Women's Minds, Women's Bodies G. Boswell, F. Propp, 2013-12-03 Psychology means the study of the soul it is the social science concerned with investigating who we are why we have certain feelings and why we do the things we do Are we no more than a vast assembly of nerve cells and their associated molecules Is biology our genetic inheritance destiny or does social upbringing play a crucial role What are the roles played by Nature and by Nurture Are we purely physical beings or is there an aspect that can be called spiritual This thought provoking novel takes you on a journey of intellectual and emotional exploration considering along the way questions that weve all asked ourselves such as Is it true that we only use 10% of our brains Does playing classical music for infants increase their intelligence Do crime rates go up during a full moon Can hypnosis or post hypnotic suggestions make us do something we wouldnt normally do Does subliminal advertising influence us to buy products Are our memories stored indelibly almost like a tape recorder What causes memory lapses as we age Can repressed traumatic memories be recovered through hypnosis Do some people have multiple personalities How can I tell if someone has a neurosis or a psychosis Do men have an inner feminine side and women an inner masculine Are there innate psychological differences between males and females The four main characters in this book will guide you through a diverse and sometimes bewildering world of differing approaches to answering such questions such as Freudian Jungian and Adlerian Humanistic Existential and Transpersonal as well as Cognitive Emotive and Behaviorist Along the way you will learn about the developmental stages proposed by psychologists such as Erikson Kohlberg Piaget and Fowler and even explore some of the questions currently being asked by both neuroscientists and philosophers of the mind Start reading to begin your study of our innermost selves **Reader's Guide to Women's Studies** Eleanor Amico, 1998-03-20 The Reader s Guide to Women s Studies is a searching and analytical description of the most prominent and influential works written in the now universal field of women s studies Some 200 scholars have contributed to the project which adopts a multi layered approach allowing for comprehensive treatment of its subject matter Entries range from very broad themes such as Health General Works to entries on specific individuals or more focused topics such as Doctors

Forced Migration and Mental Health David Ingleby, 2006-01-27 Although forced migration is not new in human history it has become in our time one of the world s major problems In the last few decades armed conflict and political unrest have created vast numbers of asylum seekers refugees and displaced persons This has led in turn to increasing involvement of professional care workers and agencies both governmental and nongovernmental While there is no doubt on the part of

helping parties that care is necessary there is considerable debate about the kind of care that is needed This book presents a critical review of mental health care provisions for people who have had to leave their homeland and explores the controversies surrounding this topic Providing fresh perspectives on an age old problem this book covers humanitarian aid and reconstruction programs as well as service provision in host countries It is of interest to all those who provide health services create policy and initiate legislation for these populations **Faith in a Pluralist Age** Kaye V. Cook, 2018-03-14

Most academics agree with Peter Berger that pluralism theory appears more accurate than secularization theory in accounting for the societal changes that accompany modernization Yet Berger s earlier book *Many Altars of Modernity* gives limited attention to the implications of the pluralist paradigm for religious discourse in particular for evangelicals According to Berger who wrote the first chapter in this book while pluralism leads to less certainty about faith and creates secular spaces it also more positively clarifies the importance of trust in God highlights the nature of religious institutions as voluntary associations rather than birth rights and challenges Christians to know what they believe in Subsequent chapters respond to the first Four responses are theoretical e g challenging the concept of secular spaces exploring social constructionism and four are contextual e g describing anti pluralist forces in India challenging feminists to pluralism examining women s responses to pluralism and exploring values in Brazil and China The ideas are easily accessible to the lay reader and are intended to initiate a much needed conversation about the implications of pluralist theory We conclude that pluralism is challenging for Christian faith but as Peter Berger says in most ways it is good for you With contributions from Peter Berger Bruce Wearne Roger Olson Paul Brink James Skillen Tal Howard Ruth Groenhout Ruth Melkonian Hoover Si Hua Chang Taylor Marie Funchion **Sharing Breath** Sheila Batacharya, Yuk-Lin Renita Wong, 2018-10-31

Treating bodies as more than discursive in social research can feel out of place in academia As a result embodiment studies remain on the outside of academic knowledge construction and critical scholarship However embodiment scholars suggest that investigations into the profound division created by privileging the mind intellect over the body spirit are integral to the project of decolonization The field of embodiment theorizes bodies as knowledgeable in ways that include but are not solely cognitive The contributors to this collection suggest developing embodied ways of teaching learning and knowing through embodied experiences such as yoga mindfulness illness and trauma Although the contributors challenge Western educational frameworks from within and beyond academic settings they also acknowledge and draw attention to the incommensurability between decolonization and aspects of social justice projects in education By addressing this tension ethically and deliberately the contributors engage thoughtfully with decolonization and make a substantial and sometimes unsettling contribution to critical studies in education **Mad Matters** Brenda A. LeFrançois, Robert Menzies, Geoffrey Reaume, 2013

In 1981 Toronto activist Mel Starkman wrote An important new movement is sweeping through the western world The mad the oppressed the ex inmates of society s asylums are coming together and speaking for themselves *Mad Matters* is the first

Canadian book to bring together the writings of this vital movement which has grown explosively in the years since. With contributions from scholars in numerous disciplines as well as activists and psychiatric survivors it presents diverse critical voices that convey the lived experiences of the psychiatrized and challenges dominant understandings of mental illness. The connections between mad activism and other liberation struggles are stressed throughout making the book a major contribution to the literature on human rights and anti oppression.

The Tender Cut Patricia A. Adler, Peter Adler, 2011-08-22

Cutting, burning, branding and bone breaking are all types of self injury of the deliberate non suicidal destruction of one's own body tissue, a practice that emerged from obscurity in the 1990s and spread dramatically as a typical behavior among adolescents. Long considered a suicidal gesture, *The Tender Cut* argues instead that self injury is often a coping mechanism, a form of teenage angst and expression of group membership and a type of rebellion converting unbearable emotional pain into manageable physical pain. An important portrait of a troubling behavior, *The Tender Cut* illuminates the meaning of self injury in the 21st century, its effects on current and former users and its future as a practice for self discovery or a cry for help.
