

A photograph of a herd of elephants in a savanna. In the foreground, the back of a person is visible, looking out over the scene. The elephants are in the middle ground, and a bright orange light, possibly a sunset or sunrise, is visible in the background.

The Cultural Encyclopedia of Baseball, 2d ed. Jonathan Fraser Light, 2016-03-25 More than any other sport baseball has

developed its own niche in America's culture and psyche. Some researchers spend years on detailed statistical analyses of minute parts of the game while others wax poetic about its players and plays. Many trace the beginnings of the civil rights movement in part to the Major League's decision to integrate and the words and phrases of the game for example pinch hitter and out in left field have become common in our everyday language. From AARON HENRY onward this book covers all of what might be called the cultural aspects of baseball as opposed to the number rich statistical information so widely available elsewhere. Biographical sketches of all Hall of Fame players, owners, executives and umpires as well as many of the sportswriters and broadcasters who have won the Spink and Frick awards join entries for teams, owners, commissioners and league presidents. Advertising agents, drafts, illegal substances, minor leagues, oldest players, perfect games, retired uniform numbers, superstitions, tripleheaders and youngest players are among the thousands of entries herein. Most entries open with a topical quote and conclude with a brief bibliography of sources for further research. The whole work is exhaustively indexed and includes 119 photographs.

Signs, Language, and Culture: The Semograms of the Pyramid Texts between Iconicity and Referential Reality Josep Cervelló Autuori, Marc

Orriols-Llonch, 2025-04-17 The signs of Egyptian hieroglyphic writing are pictograms i.e. images that represent beings and objects of reality. The main characteristic of pictograms is their iconicity. An icon conveys meaning through the image which distinctly refers to a real referent by depicting several of its defining features. This volume focuses on semograms which are lexical or semantic pictograms meaning the image itself participates directly in the encoding of the linguistic message. The Pyramid Texts of the late 3rd millennium BCE constitute the oldest corpus of funerary texts in Egyptian and human history. Their semograms iconically reflect cultural realities of Old Kingdom Egypt and perhaps earlier. The studies you will find in this book are devoted to the dialectics between text, sign, iconicity and referential reality.
