Russian Word-formation Charles Edward Townsend, 1975 *A Computational Phonology of Russian* Peter Chew, 2003
This dissertation provides a coherent synchronic broad coverage generative phonology of Russian I test the grammar empirically in a number of ways to determine its goodness of fit to Russian In taking this approach I aim to avoid making untested or even incoherent generalizations based on only a handful of examples In most cases the tests show that there are exceptions to the theory but at least we know what the exceptions are a baseline is set against which future theories can be measured and in most cases the percentage of exceptional cases is reduced to below 5% The principal theoretical outcomes of the work are as follows First I show that all of the phonological or morphophonological processes reviewed can be described by a grammar no more powerful than context free Secondly I exploit probabilistic constraints in the syllable structure grammar to explain why constraints on word marginal onsets and codas are weaker than on word internal onsets and codas I argue that the features initial and final and extraprosodicity are unnecessary for this purpose Context and the Lexicon in the Development of Russian Aspect Neil Bermel, 1997-01-01 This study advances a new approach to the history of Russian aspect integrating recent work on aspectology with contemporary theories of language changes and development Using data from five Old Russian texts the author traces the development of the aspectual opposition from its early lexical roots to the sixteenth century when contextual and discourse concerns came to the fore *Toward a Calculus of Meaning* Edna Andrews, Y. Tobin, 1996-01-01 This volume contains papers presented at a symposium in honor of Cornelis H van Schooneveld and invited papers on the topics of invariance markedness distinctive feature theory and deixis It is not a Festschrift in the usual sense of the word but more of a collection of articles which represent a very specific way of defining and viewing language and linguistics The specific approach presented in this volume has its origins and inspirations in the theoretical and methodological paradigm of European Structuralism in general and the sign oriented legacy of Ferdinand de Saussure and Charles Sanders Peirce and the functional and communication oriented approach of the Prague School in particular The book is divided in three sections Theoretical and Methodological Overview Cornelis H van Schooneveld Anatoly Liberman Petr Sgall Alla Bemova and Eva Hajicova Robert Kirsner Studies in Russian and Slavic Languages Edna Andrews Lawrence E Feinberg Annie Joly Sperling Ronald E Feldstein Irina Dologova and Elena Maksimova Stefan M Pugh Applications to Other Languages Language Families and Aphasia Ellen Contini Morava Barbara A Fennell Victor A Friedman Robert Fradkin Yishai Tobin Mark Leikin *Russian Root List with a Sketch of Word Formation* Charles E. Annual Workshop on Formal Approaches to Slavic Linguistics James Eric Lavine, 2006 The present volume consists of revised and edited versions of papers originally presented at the fourteenth annual meeting of Formal Approaches to Slavic Linguistics held at Princeton University May 6 8 2005 P v **Diminutives across Languages, Theoretical Frameworks and Linguistic Domains** Stela Manova, Laura Grestenberger, Katharina Korecky-Kröll, 2023-12-18 This volume

addresses a number of issues in current morphological theory from the point of view of diminutive formation such as the role of phonology in diminutives and hypocoristics and consequently its place in the overall architecture of grammar i.e. phonology first versus syntax morphology first theoretical analyses diminutives in the L1 acquisition of typologically diverse languages and the borrowing of non diminutive morphology for the expression of diminutive meanings among others Among the peculiarities of diminutive morphology discussed are the relation between diminutives and mass nouns the avoidance of diminutives in plural contexts in some languages and the relatively frequent semantic bleaching and reanalysis of diminutive forms cross linguistically Special attention is paid to the debate on the head versus modifier status of diminutive affixes corresponding to high versus low diminutives in alternative analyses with data from spoken and sign languages Overall the volume addresses a number of topics that will be of interest to scholars of almost all linguistic subfields and persuasions

Adjective Classes R.M.W. Dixon, Aleksandra Iľ'evna Aľkhenval'd, 2004-09-16 This book shows that every language has an adjective class and how such classes vary Thirteen scholars report original research on languages from North Central and South America Europe Africa Asia and the Pacific The book throws new light on the nature and classification of adjectives and redefines the cross linguistic parameters of their variation **Yearbook of Morphology 1996** G.E.

Booij, Jaap van Marle, 2013-04-17 A revival of interest in morphology has occurred during recent years Since 1988 the Yearbook of Morphology book series has proven to be an eminent platform for the growth of morphological research containing articles on topics that are central in the current theoretical debates The Yearbook of Morphology 1996 focuses on the relationship between morphology and psycholinguistics Basic questions such as the following are discussed To what extent does the morphological structure of a word play a role in its perception and production Are regular complex words created anew each time they are used or are they stored in the lexicon The relevant evidence comes from a variety of European languages Another important theme in this yearbook is the degree of autonomy of morphology in which respect does it differ from other modules of the grammar The present yearbook also contains articles on periphrasis the nature of inflectional morphology and syncretism in derivational morphology Audience Theoretical and historical linguists morphologists phonologists and psycholinguists will find this book of interest
