California Cures!: How The California Stem Cell Program Is Fighting Your Incurable Disease! Don C Reed,2018-03-19 An engrossing read that is hard to put down and packed with insights blend history and the latest research with broader examination of stem cell potentials to change not only health conditions but society as a whole No collection covering stem cell advancements should be without this hard hitting examination that uses California s results as a foundation for considering stem cell s special promises and powerful obstacles to success Midwestern Book ReviewThirteen years ago America faced an epidemic of chronic disease cancer paralysis blindness arthritis Alzheimer s disease diabetes and more But California voters said YES to a 3 billion stem cell research program the awkwardly named California Institute for Regenerative Medicine CIRM Born into battle the scrappy little state agency was immediately blocked by three years of anti science lawsuits but it defeated them all And then A quiet triumph With a focused intensity like the Manhattan Project but for peaceful purposes not to build a bomb scientists funded by CIRM took on the challenges disease and disability called chronic incurable In a series of connected stories accurate though written to entertain California Cures relates a war science against disease with lives on the line Think what it means for a paralyzed young man to recover the use of his hands or for a formerly blind mother to see her teenaged children for the first time Do you know the bubble baby syndrome Infants without a proper immune system typically die young a common cold can kill But for eighteen babies in a stem cell clinical trial a different future they were cured of their disease No one can predict the pace of science nor say when cures will come but California is bringing the fight The reader will meet the scientists involved the women and men behind the microscope and share their struggle Above all California Cures is a call for action Washington may argue about the expense of health care and who will get it but California works to bring down the mountain of medical debt stem cell therapies to ease suffering and save lives Will California build on success and invest 5 billion more in stem cell research We have the momentum says author Don C Reed We dare not stop short Chronic disease threatens everyone we are fighting for your family and mine

Race, Class, and Gender in "Medieval" Cinema L. Ramey, T. Pugh, 2007-02-19 The medieval film genre is not in general concerned with constructing a historically accurate past but much analysis nonetheless centers on highlighting anachronisms This book aims to help scholars and aficionados of medieval film think about how the re creation of an often mythical past performs important cultural work for modern directors and viewers The essays in this collection demonstrate that directors intentionally insert modern preoccupations into a setting that would normally be considered incompatible with these concepts The Middle Ages provide an imaginary space far enough removed from the present day to explore modern preoccupations with human identity
