians enjoy; in fact, all of us use our creative brains every day at home, work, and play. Each of us has the ability to increase our mental functioning and creativity by learning to move flexibly among several brain states. Explains seven brain states or brainsets and their functions as related to creativity, productivity, and innovation. Provides quizzes, exercises, and self-tests to activate each of these seven brainsets to unlock our maximum creativity. *Your Creative Brain*, called by critics a new classic in the field of creativity, offers inspiring suggestions that can be applied in both one's personal and professional life.

Science, Culture and the Search for Life on Other Worlds John W. Traphagan, 2016-08-26. This book explores humanity's thoughts and ideas about extraterrestrial life, paying close attention to the ways science and culture interact with one another to create a context of imagination and discovery related to life on other worlds. Despite the recent explosion in our knowledge of other planets and the seeming era of discovery in which we

live to date we have found no concrete evidence that we are not alone Our thinking about life on other worlds has been and remains the product of a combination of scientific investigation and human imagination shaped by cultural values particularly values of exploration and discovery connected to American society The rapid growth in our awareness of other worlds makes this a crucial moment to think about and assess the influence of cultural values on the scientific search for extraterrestrial life Here the author considers the junction of science and culture with a focus on two main themes 1 the underlying assumptions many of which are tacitly based upon cultural values common in American society that have shaped the ways researchers in astrobiology and SETI have conceptualized the nature of their endeavor and represented ideas about the potential influence contact might have on human civilization and 2 the empirical evidence we can access as a way of thinking about the social impact that contact with alien intelligence might have for humanity After Contact Albert A. Harrison,1997-08-21 Examines in detail the psychological sociological political and cultural dimensions of the search for extraterrestrial intelligence **The Mammoth Encyclopedia of Extraterrestrial Encounters** Ronald Story,2012-03-01 An illustrated A to Z guide to all things alien Over 400 entries from more than 100 contributors cover everything from the incidents and witnesses involved to the concepts at stake and experts personal position statements Entries range from alien abductions the Fantasy Prone hypothesis and JAL Flight no 1628 to the Lakenheath Bentwaters Episode mind control by aliens and Roswell The contributors include Isaac Asimov Jerome Clark Erich von Daniken Peter Davenport Hilary Evans Timothy Good Marvin Kottmeyer Jenny Randles Carl Sagan Whitley Streiber and Jacques Vallee There are over 300 images eyewitness drawings and photographs Creative Social Research Ananta Kumar Giri,2004-01-01 Calling for a reconceptualization and transformation of contemporary research methods in the social sciences Giri Madras Institute of Development Studies collects work by international scholars from a variety of disciplines and geographies to establish the ways in which contemporary global developments and the traditions of non Western societies *The Encyclopedia of Alien Encounters* Alan Baker,1999 Containing over 500 entries this historical reference work provides an A Z of alien and non human encounters It details the events encounters personalities and theories that have created this field of human experience and inquiry **21st Century Psychology: A Reference Handbook** Stephen F.
