Water Governance in OECD Countries Organisation for Economic Co-Operation and Development (OECD), 2011-11-04 *Water Governance in OECD Countries A Multilevel Approach* addresses multilevel governance challenges in water policy implementation and identifies good practices for coordinating water policy across ministries between levels of government and across local actors at subnational level Based on a methodological framework it assesses the main coordination gaps in terms of policy making financing information accountability objectives and capacity building and provides a platform of existing governance mechanisms to bridge them Based on an extensive survey on water governance the report provides a comprehensive institutional mapping of roles and responsibilities in water policy making at national subnational level in 17 OECD countries It concludes on preliminary multilevel governance guidelines for integrated water policy **Inclusive**

Development and Multilevel Transboundary Water Governance - The Kabul River Shakeel Hayat, 2020-04-30 The four decades long ideological based insurgencies and conflict in the Kabul River Basin KRB have seriously hampered the relations and foreign policies of both Afghanistan and Pakistan Consequently it restricts them to solve various bilateral issues including transboundary waters This lack of cooperation over shared water resources is one of the barriers to achieve inclusive and sustainable development Additionally it has contributed to the prevailing anarchic situation where each country does what it wants The absence of a formal water sharing mechanism coupled with poor water management practices within both the riparian counties are resulting various flow and administration related challenges Moreover these challenges are further exacerbated by regional changes in social political environmental and economic systems The scholarly literature

suggests that an analytical transboundary water governance framework is essential to address the challenges of water politicisation and securitisation quality degradation and quantity reduction Additionally the literature rarely integrates a a multi level approach b an institutional approach c an inclusive development approach or d accounts for the uses of different types of water and their varied ecosystem services for improved transboundary water governance To enhance human wellbeing and achieve inclusive and sustainable development in the KRB this research indicates that it is essential to 1 defrost frozen collaboration 2 bypass border dispute 3 use biodiversity and ecosystem services approach 4 address existing and potential natural and anthropogenic challenges 5 remove contradictions in the policy environment 6 combat resource limits and dependence by promoting collaboration on long term cost effective solutions and 7 enhance knowledge and dialogue on inclusive development

Multilevel Environmental Governance Inger Weibust,James Meadowcroft,2014-03-28

The literature on Multi level governance MLG an approach that explicitly looks at the system of the many interacting authority structures at work in the global political economy has grown significantly over the last decade The authors in this volu Handbook of Water Resources Management: Discourses, Concepts and Examples Janos J. Bogardi,Joyeeta Gupta,K. D. Wasantha Nandalal,Léna Salamé,Ronald R.P. van Nooijen,Navneet Kumar,Tawatchai Tingsanchali,Anik Bhaduri,Alla G. Kolechkina,2021-06-12 This book provides an overview of facts theories and methods from hydrology geology geophysics law ethics economics ecology engineering sociology diplomacy and many other disciplines with relevance for concepts and practice of water resources management It provides comprehensive but also critical reading material for all communities involved in the ongoing water discourses and debates The book refers to case studies in the form of boxes sections or as entire chapters They illustrate success stories but also lessons to be remembered to avoid repeating the same mistakes Based on consolidated state of the art knowledge it has been conceived and written to attract a multidisciplinary audience The aim of this handbook is to facilitate understanding between the participants of the international water discourse and multi level decision making processes Knowing more about water but also about concepts methods and aspirations of different professional disciplinary communities and stakeholders professionalizes the debate and enhances the decision making

Governing Integrated Water Resources Management Oliver Fritsch,David

Benson,2020-01-23 Integrated Water Resources Management IWRM has become a global paradigm for the governance of surface coastal and groundwaters This Special Issue contains twelve articles related to the transfer of IWRM policy principles The articles explore three dimensions of transfer causes processes outcomes and offer a theoretically inspiring methodologically rich and geographically diverse engagement with IWRM policy transfer around the globe As such they can also productively inform a future research agenda on the dimensional aspects of IWRM governance Regarding the causes the contributions apply criticise extend or revise existing approaches to policy transfer in a water governance context asking why countries adopt IWRM principles and what mechanisms are in place to understand the adoption of these principles in

regional or national contexts When it comes to processes articles in this Special Issue unpack the process of policy transfer and implementation and explore how IWRM principles travel across borders levels and scales Finally this set of papers looks into the outcomes of IWRM policy transfer and asks what impact IWRM principles once implemented gave on domestic water governance water quality and water supply and how effective IWRM is at addressing critical water issues in specific countries

Handbook on the Water-Energy-Food Nexus Brouwer, Floor, 2022-08-12 This Handbook provides a comprehensive overview of how water energy and food are interconnected comprising a coherent system the nexus It considers the interlinkages between natural resources governance processes seeking coherence among water energy and food policies and the adoption of transdisciplinary approaches in the field

The Right(s) to Water Pierre Thielbörger, 2013-09-30 Politicians and diplomats have for many years proclaimed a human right to water as a solution to the global water crisis most recently in the 2010 UN General Assembly Resolution The human right to water and sanitation To what extent however can a right to water legally and philosophically exist and what difference to international law and politics can it make This question lies at the heart of this book The book's answer is to argue that a right to water exists under international law but in a more differentiated and multi level manner than previously recognised Rather than existing as a singular and comprehensive right the right to water should be understood as a composite right of different layers both deriving from separate rights to health life and an adequate standard of living and supported by an array of regional and national rights The author also examines the right at a conceptual level After disproving some of the theoretical objections to the category of socio economic rights generally and the concept of a right to water more specifically the manuscript develops an innovative approach towards the interplay of different rights to water among different legal orders The book argues for an approach to human rights including the right to water as international minimum standards using the right to water as a model case to demonstrate how multilevel human rights protection can function effectively The book also addresses a crucial last question how does one make an international right to water meaningful in practice The manuscript identifies three crucial criteria in order to strengthen such a composite derived right in practice independent monitoring enforcement towards the private sector and international realization The author examines to what extent these criteria are currently adhered to and suggests practical ways of how they could be better met in the future

The Oxford Handbook of Water Politics and Policy Ken Conca, Erika Weinthal, 2018 This handbook is currently in development with individual articles publishing online in advance of print publication At this time we cannot add information about unpublished articles in this handbook however the table of contents will continue to grow as additional articles pass through the review process and are added to the site Please note that the online publication date for this handbook is the date that the first article in the title was published online For more information please read the site FAQs
