The Psychological and Physiological Benefits of the Arts Vicky Karkou, Nisha Sajnani, Felicity Anne Baker, Jenny M. Groarke, Hod Orkibi, Johanna Czamanski-Cohen, Maria Eugenia Panero, Jennifer Drake, Corinne Jola, 2022-08-16 **Health and Illness in Close Relationships** Ashley P. Duggan, 2019-02-07 Health and Illness in Close Relationships provides an integrated theoretical framework for understanding the complexities of health trajectories and relationship processes It is the first volume to review and synthesize current empirical evidence and associated theoretical constructs from the literature on health and illness in close relationships across the social and behavioral sciences In doing so it provides a unique cross disciplinary understanding of how health and illness redefine relationships The volume also maps out an explanatory framework of how the pathways and processes of close relationships pose considerations for resilience and flourishing or on the contrary for relational and health decline It will appeal to researchers and students across psychology communication and relationship studies as well as to health professionals who are interested in understanding how health conditions can shape or be shaped by patients close relationships The Lived Body Gillian A. Bendelow, Simon J. Williams, 2002-09-11 The Lived Body takes a fresh look at the notion of human embodiment and provides an ideal textbook for undergraduates on the growing number of courses on the sociology of the body The authors propose a new approach an Embodied Sociology one which makes embodiment central rather than peripheral They critically examine the dualist legacies of the past assessing the ideas of a range of key thinkers from Marx to Freud Foucault to Giddens Deleuze to Guattari and Irigaray to Grosz in terms of the bodily themes and issues they address They also explore new areas of research including the fate of embodiment in late modernity sex gender medical technology and the body the sociology of emotions pain sleep and artistic representations of the body The Lived Body will provide students and researchers in medical sociology health sciences cultural studies and philosophy with clear accessible coverage of the major theories and debates in the sociology of the body and a challenging new way of thinking *Psychology and Spiritual Transformation in a Substance Abuse Program* W. Paul Williamson, Ralph W. Hood, Jr., 2016-01-29 Psychology and Spiritual Transformation in a Substance Abuse Program utilizes a five year longitudinal study to examine the evolving psychological and spiritual condition of victims of substance abuse who were treated as part of the Lazarus Project a Pentecostal faith based residency program span *Material Discourses of Health and Illness* Lucy Yardley, 2013-01-11 Material Discourses of Health and Illness applies discursive approaches to the field of health psychology in stark contrast to the bio medical model of health and illness The discursive approach uses the person's experience and feelings as the central focus of interest whereas the more traditional models regarded these as coincidental and relatively unimportant The book provides an accessible and compelling introduction to social constructionist and discursive approaches to those with limited previous knowledge of socio linguistic theory and research It provides practical examples of how these approaches can be applied to the field of health psychology with a collection of sophisticated

discursive analyses which demonstrate the distinctive contribution that can be made by psychologists to a field that has been largely dominated by sociologists and anthropologists

to deal with stress effectively **Psycho Social Aspects of Health and Illness** Shikha Dixit, Arun Kumar

Sharma, 2017-01-01 The chapters in this volume represent the psychological and sociological perspectives of health and illness. The text is broadly divided into four sections: Health cognitions, Health care and health initiatives, Mental health and mental illness, and Health challenges. The chapters in the first section discuss aspects related to illness severity, health beliefs, and illness representations. The second section focusses on alternative health care systems, health finance, and sociological and psychological aspects of health care. The third section deals with mental health care and social representation of mental health and illness. The last section presents health challenges of specific groups. This volume thus covers a wide spectrum of health issues, theoretical standpoints, and practical concerns. It is expected that this volume will prove to be a good research resource for academics and health professionals who are interested in an interdisciplinary social scientific perspective.

Palaeopathology and Evolutionary Medicine Kimberly A. Plomp, Charlotte A. Roberts, Sarah Elton, Gilian R. Bentley, 2022 The volume aims to encourage more co-produced research addressing questions about human health past and present by scholars working in evolutionary medicine (EM) and palaeopathology. It highlights future research that may promote that collaboration between palaeopathology and EM. This chapter starts with the premise that EM and palaeopathology have clear synergies in that they take a deep time perspective as they explore health in the past and in the present. It introduces the volume and first provides a background to evolutionary medicine from its first appearance in the early 1990s, including discussions about ultimate and proximate explanations for disease. It then highlights that the field of palaeopathology was initially established much earlier than EM and it is argued that practitioners before the 1990s often physicians were simply not exposed to evolutionary theory in relation to the diseases they were seeing both in the living and in the dead. However, the stage now looks set for more productive collaborations. A thematic overview of the volume and its individual chapters follows within the framework of the suggested categories for study within EM. Williams and Nesse 1990. The chapter finishes with some discussion about the One Health initiative. EM and palaeopathology, an initiative that is considered an essential area of study now and into the future.

Everyday Religion Nancy T. Ammerman, 2007 Social scientists sometimes seem not to know what to do with religion. In the first century of sociology's history as a discipline, the reigning concern was explaining the emergence of the modern world and that brought with it an expectation that religion would simply fade from the scene as societies became diverse, complex, and enlightened. As the century approached its end, however, a variety of global phenomena remained dramatically unexplained by these theories. Among the leading contenders for explanatory power to emerge at this time were rational choice theories of religious behavior. Researchers who have spent time in the field observing religious groups and interviewing practitioners, however, have questioned the sufficiency of these market models. Studies abound that describe thriving religious phenomena that fit neither the old secularization paradigm nor the equations predicting vitality only among organizational entrepreneurs with strict orthodoxies. In this collection of previously unpublished essays, scholars

who have been immersed in field research in a wide variety of settings draw on those observations from the field to begin to develop more helpful ways to study religion in modern lives The authors examine how religion functions on the ground in a pluralistic society how it is experienced by individuals and how it is expressed in social institutions Taken as a whole these essays point to a new approach to the study of religion one that emphasizes individual experience and social context over strict categorization and data collection

The Anthropology of Religion, Magic, and Witchcraft Rebecca L. Stein, Philip L. Stein, Benjamin R. Kracht, Marjorie M. Snipes, 2024-07-16 This concise and accessible textbook introduces students to the anthropological study of religion It examines religious expression from a cross cultural perspective and exposes students to the complexities of religion in small scale and complex societies The chapters incorporate key theoretical concepts and a wide range of ethnographic material The fifth edition of *The Anthropology of Religion Magic and Witchcraft* offers a revised introduction covering the foundations of the anthropology of religion anthropological methods and a push toward decolonizing the anthropology of religion expanded coverage of symbols healing wizardry and the intersections of religion with other social institutions new case study material with examples drawn from around the globe especially from Indigenous communities marginalia in each chapter introducing provocative small case examples related to the chapter many of these can be used as prompts for further research small in class case studies or examples for hands on learning a new chapter on religion and healing especially useful for Anthropology programs without representation of four fields as it provides a wider and more interdisciplinary application of the discipline a consistent review of foundations from chapter to chapter linking material and enabling students to connect what they are learning throughout the course and further resources via a comprehensive companion website including interactive activities critical case studies updated study questions bibliographical suggestions including video and color images This is an essential guide for students encountering the anthropology of religion for the first time and also for those with an ongoing interest in this fascinating field
