movements in the United Kingdom the United States and other countries aimed at modernising primary elementary school mathematics curricula A detailed account is given of the National Numeracy Strategy in England a systemic government imposed response to concern about standards implemented in 1999 2000 This includes a discussion of the alternative meanings of numeracy An earlier initiative sponsored by a United Kingdom charitable trust reacting to concern about primary numeracy was the Leverhulme Numeracy Research Programme This large scale longitudinal study and linked set of case study projects focusing on reasons for low attainment took place during 1997 2002 This book and each other in the same series is based on results of that research The timescale fortuitously enabled the research team to also report on some effects of the systemic reform in the National Numeracy Strategy

### 1 THE INTERNATIONAL CONTEXT

In many countries there are recurring periods of national concern about the low standards of calculation skills shown by children in primary elementary schools Recently these concerns have become more urgent and more political with the publication of international comparisons of mathematical achievement first at secondary and more recently at primary level e g Lapointe Mead Mullis et al 1997 *Caribbean Primary Mathematics Book 3 6th edition* Karen Morrison,2018-07-09 Make teaching and learning mathematics relevant and enjoyable with the best known Primary mathematics series in the Caribbean updated and revised for the 21st Century by practising teachers with a new focus on self directed learning problem solving and raising standards Ensure all requirements of primary schools in all Caribbean territories from kindergarten to primary school exit examination level are covered Engage students and make maths more relevant with real life situations used throughout the book including the front cover showing Mathematics in action Reinforce knowledge and encourage progression with Assessment Bank available separately to compliment the topics covered in this series Encourage students to understand and build their own learning with all key skills and concepts clearly introduced in sequence demonstrating links between mathematical strands and other curriculum subjects
