## **Samuel Johnson And The New Science:**

Samuel Johnson and the New Science Richard B. Schwartz, 1971      **Samuel Johnson and the new science** Richard B. Schwartz, 1971      **Johnson in Japan** Kimiyo Ogawa, Mika Suzuki, 2020-10-16 The study and reception of Samuel Johnson's work has long been embedded in Japanese literary culture. The essays in this collection reflect that history and influence underscoring the richness of Johnson's scholarship in Japan while exploring broader conditions in Japanese academia today. In examining Johnson's works such as the *Rambler* 1750-52, *Rasselas* 1759, *Lives of the Most Eminent English Poets* 1779-81, and *Journey to the Western Islands of Scotland* 1775, the contributors all members of the half-century-old Johnson Society of Japan also engage with the work of other important English writers, namely Shakespeare, Mary Shelley, Jane Austen, and Matthew Arnold, and later Japanese writers including Natsume Soseki. 1867-1916. If the state of Johnson studies in Japan is unfamiliar to Western academics, this volume offers a unique opportunity to appreciate Johnson's centrality to Japanese education and intellectual life and to reassess how he may be perceived in a different cultural context. Published by Bucknell University Press. Distributed worldwide by Rutgers University Press.      **Johnson's New Universal Cyclopædia : a Scientific and Popular Treasury of Useful Knowledge**, 1884      The Cambridge History of Science: Volume 5, The Modern Physical and Mathematical Sciences David C. Lindberg, Mary Jo Nye, Roy Porter, Ronald L. Numbers, 2003 A new and comprehensive examination of the history of the modern physical and mathematical sciences      *Boswell's Life of Johnson* John A. Vance, 2009-01-01 When it first appeared in 1985, Boswell's *Life of Johnson* brought together the most recent and most lively assessments of the literary merit and historical accuracy of Boswell's biography. In an invigorating exchange placed at the center of the collection, Donald Greene's description of the *Life* as a fictionalized biography that screens the real, complex Johnson from view is challenged by Frederick Pottle's defense of Boswell's biographical method of his sturdy compilation of detail that presents the factual rather than the fictional Johnson. Other essays explore the effect of Johnson's humor on the shaping of his image in the *Life*, the recent developments in literary criticism, and the effect they have had on eighteenth-century studies and the continuing interest of Boswell's *Life* as a showcase for members of Johnson's famous circle. The volume concludes with an assessment of the Boswellian problem of the difficulties the *Life* presents to readers, scholars, and teachers.      **Johnson, Rasselas, and the Choice of Criticism** Edward Tomarken, 2021-10-21 Although *Rasselas* has received more critical commentary than almost any other work by Samuel Johnson, Edward Tomarken's book is the first full-length study to focus on his tale of the Prince of Abyssinia. This anomaly arises, as Tomarken shows, because *Rasselas* has remained resistant to the customary critical approaches of the eighteenth, nineteenth, and twentieth centuries, consistently eliciting new kinds of insights and raising new sorts of problems. Tomarken's contribution is a new methodology to explain this phenomenon. He sees Johnson's early writings, *London* and *Irene*, as instances of the writer trying, with only partial success, to achieve what he

first realized in *The Vanity of Human Wishes* a means of permitting literary form to refer to conduct. Later works such as *The Journey to the Western Islands of Scotland* are viewed as further developments of this method which achieved its fullest expression in *Rasselas* and *the Life of Pope*. Such a reading of Johnson develops an aesthetic that operates on the margins between the literary and the extra literary. Although Johnson's own critical view was unable to accommodate such a position, Tomarken shows that in practice he moved toward it by a process of trial and error manifest in his poetry and narratives. When raised to the level of critical method, this approach goes beyond the assumptions not only of Johnson's day but also of our own. Tomarken's theoretical coda demonstrates how the choices of current critical theory like those in the marriage debate in *Rasselas* can be understood to interact with one another. Specifically, he proposes a dialectical relationship for two approaches: hermeneutics and structuralism, usually seen as opposed to one another. This innovative study will interest not only Johnson scholars but all those concerned with critical theory.

*Samuel Johnson* Samuel Johnson, 1984 **Johnson's New Universal Cyclop:dia** Frederick Augustus Porter Barnard, Arnold Guyot, 1875 Discovering the Human Ralf Haekel, Sabine Blackmore, 2013 English Summary

*Discovering the Human* investigates the emergence of the modern human sciences and their impact on literature, art, and other media in the 18th and the 19th centuries. Up until the 1830s, science and culture were part of a joint endeavour to discover and explore the secret of life. The question "What is life?" unites science and the arts during the Ages of Enlightenment and Romanticism, and at the end of the Romantic period, a shift of focus from the human as an organic whole to the specialized disciplines signals the dawning of modernity. The emphasis of the edited collection is threefold: the first part sheds light on the human in art and science in the Age of Enlightenment; the second part is concerned with the transitions taking place at the turn of the 19th century; the chapters forming the third part investigate the impact of different media on the concept of the human in science, literature, and film.

