Elizabeth A. Newsome,2001-09-15 Based on a thorough analysis of the imagery and inscriptions of seven stelae erected in the Great Plaza at Copan Honduras by the Classic Period ruler 18 Rabbit God K this study argues that stelae were erected not only to support a ruler s temporal claims to power but more importantly to express the fundamental connection in Maya worldview between rulership and the cosmology inherent in their vision of cyclical time After an overview of the archaeology and history of Copan and the reign and monuments of 18 Rabbit God K Elizabeth Newsome interprets the iconography and inscriptions on the stelae illustrating the way they fulfilled a coordinated vision of the king s ceremonial role in Copan s period ending rites She also links their imagery to key Maya concepts about the origin of the universe expressed in the cosmologies and mythic lore of ancient and living Maya peoples Because previous scholarship has never assigned all seven monuments to a single period or the patronage of one ruler the uniqueness of Newsome s study lies in the way it explicates the overall meaning and function of the stela series with respect to the long term activities and agendas of one king BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Handbook of Chinese*

Israel and Hellas John Pairman Brown,1995 Religious and Cosmic Beliefs of Central Polynesia Robert W.

Williamson,2013-11-14 Originally published in 1933 this book forms one of two volumes on the religious mythical and cosmic structures of Central Polynesia **Signs, Language, and Culture: The Semograms of the Pyramid Texts between Iconicity and Referential Reality** Josep Cervelló Autuori,Marc Orriols-Llonch,2025-04-17 The signs of Egyptian hieroglyphic writing are pictograms i e images that represent beings and objects of reality The main characteristic of pictograms is their iconicity An icon conveys meaning through the image which distinctly refers to a real referent by depicting several of its defining features This volume focuses on semograms which are lexical or semantic pictograms meaning the image itself participates directly in the encoding of the linguistic message The Pyramid Texts of the late 3rd millennium BCE constitute the oldest corpus of funerary texts in Egyptian and human history Their semograms iconically reflect cultural realities of Old Kingdom Egypt and perhaps earlier The studies you will find in this book are devoted to the dialectics between text sign iconicity and referential reality Pillar of Fire ,1910 The Journal of the Polynesian Society Polynesian Society (N.Z.),1907 Vols for 1892 1941 contain the transactions and proceedings of the society Creation and Contemplation Julien Decharneux,2023-06-06 In Creation and Contemplation Julien Decharneux explores the connections between the cosmology of the Qur n and various cosmological traditions of Late Antiquity with a focus on Syriac Christianity The first part of the book studies how in exhorting its audience to contemplate the world the Qur n carries on a tradition of natural contemplation that had developed throughout Late Antiquity in the Christian world In this regard the analysis suggests particularly striking connections with the mystical and ascetic literature of the Church of the East which was in effervescence at the time of the emergence of Islam The second part argues that the Qur nic cosmological discourse is built so as to serve the overarching theological message of the text namely God s absolute unity Despite the allusive and sometimes obscure way in which the Qur n talks about the world s coming into being and its maintenance in existence the text betrays its authors acquaintance with cosmological debates of Late Antiquity In studying the Qur n through the prism of Late Antiquity this book contributes to our understanding of the emergence of Islam and its relationship with other religious traditions of the time Winner of the 2022 Marie Antoinette Van Huele Prize and the 2023 Richard Kreglinger Prize both Faculty of Philosophy and Social Sciences Free University of Brussels Classical Chinese Literature: From antiquity to the Tang dynasty John Minford,Joseph S. M. Lau,2002 Contains English translations of Chinese writings drawn from throughout a period of four hundred years including poems drama fiction songs biographies and early works of philosophy and history arranged chronologically and by genre with introductory quotes and comments **The Trees of Paradise and Pillars of the World** Elizabeth Ann Newsome,1991 **Lectures on Government and Binding** Noam Chomsky,1993 The architecture of the human language faculty has been one of the main foci of the linguistic research of the last half century This branch of linguistics broadly known as Generative Grammar is concerned with the formulation of explanatory formal accounts of linguistic phenomena with the ulterior goal of gaining insight into the properties of the language organ The

series comprises high quality monographs and collected volumes that address such issues The topics in this series range from phonology to semantics from syntax to information structure from mathematical linguistics to studies of the lexicon

Lights in the Sky Michael Maunder, 2007-09-28 Many lights and other objects in the sky go unrecognised or at least are little understood by those observing them Such things range from the commonplace like rainbows and meteors to the distinctly unusual like the green flash and ball lightning And there is still a residuum of objects that remain unidentified by the watcher classed generally as UFOs a description which today has connotations of the mysterious even of extraterrestrial visitors The first part of this book is an identification guide very much like the plant identifier sections found in a good gardening or botany book It allows quick and structured identification of known aerial phenomena whether at night or during the day The objects thus found are referenced to the second part of the book The second part gives a full description physical explanation and where relevant notes on observing and photographing the various phenomena Some will need optical aids such as binoculars or telescopes but the main thrust of the book is identification and explanation rather than imaging The final chapter approaches UFOs from a scientific standpoint particularly the way in which human perception and often preconception affects the outcome It does however finish with a short section on extraterrestrial UFOs emphasising the burden of proof aspect and touching on the scientific theories of life on other worlds and the improbability of visitors
