DeCorse, 2019-12-20 Integrating historical biological archaeological and applied approaches with ethnographic data from around the world Anthropology A Global Perspective is founded on four essential themes the diversity of human societies the similarities that tie all humans together the interconnections between the sciences and humanities and a new theme addressing psychological essentialism *Biology of Aggression* Randy J. of the sexes In seeking to understand why gorilla society exists as it does Alexander H Harcourt and Kelly J Stewart bring together extensive data on wild gorillas collected over decades by numerous researchers working in diverse habitats across Africa to illustrate how the social system of gorillas has evolved and endured Gorilla Society introduces recent theories explaining primate societies describes gorilla life history ecology and social systems and explores both sexes evolutionary strategies of survival and reproduction With a focus on the future Harcourt and Stewart conclude with suggestions for future research and conservation An exemplary work of socioecology from two of the world s best known gorilla biologists Gorilla Society will be a landmark study on a par with the work of George Schaller a synthesis of existing research on these remarkable animals and the societies in which they live Monogamy Ulrich H. Reichard,Christophe Boesch,2003-09-11 Why do males of some species live with a single mate when they are capable of fertilizing more than one female s eggs Why do some females pair only with one male and not with several partners Why do birds usually live in pairs and feed chicks together whilst mammals often live in larger groups with females rearing their young without male help These questions form the central theme of this book Social monogamy is a complex multi faceted phenomenon that does not always correspond with reproductive monogamy so a paired male may not necessarily be raising his own offspring Exploring the variables influencing and maintaining the fascinating diversity of social sexual and reproductive monogamous partnerships in birds mammals and humans this book provides clues to the biological roots of monogamy for students and researchers in behavioural ecology evolutionary anthropology primatology zoology and ornithology Cultural Psychology of Immigrants Ramaswami Mahalingam,2013-12-19 This new volume provides an interdisciplinary perspective on how intersections of race class gender sexuality and culture shape the cultural psychology of immigrants It demonstrates the influence transnational ties and cultural practices and beliefs play on creating the immigrant self Distinguished scholars from a variety of fields examine the cultural psychological consequences of displacement among different immigrant communities Cultural Psychology of Immigrants opens with a variety of theoretical perspectives on immigration and a historical overview of sociological research on immigrants It then examines the racial discrimination of immigrants and the multifaceted influences on the creation of immigrant identities The final section documents the pivotal role of family contexts in shaping identity Each chapter illustrates the commonalities and differences among immigrants in the ways in which they make sense of their newfound selves in a displaced context Intended for advanced students and researchers in the fields of psychology social work marriage and family therapy public health anthropology sociology education and ethnic studies the book also serves as a resource in courses on cultural psychology immigrant studies minority groups race and ethnic relations self and identity culture and human development and immigrants and mental health **Primate Behavior** Julie A.