*Encyclopedia of Literature and Science* Pamela Gossin, 2002-08-30 Science and literature have always been strange bedfellows. Like puzzle pieces, they fit because they're different. Some of the greatest works of world literature have been inspired by the marvels of the scientific world. Scientists have written works of the imagination. Even formal scientific writings have been known to employ rhetoric. There is a tendency to think of literature and the humanities in

general as having little to do with science Yet scholars have conducted fruitful studies of the history and philosophy of science With the rise of technology scholars have also applied scientific analysis to the study of literature and the creative process The intersection of scientific and humanistic inquiry is finally being mapped This volume includes more than 650 A Z entries on topics and themes in science and literature significant writers key scientists seminal works and important theories and methodologies This reference defines the rapidly emerging interdisciplinary field of literature and science An introductory essay traces the history of the field its growing reputation and the current state of research Broad in scope the volume covers world literature from its beginnings to the present day and illuminates the role of science in literature and literary studies A wide range of experts contributed entries to this volume each of which concludes with a brief bibliography The entire volume closes with a list of works for further reading

**The Philosophical Biographer** Martin Maner, 2009-01-01 The Philosophical Biographer shows how a shift in philosophical outlook in the seventeenth and eighteenth centuries from an understanding of human knowledge rooted in deductive certainties to one resting on inductive probability influenced the development of biographical narrative in general and in particular the way Johnson dealt with biographical evidence in his *Lives of the Poets* Examining the psychological and philosophical doubt that lay at the heart of Johnson's character and intellect Martin Maner reveals in the biographical studies of Savage Swift Milton and Pope an ingrained pattern of dialectical argument and a skeptical attitude toward evidence a method that involves the reader in judgments about the poets as it conveys Johnson's own understanding of truth In the *Life of Savage* Johnson moves from thesis to antithesis generating out of opposing emotional responses irony and sympathy ridicule and pathos an understanding of the man Dialectically undercutting the conclusions of previous biographers of Swift and Milton Johnson fashions a new somewhat acidic estimation of Swift and a portrait of Milton that engages contemporary questions of the probable and the marvelous The *Life of Pope* Johnson's greatest dialectical achievement alternates between blame and praise public and private realms weaving tone context and analogy into great contrasting patterns of inquiry and judgment Establishing the centrality of a dialectical method in the *Lives of the Poets* Martin Maner links the rise of biography as well as Johnson's interest in the form to the shift in epistemology brought about by empiricism In the new patterns of thought of the seventeenth and eighteenth centuries biography the estimation of a life through sifting of historical events and evidence was the most philosophical of endeavors and Johnson its greatest practitioner

Samuel Johnson, President of King's College: The philosopher Samuel Johnson, 1929 *Theology and the Enlightenment* Paul Avis, 2022-11-17 Challenging the common assumption that the Enlightenment of the late seventeenth and the eighteenth centuries was an essentially secular irreligious and atheistic movement this book critiques this standard interpretation as based on a narrow view of Enlightenment sources Building on the work of revisionist historians this volume takes the argument squarely into the theological domain whether Anglican Dissenting Lutheran or deistic whilst also noting that the Enlightenment deeply affected Roman Catholic and Jewish

theologies It challenges the stereotype of Enlightenment rationalism and the penultimate chapter brings out the biblical and ecclesial roots of the image of enlightenment and reclaims it for Christian faith [The New Science and Women's Literary Discourse](#) J. Thell, 2017-08-31 The central claim of *Minds in Motion* is that British travel writing of the long eighteenth century functions as an epistemological playing field where authors test empiricist models of engagement with the world while simultaneously seeking out the role of the self and the imagination in producing knowledge Whether exploring the relationship between the senses and the mind the narrative viability of experimental detachment or the literary dynamics of virtual witnessing eighteenth century travel authors persistently confront their positionality and raise difficult questions about the nature and value of first hand experience In one way or another they also complicate empiricist ideals by exploring the limits of individual perception and the role of the imagination in generating and relating knowledge While the genre is often viewed as either numbingly documentary or non literary and commercial travel literature actually operates at the front line of the period's intellectual developments illustrating both how individual writers grapple with philosophical ideals and how these ideals filter into the lives of ordinary people Indeed travel literature directly engages the scientific and philosophical concerns of the period while it is also widely avidly read as such it offers models for cognitive and rhetorical practices that are evaluated and either embraced or rejected by readers in a process of identification not unlike that which occurs in early English fiction Moreover because eighteenth century travel literature is so crucial to the development of so many fields from botany to the novel it illustrates vividly the divisive energies of discipline and genre formation while also archiving the shared aims and methods of what will become discrete fields of study Travelogues as diverse as Margaret Cavendish's *Blazing World* 1666 and Samuel Johnson's *Journey to the Western Islands of Scotland* 1775 reveal the epistemological circuitry of the eighteenth century and historicize the absorption of the philosophical tendencies that have come to define modernity *The Last Frontier* Karl S. Guthke, 2019-05-15 The existence of intelligent extraterrestrial life has been a subject of debate since the dawn of recorded history *The Last Frontier* originally published in German in 1983 and now available in Helen Atkins's sensitive English translation traces the development of the idea that Earth is not the only planet inhabited by intelligent beings but that there might be a plurality or even an infinity of worlds with human or humanoid life Focusing on the seventeenth to the twentieth century and taking into account theological philosophical scientific popular and literary writings from American British French and German sources Karl S Guthke demonstrates the continuing importance of this question to the process of human self definition [From Madman to Crime Fighter](#) Roslynn D.
